PAGE 2: Part I – General Information about Respondents

Q1: Address

Contact name	SHINYA SASAKI
Organisation/company	Japan Business Council in Europe a.i.s.b.l
Country	Belgium
Email Address	

Q2: If you have a Transparency Register ID number, please provide it below. If your organisation is not registered, you have the opportunity to register now by following this link. If your entity responds without being registered, the Commission will consider its input as that of an individual/private person and, as such, will publish it separately.

68368571120-55

Q3: Received contributions may be published on the Commission's website, with the identity of the contributor. Please state your preference with regard to the publication of your contribution. Please note that regardless of the option chosen, your contribution may be subject to a request for access to documents under Regulation 1049/2001 on public access to European Parliament, Council and Commission documents. In such cases, the request will be assessed against the conditions set out in the Regulation and in accordance with applicable data protection rules.

My contribution may be published under the name indicated; I declare that none of it is subject to copyright restrictions that prevent publication

Q4: We might need to contact you to clarify some of your answers. Please state your preference below:

I am available to be contacted

Q5: Please indicate whether you are replying to this questionnaire as:

An industry association

Consultation on the regulatory fitness of chemicals legislation (excluding REACH)

Q6: If a business or industry association, please indicate your field(s) of interest or activity(ies) - the letters in between brackets correspond to NACE codes [multiple choice]:

Printing and reproduction of recorded media (C18) ,
Manufacture of basic chemicals, fertilisers, plastics and synthetic rubber in primary forms (C20.1)
,
Manufacture of pesticides and other agrochemical products (C20.2)
,
Manufacture of paints, varnishes and similar coatings, printing ink and mastics (C20.3)
,
Manufacture of soap and detergents, cleaning preparations, perfumes and toilet preparations (C20.4)
,
Manufacture of other chemical products (C20.5) ,
Manufacture of man-made fibres (C20.6) ,
Manufacture of rubber and plastic products (C22) ,
Manufacture of other non-metallic mineral products (C23)
,
Manufacture of basic metals (C24) ,
Manufacture of fabricated metal products, except machinery and equipment (C25)
,
Manufacture of computer, electronic and optical products (C26)
,
Manufacture of electrical equipment (C27) ,
Manufacture of machinery and equipment (C28) ,
Manufacture of motor vehicles, trailers and semi-trailers (C29)
,
Manufacture of other transport equipment (C30) ,
Manufacture of games and toys (C32.4) ,
Manufacture of medical and dental instruments and supplies (C32.5)
,
Other manufacturing(excluding manufacturing of toys or medical and dental instruments) (C32)
,
Electricity, gas, steam and air conditioning supply (D)
,
Wholesale and retail trade (G)

Q7: For businesses, please indicate the size of your business:The definition of small and medium-sized enterprises depends on the staff headcount and either the annual turnover or the balance sheet of the company. Please consult the following website: http://ec.europa.eu/growth/smes/business-friendly-environment/sme-definition/index_en.htm

Large company (250 employees or more)

Q8: Please indicate the level at which your organisation is active:

EU

PAGE 3: Part II – General Questions

Q9: How important is it in your view that there is chemical and chemical-related legislation* at EU-level in order to achieve the following objectives? (1 = not important; 5= very important)*This comprises the chemical-related provisions in all legislation within the scope of this fitness check. It encompasses legislation governing hazard identification and classification, as well as risk management measures, including chemical-related aspects of legislation on worker safety, transport, environmental protection, chemicals controls and supporting legislation, excluding REACH. The full list of legislation can be found here.The internal market of the European Union (EU) is a single market in which the goods, services, capital and persons can move freely across borders. One of the key objectives of chemical and chemical-related legislation is to have a single market for chemical substances and mixtures, as well as products containing chemicals.**

Protecting human health	4
Protecting the environment	4
Ensuring a well-functioning internal market**	4
Stimulating competitiveness and innovation	4

Q10: Do you think the EU chemical and chemical-related legislation has been effective in achieving the following objectives? (1= not effective, 5= very effective). Please only consider chemical-related provisions in the legislation.

