  1.5 Additional information ...................................................................................... 60
GLOSSARY

**Competent authority** means the central authority of a country participating in the third EU Health programme (participating country) responsible for health or for a specific (public) health topic or any other authority to which that competence has been conferred. A competent authority may also be a regional authority, depending on the governance structure of the participating country.

**Affiliated entities** - Entities affiliated to the nominated competent authority are entities or organisations that have a distinct legal personality but are linked to the nominated competent authority. The two types of affiliation are further detailed under [Annex 3](#), which also describes in detail the concept and modalities of affiliation, as well as the concept of "sole beneficiary". While affiliated entities do not sign the grant agreement, they actively contribute to the implementation of the action and receive co-funding through the nominated competent authority.

"Sole beneficiary" entity may have been legally established specifically for the purpose of the action or the entity may have been created independently of the application. To be eligible under the form of a "sole beneficiary", the competent authority - part of the "sole beneficiary" - must have been nominated before the deadline for submissions. However, the legal establishment of the "sole beneficiary" can be completed at any time until the signature of the proposal. This type of affiliation is further detailed under [Annex 3](#)

**The Work Programme** is the annual work programme adopted by the European Commission to implement the *third Programme of the Union's action in the field of health (2014-2020)* ('the Third Health Programme').

The Consumers, Health, Agriculture and Food Executive Agency (Chafea), manages the technical and financial implementation of the EU Health Programmes, the Consumer Programme, the Promotion of Agriculture Products Programme and the Better Training for Safer Food initiative.

A **beneficiary** is an organisation that receives EU co-funding following successful application in one of the EU's funding programmes and the signature of the related grant agreement (during the application process reference is made to the "applicant(s))".

**A multi-beneficiary grant agreement (MGA)** is a binding written agreement signed by the parties: Chafea (acting under powers delegated to it by the European Commission) and the beneficiary organisations, i.e. the recipients of the EU co-funding. By signing the agreement, the beneficiary organisations accept the grant and agree to implement the action under their responsibility and in accordance with the agreement with all the obligations and conditions that the latter sets out.

**The Participant Portal (PP)** is the website hosting the information about funding for the Third Health Programme and Horizon 2020 programmes and entry point to submit project proposals (electronic proposal submission).

**The EU login** is the European Commission's user Authentication Service (ECAS account). It allows authorised users to access a wide range of Commission web services, using a single email address and password.

**The Beneficiary Register** is the European Commission's online register of the beneficiaries participating in the Health and Consumers Programmes and in Horizon...
2020 programmes. This enables consistent handling of the beneficiaries' official data and avoids multiple requests for the same information.

**The Participant Identification Code (PIC number)** is a 9-digit participant identification code, received upon completing the registration of the entity online.

**The Legal Entity Appointed Representative (LEAR)** is the appointed representative within the beneficiary organisation. He/she is authorized to manage administrative tasks in the online submission system for the organisation and registers the person authorized to sign the grant agreement in the system (LSIGN). The LEAR needs to request the Extended mandate to be able to sign the Third Health Programme actions.

**The National Focal Point (NFP)** is a contact person nominated by the government of the Health Programme participating countries for sharing, disseminating the information and assessing take-up of health programmes of the Union's actions.

Dear Applicant,

this Guide for Applicants (the Guide) is intended to help you in preparing and submitting an application for Joint Actions under the Third Health Programme.

What is a joint action (JA)? It is a collaborative action among countries participating in the Programme to develop, share, refine, test tools, methods and approaches to specific issues, and engage in capacity building in key areas of interest. A Joint Action is co-financed by the European Commission and participating countries. For further information on this specific funding mechanism, please follow this link.

A Joint Action is co-funded through a direct grant procedure, i.e. without open call procedure. It means that the competent authorities taking part in the Joint Action have to be nominated before the start of the proposal preparation.

There are two phases:

1. The nomination phase: each participating country is requested to nominate one competent authority to sign the grant agreement and thus become the direct beneficiary of the grant agreement. This phase starts with this invitation letter and goes until the submission of nominations deadline.

2. The proposal preparation phase: the nominated competent authorities prepare the proposal. This phase starts the day after the deadline of the submissions of nominations.

The JA proposal must be submitted electronically using the electronic submission system of the Participant Portal (PP) of DG Research and Innovation.

