On 3 December 2012, Antonio Tajani, Vice-President of the EC in charge of Industry and Entrepreneurship, travelled to London, where he pronounced a speech at the conference entitled "European Space Solutions", an initiative of the European Commission, hosted by the UK Space Agency. Antonio Tajani presented the Global Monitoring for Environment and Security (GMES), the EC's earth observation programme that will create 83 000 jobs in Europe by 2030.

TIME	DESCRIPTION	DURATION
10:00:00	Title	00:00:05
10:00:05	Exterior views of Central Hall Westminster (2 shots)	00:00:09
10:00:14	Arrival of Antonio Tajani, Vice-President of the EC in charge of Industry and Entrepreneurship (3 shots)	00:00:16
10:00:31	Soundbite by Antonio Tajani (in ENGLISH): By 2020 we want 20% of EU GDP to come from Industry. Space is at the centre of this new industrial revolution.	00:00:13
10:00:45	Cutaway of the audience	00:00:05
10:00:50	Soundbite by Antonio Tajani (in ENGLISH): We achieved a key objective of our Galileo programme. Two Galileo satellites were successfully launched from Kourou in French Guyana. We now have four satellites in orbit enabling us to validate the system. Galileo is no longer just a theory. It is a reality.	00:00:21
10:01:11	Soundbite by Antonio Tajani (in ENGLISH): Transport is by far the biggest domain of application of GNSS: about 60% of the market uses Intelligent Transport Systems (ITS) for roads.	00:00:20

10:01:31	Soundbite by Antonio Tajani (in ENGLISH): GMES will have a positive impact on economic growth and job creation. Studies show that the socio-economic benefits exceed four to twelve times the cost.	00:00:13
10:01:45	General view of the press conference	00:00:05
10:01:50	Soundbite by David Willetts, British Minister of State for Universities and Science (in ENGLISH): Initial Galileo services will start at the end of 2014. And so we can really look forward to seeing the exploitation of Galileo adding to our current successes in telecommunications and broadband services from space.	00:00:18
