Health – Most important aspects to focus on in future R&I activities

- ✓ Integration on content
  - One Health: animal/plant and environmental/human health
  - How to assess the methodology of the integration? Within a project and/or between programmes?
  - Manageability of this level of complexity
- ✓ Integration of the actors
  - Multiactor approach / seed money mechanisms
  - Local vs global
  - Different role of actors (from Policy makers, industry, SMEs to farmers)
  - Governance & decision making (independence)
- ✓ Integration of the research/policy interface
  - Regulatory sciences – multi-level framework coordination
  - Policy coherence

Health – Most important aspects to focus on in future R&I activities

- ✓ Knowledge management
  - How combine different forms of knowledge?
  - How to define quality?
- ✓ Impact:
  - Evaluation and monitoring of impact
  - Dissemination / open science
  - Long term availability
- ✓ Address societal demands
  - Prevention
  - Alternative models and biodiversity