This Guide consists of three main parts (Part A, Part B, and Part C):

Part A: Legal framework and participants

This section describes the legal terms and general conditions for participating in the Third Health Programme, in particular through direct grant negotiations with participating countries authorities.

Part B: Submission of proposals

This section describes the entire process of submission of proposals and contains two sub-sections:

The first sub-section refers to the necessary preparatory steps. This includes: (1) reference to the background documents that you need to consult prior to preparing a JA application; (2) instructions on the process for creating the EU login and (3) the registration of the applicant organisation at the European Commission's Beneficiary Register; and (4) general recommendations on how to best prepare your proposal.

The second sub-section guides you through the different steps of the application process itself: it covers the registration process for the participating legal entities; and the actual
submission process itself, namely completing Part A (administrative information and budget) and Part B (technical and financial content).

**Part C: Evaluation process of the applications**

This section describes the evaluation process and criteria when reviewing and evaluating the submitted proposals. It also provides information on the evaluation outcomes issues, as well as the process following a recommendation for funding.

This Guide does not supersede the rules and conditions laid out in the following documents which should be consulted in case of doubt:

- Commission Implementing Decision published on 13 December 2017 on the adopting the 2018 annual work programme for implementation of the programme of Union's action in the field of health (2014-2020), including budgetary implications and funding criteria for grant, hereafter, referred to in this document as the Work Programme 2018;

- The multi-beneficiary action model grant agreement, hereafter, referred to as the *Model grant agreement (MGA).*

In case of further questions the following options are at your disposal:

- The *Frequently Asked Questions (FAQs)*;
The National Focal Points (NFP) – you can contact your NFP for further assistance.

For information on how to register or related enquiries, please consult on the Participant Portal (PP) H 2020 Manual:

- For IT related issues – you can contact the Participant Portal IT Helpdesk for questions related to the online submission tool;

- For non-IT related questions, general questions related to the Health programme can be submitted via the Chafea Helpdesk available at: CHAFEA-HP-JA@ec.europa.eu. The helpdesk is unavailable on weekends and public holidays.

Please ensure you have exhausted all the options before contacting the Chafea Helpdesk.

This Guide is updated annually on the basis of suggestions to make it as user-friendly as possible. Should you have any suggestions or comments on how to improve this Guide for next year's call, please send us an email to CHAFEA-HP-JA@ec.europa.eu.

Finally, please be aware that submitting your application can take some time even if you have all the necessary information ready at hand. Do not wait until the deadline to start the online submission process. We strongly advise you to complete your proposal sufficiently in advance so as to avoid any last minute problems. It is the JA Coordinator's/ applicant's responsibility to have the entire proposal uploaded and accepted by the electronic submission system of the participant portal before the deadline of the Call.

Chafea Health Unit Team
A. LEGAL FRAMEWORK AND PARTICIPANTS

1 OBJECTIVES OF THE HEALTH PROGRAMME AND THE WORK PROGRAMME 2018

The third Programme of the Union's action in the field of health (2014-2020) supports and adds value to the policies of Member States aimed at improving people’s health and reducing health inequalities by promoting health, encouraging innovation in health, increasing the sustainability of healthcare systems and protecting Union citizens from serious cross-border health threats.

Moreover, the Work Programme 2018 is in line with the first priority of the Juncker Commission for the EU which is about boosting Jobs, Growth and Investment, namely getting people back to work and getting Europe growing again.

Focusing on the key issues in terms of bringing added value and making a positive impact on delivering mutual benefits across the European Union, the EU Health Programme is built around the following four objectives:

1. Promoting health, preventing diseases and fostering supportive environments for healthy lifestyles taking into account the 'health in all policies' principle;
2. Protecting Union citizens from serious cross-border health threats;
3. Contributing to innovative, efficient and sustainable health systems, and
4. Facilitating access to better and safer healthcare for Union citizens.

The Third Health Programme is implemented through annual Work Programmes which set out the priorities for actions to implement its objectives (Annex I). Therefore, the proposal must correspond to the objectives and expected results described in the priority areas.

2 EU FINANCIAL CONTRIBUTION TO A JOINT ACTION

EU co-financing for Joint Actions (JA) is calculated on the basis of actual eligible costs incurred by the beneficiaries signing the grant agreement. The maximum rate of EU co-financing is 60%. However, this may be up to 80% in cases of exceptional utility. Assessment of exceptional utility will be carried out according to the criteria indicated in Annex I of the Work Programme 2018, point 4. Criteria for the exceptional utility of actions co-financed with Member State authorities. Chafea will determine in each individual case the maximum percentage to be awarded.