Protecting human health	4
Protecting the environment	4
Ensuring a well-functioning internal market	4
Stimulating competitiveness and innovation	3

Q11: If you think the EU chemical and chemical-related legislation is not effective (1) or only somewhat (2,3) effective, please indicate what you believe are the main reasons for this limited effectiveness in the following table:

Protecting human health	No opinion or not applicable
Protecting the environment	No opinion or not applicable
Ensuring a well-functioning internal market	No opinion or not applicable
Stimulating competitiveness and innovation	No opinion or not applicable

Q12: To what extent do you consider that EU chemical and chemical-related legislation has had an added value above what could have been achieved through action at a national level? (1= no value, 5= a very high added value)

EU-level legislation adds value to national level action	5
--	---

PAGE 4: Part III - Specific Questions

Q13: For businesses and industry associations - Please select the legislation that regulates or otherwise affects your sector's or your company's activities. For other stakeholders - Please select the legislation you are familiar with.

Classification, labelling and packaging (Regulation No (EC) 1272/2008)
,
Plant protection products (Regulation (EC) No 1107/2009)
,
Biocidal products (Regulation (EU) No 528/2012),
REACH, Annex XIII (Regulation (EC) No 1907/2006)
,
Inland transport of dangerous goods (Directive 2008/68/EC)
,
Chemical Agents (Directive 98/24/EC),
Carcinogens and mutagens at work (Directive 2004/37/EC)
,
Waste framework (Directive 2008/98/EC) and List of Waste
,
Major-accident hazards involving dangerous substances (Seveso) (Directive 2012/18/EU)
,
Water Framework (Directive 2000/60/EC),
Marine Strategy Framework (Directive 2008/56/EC),
Restriction of the use of certain hazardous substances in electrical and electronic equipment (Directive 2011/65/EU)
,
End of life vehicles (Directive 2000/53/EC),
Batteries (Directive 2006/66/EC),
Packaging and Packaging Waste (Directive 94/62/EC)
,
Export and import of hazardous chemicals (Regulation No 649/2012)
,
Persistent organic pollutants (Regulation (EC) 850/2004)
,
EU Ecolabel (Regulation (EC) 66/2010),
Safety of toys (Directive 2009/48/EC),

Cosmetic products (Regulation (EC) No 1223/2009) ,

Medical devices (Directive 93/42/EEC regarding medical devices, Directive 90/385/EEC regarding active implantable medical devices, and Directive 98/79/EC regarding in vitro diagnostic medical devices, under revision)

,

Explosives (Directive 93/15/EEC),

Pressure equipment (Directive 2014/68/EU) ,

Food contact materials (Regulation (EC) No 10/2011 and Regulation (EC) No 450/2009)

,

Test methods (Regulation (EC) No 440/2008) ,

Other (please specify)

Good Manufacturing Practice (for Medical)

PAGE 5: Effectiveness

Q14: In the EU legislative framework for chemicals, risk management measures are, in some cases, determined directly based on the identified hazard using generic risk considerations (e.g. widespread exposure or exposure of vulnerable groups), which justify the automatic adoption of such measures. In other cases, the risk management measures are determined by a specific risk assessment that assesses the probability of adverse health and environmental effects resulting from the specific exposure scenarios associated with the proposed use(s) of the chemical. In your view, do you think EU chemical and chemical-related legislation should, in general:

a. Be more oriented towards specific risk assessments (i.e. differentiate more between chemicals depending on their use despite the possibility of prolonged discussions and implementation delays)

,

If you answered a or b, please explain
The surplus risk assessment becomes load to industries, especially for SMEs. It will be requested that a well-focused risk assessment saves those resources that can give them up to more innovation, such as substitutions.

