

## Taking care of the air we breathe (long version)

Type: [Video news release](#) Référence: [I075865](#) Durée: [11:50](#) Lieu: [Italy](#) | [Netherlands](#)

Air pollution – including fine particle emissions – represents a major risk to public health. With the European Commission conducting a major policy review in this area in 2013, reducing air pollution and improving the overall quality of ambient air is a key challenge to which the EU and Europeans are actively responding.
