Effective online public services across borders (Large Scale Pilot projects)

Published by Editor Connect on 06/12/2012

[1]

Effective interaction between public administrations, citizens and businesses is essential to build the digital society. Online delivery of basic services to citizens and businesses (for instance personal documents, income taxes, company registration or VAT) help public authorities provide better services. Today, many public services are available online but this is not always the case across borders. Key in the strategy to improve such interaction is the development of Large Scale Pilot projects (LSPs) engaging stakeholders such as public authorities, service providers and research centres across the EU in the implementation of common solutions to deliver online public services and make them accessible throughout Europe. Five LSPs work on this: E-CODEX, EPSOS, STORK 2.0, PEPPOL and SPOCS... Discover them!