Given the complementary and motivational nature of EU grants, JAs are financed under the shared cost principle(2). If the amount granted is lower than the funding sought by the applicant, it is up to the latter to find supplementary financing or to cut down on the total cost of the JAs without diluting either the objectives or the content.

3 ELIGIBLE APPLICANTS

JA are, according to Article.7 2(a) of the Regulation for the Third Health Programme 2014-2020, ‘actions having a clear Union added value co-financed by the competent

---

2 Art. 125 FR 183 of RAP.
According to Article 8(1) of the Health Programme Regulation, the grants for actions referred to under Article 7(2)(a) may be awarded to legally established organisations, public authorities, public sector bodies, in particular research and health institutions, universities and higher education establishments.

According to Article 190(1)(d) of the Rules of Application of the Financial Regulation EU 2015/2462 Joint Actions (JA) are, according to Article 7 2(a) of the Regulation for the Third Health Programme 2014-2020, ‘actions having a clear Union added value co-financed by the competent authorities of Member States responsible for Health or by public sector bodies and non-governmental organisations, acting individually or as a network, mandated by these competent authorities.’

The competent authorities manage and carry out the JA together with the coordinator (lead competent authority for the joint action) contributing with their own funding and ensuring the attainment of the joint action objectives.

The competent ministry/government organisation shall by way of an official notification, duly signed by an authorised representative, confirm that the participating entity is a competent authority and is the eligible body to participate on behalf of the respective Member State/regional entity and under its responsibility in the relevant action.

The following main elements are especially put to the attention of applicants:

- The EU Member States and third countries participating to the Health programme were invited on 9 March 2018 to nominate/designate the competent authorities that would participate in the joint action 2018.

- The deadline for nomination of competent authorities was 13 April 2018.

The competent authorities must be established from the 28 Member States of the European Union or from EFTA/EEA countries (Iceland, Norway) on the basis of the Agreement on the European Economic Area.

Other third countries, in particular European neighbourhood policy countries, countries that are applying for, are candidates for, or are acceding to membership of the EU, and the western Balkan countries included in the stabilisation and association process, may participate in the programme by means of a Memorandum of Understanding. Under this provision Bosnia and Herzegovina, Moldova and Serbia are eligible for funding under the 2018 work programme.

In accordance with recital 23 of the Health Programme, collaboration should be facilitated with third countries not participating in the programme. This should not involve funding from the programme. Nevertheless, travel and subsistence expenses for experts invited from or travelling to such countries can be considered eligible costs in duly justified, exceptional cases, where this directly contributes to the objectives of the programme. The role of an organisation from a third country not participating in the
Health Programme is described in this guide under the paragraph 2.2.14 on "Collaborating Stakeholders".

**Note:**
For British applicants and partners: Please be aware that eligibility criteria must be complied with for the entire duration of the grant. If the United Kingdom withdraws from the EU during the grant period without concluding an agreement with the EU ensuring in particular that British applicants continue to be eligible, you will cease to receive EU funding (while continuing, where possible, to participate) or be required to leave the project on the basis of Article 34.3. of the Grant Agreement.

### 4 Role and responsibility of beneficiaries

**Roles and responsibilities towards Chafea**

Once the grant agreement is signed between the applicants and Chafea, the status of the applicant is changed from "applicant" to "beneficiary".

The beneficiaries have full responsibility for implementing the action and complying with the provisions of the Multi-beneficiary Grant Agreement (MGA).

**Note:** The beneficiaries are jointly and severally liable for the technical implementation of the action as described in the proposal under Part B, which becomes "Annex 1" to the grant agreement.

If a beneficiary fails to implement its part of the action, the other beneficiaries become responsible for implementing this part (without being entitled to any additional EU funding for doing so), unless Chafea expressly relieves them of this obligation.

