# ComplianTV

**Compliance of TVs with Energy Label and Ecodesign Requirements**

# Final project event

3. September 2015 | Brussels, Rue de la Science, 14 B-1040, DigitalEurope

The ComplianTV project has been designed to organise large scale TV testing for the Energy Label and Ecodesign Directives compliance and retailer monitoring of the energy label display for televisions.

Ten partners from around the EU, including three testing laboratories, have teamed up to verify the compliance of TVs for the energy efficiency requirements, producer claims and to monitor the information availability at the points of sale.

We invite you to learn more about the results of the 160 TV model tests, the results of the visits of 100 physical and 100 online shops for the label display monitoring, and the overall project lessons learned and recommendations towards the proper implementation of the legislation requirements for televisions.

## Agenda:

- 9.45 – 10.00 Registration and refreshments
- 10.00 – 10.15 Project introduction, overview and main activities
  *Benoît Tinetti, BIO by Deloitte, Project coordinator*
- 10.15 – 10.20 Role of ComplianTV project in ensuring the EU goals in energy efficiency
  *Sergio Ferreira, EASME, Project officer*
- 10.20 – 10.50 Results of TV testing regarding Ecodesign and Energy Label requirements – overview of main results, analysis of the findings and the project recommendations in the field of TV testing procedures
  *Gergana Dimitrova, Technical University Berlin*