Q15: In your view, apart from the hazard and/or risk of a chemical substance or mixture, are all relevant considerations taken into account in regulatory decision making on risk management (e.g. whether there will be combined effects of chemicals, whether there are certain vulnerable groups, whether there will be impacts on jobs or on the competitiveness of EU industry, etc.)? Please explain your answer.

No,

If you answered no, please explain which considerations are not (sufficiently) taken into account and, if relevant, explain which legislation you are referring to.
More consideration to regulatory harmonization (especially ISO/IEC standard), double registration (such as REACH and RoHS). In addition, appropriate length of transition period should be linked to scientific evidence, definition and analytical method.
Maintaining the scientific objectivity of specific risk assessments is important. So called generic risk considerations are often based on conjecture and not data.

Q16: In your view, to what extent are the following elements of the overall EU legislative framework for chemicals satisfactory? (1= not satisfactory, 5= very satisfactory)

Transparency of procedures	4	
Speed with which hazards/risks are identified	4	
Speed with which identified risks are addressed	4	
Time to allow duty holders to adapt	2	
Predictability of the outcomes	2	
Stability of the legal framework	2	
Clarity of the legal texts	4	
Guidance documents and implementation support	2	
Effective implementation and enforcement across Member States	3	
Consistent implementation and enforcement across Member States	2	
Public awareness and outreach	4	
International collaboration and harmonisation	2	
Please explain your answers and list any other aspect you consider relevant. If you have specific legislation in mind, please specify it.		Legislative : Highly appreciate for transparency and speed Guidance : Detailed but needs to be more simple to understand (e.g. BPR,CLP) FAQ : Request more transparency in development Regards to BPR, it is required to improve Transition period for active substances if not approved.

Q17: In your view, to what extent are the following elements of risk management satisfactory? (1= not satisfactory, 5= very satisfactory)

Hazard identification criteria	4	
Risk assessment and characterisation	2	
Hazard and risk communication measures to consumers (e.g. labels, pictograms, etc.)	4	
Hazard and risk communication measures to workers (e.g. labels, pictograms, safety data sheets etc.)	4	
Risk management measures restricting or banning the use of chemicals	4	
Risk management measures regulating the safe use of chemicals (e.g. packaging requirements or requirements for the use of personal protective equipment)	4	
If you answered 1, 2 or 3 above and would like to provide further information (in particular on specific pieces of legislation), please explain your answers.		Based on the Better regulation, it would be highly appreciate if there is common understanding to select substance (ex. REACH, RoHS) with authorities and industries. RAC is to be a role model of Risk assessment for other legislatives.

Q18: Safety data for chemicals is subject to quality requirements, notably Good Laboratory Practice (GLP), aimed at ensuring the reliability and reproducibility of the data. Do you consider these requirements to be appropriate?

Yes

PAGE 6: Efficiency

Q19: In your view, what are the most significant benefits generated for EU society by the EU chemical and chemical related legislation? (one or more answers possible)

Reducing the exposure of consumers and of citizens in general to toxic chemicals and, therefore, avoiding healthcare costs, lost productivity, etc.

,

Reducing the exposure of workers to toxic chemicals and, therefore, avoiding healthcare costs, lost productivity, etc.

,

Reducing the damage to the environment and to ecosystems and, therefore, avoiding the costs of treating contaminated water, restoring impacted fisheries, cleaning-up of contaminated land, compensating for reduced crop pollinisation, etc.

Q20: In your view, what are the most significant costs incurred by EU society due to EU chemical and chemical related legislation? (one or more answers possible)

Costs for small and medium sized enterprises

Q21: In your view, do any of the following requirements in the legislative framework lead to significant costs for companies?

Understanding and keeping up-to-date with changes in legal requirements

,

Training staff to ensure compliance with legal requirements

Q22: Are there specific requirements in the EU chemicals legislative framework which lead to particularly significant costs for authorities?