Different actors can be involved in a JA; their categories are as follows:

- **The Coordinator**

  The Coordinator must:
  
  - Monitor that the action is implemented properly (see Article 7 of the MGA);
  
  - Act as the intermediary for all communications between the beneficiaries and Chafea (in particular, providing the Agency with the information described in Article 12 of the MGA), unless the MGA specifies otherwise;
  
  - Provide a pre-financing guarantee if requested by Chafea (see Article 16.2 of the MGA);
  
  - Request and review any documents or information required by the Agency and verify their completeness and correctness before passing them on to the Agency;
• Submit the deliverables and reports to the Executive Agency (see Article 19 of the MGA);

• Ensure that all payments are made to the other beneficiaries without unjustified delay (see Article 16 of the MGA);

• Inform the Agency of the amounts paid to each beneficiary, when required in the MGA (see Articles 28 and 34) or requested by the Executive Agency, or in the context of ex post Audits.

**Note:**
The Coordinator may not delegate the above-mentioned tasks to any other beneficiary or subcontract them to any third party.

➢ **Other beneficiaries**

Beneficiaries are the competent authorities nominated by the participating countries. They must:

• Keep information stored in the Beneficiary Register (in the electronic exchange system) up to date (see Article 12 of the MGA);

• Inform the Coordinator immediately of any events or circumstances likely to affect significantly or delay the implementation of the action (see Article 12 of the MGA);

• Submit to the Coordinator in good time:
  
  o Individual financial statements for itself and its affiliated entities (if applicable) and, if required, certificates on the financial statements (see Article 15 of the MGA);
  
  o The data needed to draw up all requested reports under Article 15 of the MGA;
  
  o If applicable, ethics committee opinions and notifications or authorisations for activities raising ethical issues;
  
  o Any other document(s) or information required by the Executive Agency or the Commission under the MGA, unless the MGA requires the beneficiary to submit this information directly to the Agency or the Commission.

➢ **Affiliated entities**

Entities affiliated to a beneficiary are:

• (a) According to article 122 of the Financial Regulation entities that satisfy the eligibility criteria, that do not fall within one of the situations referred to in Article 131(4) and that have a structural link with the single beneficiary, in particular a legal or capital link, which is neither limited to the action nor established for the sole purpose of its implementation;
The specific cases of **affiliated entities in the public sphere**: they are public owned entities and public bodies (entities established as such under national, European or international law) are not always considered as affiliated entities (e.g. Executive Agencies, National Research Centres). The notion of affiliated entities in the public sphere covers, the different levels of the administrative structure in case of **decentralised administration** (e.g. National, regional or local ministries in case of separate legal entities can be considered as affiliated to the State to avoid interference with the various institutional set-ups in the different Member States) and a **public body established by a public authority** to serve an administrative purpose and which is supervised by the public authority. (e.g. national institutes or schools for public health or national research centres are affiliated to the state).

- (b) Affiliated entities forming a "**sole beneficiary** as a single entity" (i.e. where an entity is formed of several entities that satisfy the criteria for being awarded a grant, including where the entity is specifically established for the purpose of implementing an action to be financed by a grant).

Article 122.1 of the Financial Regulation introduced the concept of "sole beneficiary": "Where several entities satisfy the criteria for being awarded a grant and together form one entity, that entity may be treated as the "sole beneficiary", including where the entity is specifically established for the purpose of implementing the action to be financed by the grant".

The competent authority, acting as leader of or affiliated to the "sole beneficiary", must have been nominated by the participating country. The leader of the "sole beneficiary", which is the entity that will sign the grant agreement, must comply with the exclusion, eligibility and selection criteria. The entities affiliated to the "sole beneficiary" must comply only with the exclusion criteria and sign a declaration of honour.

The "sole beneficiary" may be legally established **specifically for the purpose of the action**. The "sole beneficiary" does not need to have a distinct legal personality. The affiliated entities forming the "sole beneficiary" should establish as appropriate internal arrangements setting out the functioning of the "sole beneficiary" and the role each one. This internal arrangement may take the form of an internal co-operation agreement (national consortium agreement). To be eligible under the form of a "sole beneficiary", the competent authority – whether as leader of or affiliated to the "sole beneficiary" must have been nominated before the deadline for submission of nominations.

The affiliated entities legal/ or capital link should be assessed and approved by Chafea legal services.

Affiliated entities need to sign the Declaration of Honour and be registered in the Participant portal, with a Participant Identification Code (PIC) per entity to be linked as a third party to the beneficiary.

Please also refer to Article 122 of the **Financial Regulation** (EU, Euratom) No 966/2012.
➢ Collaborating stakeholders

- The collaborating stakeholders may significantly increase the technical and scientific content of the JA, as well as its relevance for different users in the Union.

