SMART-ISLANDS: SMART-ISLANDS: 3D Smart Webservices for Mediterranean Islands

SMART-ISLANDS delivers a geoplatform/globe with 8 integrated 3D smart webservices specifically addressed to Mediterranean Islands that are small and have unique characteristics—However, the SMART-ISLANDS platform can have EU-wide and international applicability once delivered to the market in 2012. The SMART-ISLANDS webservices cover the wide range of 8 applications: (1) 3D Smart Yachting (Transport), (2) 3D Smart Aerodrome (Transport), (3) 3D Smart Leisure (Citizens), (4) Smart Real Estate (Business), (5) Smart Statistics for Planning (Infrastructure), (6) 3D Forest Fire Fighting (Environment), (7) Smart Retailing (Commercial), and (8) 3D Weather (Citizens, Government). Services are smart as of the input data retrieval and the user friendly interfaces by PC/Web and smart phones (PDA/iPhone/iPAD)—However, the SMART-ISLANDS Platform will feature “plugs-in” to accommodating additional services after 2012. SMART-ISLANDS is not a RTD project per se in the context of FP7; rather it: (1) Capitalizes on 8 successful previous ICT/RTD projects accomplished (i.e., 8 sub-platforms), (2) Links the 8 projects together in one geoplatform (also supported via an EC/ICT; 9th subplatform), (3) Offers integrated webservices to the public/private sector, the citizens and the universities, and (4) Commercializes (i.e., true marketing) the platform for “revenue/profit making" in 2012.

Project ID card

- Funded under: The Information and Communication Technologies Policy Support Programme
- Area: CIP-ICT-PSP.2010.4.1 - Open Innovation for future Internet-enabled Services in "smart" Cities
- Total cost: €1.59m
- EU contribution: €0.80m
- Project reference: 270998
- Execution: From 01/08/2011 to 31/07/2013
- Project status: Closed
- Contract type: The Information and Communication Technologies Policy Support Programme PB Pilot Type B