I don't know

PAGE 7: Relevance

Q23: To what extent has the EU legislative framework for chemicals contributed to a reduction in the number and/or use of hazardous chemicals and/or their substitution with safer alternatives? (1= no contribution, 5= a large contribution)

Framework has led to a reduction in the number and/or use of hazardous chemicals and/or their substitution with safer alternatives

3

Q24: To what extent does the existing EU legislative framework sufficiently address emerging areas of concern, e.g. arising from advances in science and technology? (1= emerging areas of concern are not sufficiently addressed, 5 = emerging areas of concern are sufficiently addressed)

Novel areas of concern sufficiently addressed by framework 3

Please comment It is requested to have more communication between authorities and industries, aiming to harmonize legislations with technologies.

PAGE 8: Coherence

Q25: Please indicate the extent to which you agree with the following statements relating to the EU chemicals legislation framework overall

The EU chemicals legislation framework contains gaps and missing links Strongly disagree

The EU chemicals legislation framework has overlaps Agree

The EU chemicals legislation framework is internally inconsistent Agree

Q26: Please indicate any incoherence (gaps or missing links, overlaps, inconsistencies etc.) between the different pieces of legislation which are under the scope of this fitness check. Please only consider aspects related to hazard identification, risk assessment and risk management of chemicals. The legislation covered by this fitness check can be found here.

Gaps or missing links Nothing

Overlaps REACH / RoHS / ELV

Inconsistencies Wording definition in RoHS and ELV

Q27: Please indicate any incoherence (gaps or missing links, overlaps, inconsistencies etc.) between legislation which are covered by this fitness check and any other legislation you consider relevant as regards the regulation and risk management of chemicals.

Double registration in REACH and RoHS

Contradiction situation regarding Animal bioassay in Cosmetic and REACH

PAGE 9: Part IV: Specific questions on the CLP Regulation

Q28: CLP communicates hazards to workers and consumers through various label elements, including danger words, pictograms, hazard statements and precautionary statements. (1= not effective; 5= very effective)

To what extent are CLP labels effective in communicating hazards to workers? 5

To what extent are CLP labels effective in communicating hazards to consumers? 5

Q29: Do the hazard classes in the CLP Regulation cover all relevant hazards?

Environmental	Yes
Physical	Yes
Human health	Yes

Q30: How effective is the support to companies through formal guidance documents and national helpdesks? (1= not effective; 5= very effective)

Guidance documents	2
Helpdesks	2
Industry association guidance and materials	4
Other (training, conferences, etc.)	4
Please add further details as necessary	Highly appropriate for the guidance. More simple and small variation within MS will help us a lot. The response time from national helpdesks is rather slow (at least from some).

Q31: To what extent is CLP enforced in a harmonised manner across Member States?

Enforcement is not harmonised across most Member States

Q32: To what extent are the current elements relating to the CLP classification criteria satisfactory? (1= not satisfactory; 5= very satisfactory)

Ease of implementation for duty holders	3
Appropriateness of classification criteria and methods for substances	4
Appropriateness of classification criteria and methods for mixtures	4
International harmonisation through the Globally Harmonised System (GHS)	1
If you answered 1, 2 or 3 and would like to provide further information, please explain your answer	To alleviate burden on importers and/or exporters, the authorities of the EU should accept GHS classification and labeling at the custom clearances In addition, that the authorities of the EU should take GHS into consideration from ATP (Adaptation to Technical Progress) stage.

Q33: CLP is revised on a regular basis through adaptations to technical progress. Do transitional periods allow sufficient time to implement new or revised classification criteria?

Transition period is sufficient

Q34: To what extent are the current elements of the procedures for harmonised classification & labelling (CLH) satisfactory? (1= not satisfactory; 5= very satisfactory)

Transparency of the procedures	4
Involvement of stakeholders	2
Quality of scientific data and related information	4
Speed of the procedure	5

If you answered 1, 2 or 3 and would like to provide further information, please explain your answers

Based on the Better regulation, JBCE is willing to contribute to more regulative renewal processes.

PAGE 10: Part V: Additional comments

Q35: In case you have any additional comments with relevance for this public consultation, please insert them here.