- They have no contractual relationship with Chafea, nor do they receive any EU funding.

- Note that it is not mandatory to involve collaborating stakeholders' entities in the JA. Collaborating stakeholders can play an important role in bringing technical expertise to the JA and in promoting and disseminating the policy results within the MS.

➢ Subcontractor(s):

- Subcontractors are not part of the grant agreement. They do not have a contractual relationship with Chafea.

- If necessary to implement the action, the beneficiaries may award subcontracts covering the implementation of certain action tasks as described in the proposal, (the latter will become Annex 1 to the grant agreement, if the JA is selected for co-funding). The subcontracting cost must be set out in the budgetary annex (please also see Article 10 of the MGA)

Note:
Subcontracting may cover only a limited part of the JA activities.

- The beneficiaries must award the subcontracts ensuring the best value for money or, if appropriate, the lowest price. In doing so, they must avoid any conflict of interests (see Article 20 of the MGA).

Number of participants in the JA

The number of participants will be based on the nominations of the participating countries during the preparation phase of the JA (i.e. that is before the closing date of the nomination/ designation of an organisation by the MS).

5 Financial aspects

Applicants need to conform to the principles and rules as set out by the EU Financial Regulation, i.e. the financial rules applicable to the general budget of the Union and the related rules of application of the financial regulation.

5.1 General principles of EU co-funding

Grants awarded under the EU Health programme must comply with the following principles:
• Non-cumulative award³

An action may only receive one grant from the EU budget. In no circumstances shall the same costs be financed twice by the Union budget. To ensure this, applicants shall indicate the sources and amounts of Union funding received or applied for the same action or part of the action or for its functioning during the same financial year as well as any other funding received or applied for the same action.

• Non-retroactivity⁴

No grant may be awarded retrospectively for actions already completed.

A grant may be awarded for an action, which has already begun only where the applicant can demonstrate the need to start the action before the grant agreement is signed.

In such cases, costs eligible for financing may not have been incurred prior to the date of submission of the grant application.

• Co-financing⁵

Co-financing means that the resources, which are necessary to carry out the action, may not be entirely provided by the EU grant.

Co-financing of the action may take the form of:

- the beneficiary's own resources,
- income generated by the action,
- financial contributions from third parties.

• No-profit principle

Grants shall not have the purpose or effect of producing profit. Profit is defined as surplus of the receipts over eligible costs incurred by the beneficiary at the time of payment request.

5.2 Planning the budget of the action

5.2.1 Form of the grant

The grant is a partial reimbursement of the action's total actual eligible costs at the reimbursement rate defined under point A.2 "EU Financial Contribution". The grant is, therefore, expressed both as a maximum amount and also as a pre-defined percentage of the eligible costs.

In other words, the grant has double ceiling: the maximum amount and the reimbursement rate applied on the total eligible cost. These key data will be set in the grant agreement, please refer to Article 5 of the MGA.

³ Article 129 FR).
⁴ Article 130 FR.
⁵ Article 125 (3) FR, Article 183 RAP
5.2.2 Definition of eligible costs

Eligible costs must meet the following cumulative criteria:

- they must be actually incurred by the beneficiary;
- they must be incurred within the period of the action set in the grant agreement;
- they must be indicated in the estimated budget;
- they must be incurred in connection with the action and necessary for its implementation;
- they must be identifiable and verifiable, in particular recorded in the beneficiary’s accounts in accordance with the accounting standards applicable in the country where the beneficiary is established and with the beneficiary’s usual cost accounting practices;
- they must comply with the applicable national law on taxes, labour and social security, and
- they must be reasonable, justified and must comply with the principle of sound financial management, in particular regarding economy and efficiency.

5.2.3 Description of cost types

Costs of the action must be established in the following cost categories – please also consult with Article 6.2 of the MGA for detailed description.

Note:
Costs of affiliated entities must be also estimated by the applicant they are linked to. Please also refer to Article 14 of the MGA.

Personnel costs

Personnel costs are related to personnel working for the beneficiary under an employment contract (or equivalent appointing act) and assigned to the action.

In addition, the following costs can also be recognised as personnel costs:

- The costs for natural persons working under a direct contract with the beneficiary other than an employment contract, if certain conditions apply;
- Cost of personnel seconded by a third party against payment, as defined under article 5.2 of the grant agreement.

In line with the Financial Regulation the salary costs of public officials will be considered as direct cost of the beneficiary to the extent that they relate to the cost of activities which the relevant public authority as beneficiary would not carry out if the JA concerned was not undertaken.
Cost of Subcontracting

Direct costs of subcontracting (including related duties, taxes and charges such as non-deductible value added tax (VAT) paid by the beneficiaries (including affiliated entities) that are not public bodies acting as public authority are eligible if the conditions of Article 10.1.1 of the MGA are met:

Subcontracting costs:

- If necessary to implement the action, the beneficiaries may award subcontracts covering the implementation of certain action tasks. The tasks to be implemented and the estimated cost for each subcontract must be set out in in the Technical Proposal of Part B of the application and the total estimated costs of subcontracting per beneficiary must be set out in the detailed budget;

- Must be justified having regard to the nature of the action and what is necessary for its implementation;

- Subcontracting may cover only a limited part of the action;

- Must be clearly stated in the proposal and be listed in the budgetary annex (please also see Article 10 of the MGA);

- The beneficiaries must award the subcontracts ensuring the best value for money or, if appropriate, the lowest price. In doing so, they must avoid any conflict of interests.

For public bodies: entities acting in their capacity of contracting authorities in the meaning of Directive 2014/24/EU or contracting entities in the meaning of Directive 2014/23/EU shall abide by the applicable national public procurement rules.

Other direct costs

The following cost types may also be included in eligible costs:

a) Travel costs and related subsistence allowances are eligible if they are in line with the beneficiary’s usual practices on travel.

b) Equipment - portion of the costs that will be taken into account is that which corresponds to the duration of the action and rate of actual use for the purposes of the action. The depreciation costs of equipment, infrastructure or other assets (new or second-hand) as recorded in the beneficiary’s accounts are eligible, if they were purchased in accordance with Article 9.1 of the MGA (Rules for purchasing goods, works or services). The costs of renting or leasing equipment, infrastructure or other assets are also eligible, if they do not exceed the depreciation costs of similar equipment, infrastructure or assets and do not include any financing fees.

c) Costs of other goods and services are eligible, if they are purchased specifically for the action.

The beneficiaries must make such purchases ensuring the best value for money or, if appropriate, the lowest price. In doing so, they must avoid any conflict of interests.
**Indirect costs**

Indirect costs are eligible if they are declared *on the basis of the flat-rate of 7% of the total eligible direct costs.*

### 5.2.4 Exchange rate

The budget of the grant agreement and financial statements must be drafted in Euro.

Beneficiaries with accounting established in a currency other than the euro must convert costs incurred in another currency into euro at the average of the daily exchange rates published in the C series of the Official Journal of the European Union, calculated over the corresponding reporting period.

If no daily euro exchange rate is published in the Official Journal of the European Union for the currency in question, it must be converted at the average of the monthly accounting rates published on the Commission’s website, calculated over the corresponding reporting period.

Beneficiaries with accounting established in euro must convert costs incurred in another currency into euro according to their usual accounting practices.

### 5.2.5 VAT

VAT is accepted as eligible costs if it is not recoverable. VAT is considered as not recoverable, if according to national law it is attributable to any of the following activities:

- Exempt activities without the right of deduction;
- Activities which fall outside the scope of VAT.

### 5.2.6 Definition of non-eligible costs

‘Ineligible costs’ are:

- Costs that do not comply with the conditions set out above in particular:
  - costs related to return on capital;
  - debt and debt service charges;
  - provisions for future losses or debts;
  - interest owed;
  - doubtful debts;
  - currency exchange losses;
  - bank costs charged by the beneficiary’s bank for transfers from Chafea;
  - excessive or reckless expenditure;
  - deductible VAT;
  - costs incurred during suspension of the implementation of the action;
  - in kind contributions provided by third parties free of charge.

- Costs declared under another EU or Euratom grant (including grants awarded by a Member State and financed by the EU or Euratom budget and grants awarded by bodies other than the Agency for the purpose of implementing the EU or Euratom budget).
– Costs for staff of a national (or local) administration, for activities that are part of the administration’s normal activities (i.e. not undertaken only because of the grant).

– Costs (especially travel and subsistence costs) for staff or representatives of EU institutions, bodies or agencies.

5.3 Determination of the grant

5.3.1 Calculation the grant amount

The ‘final grant amount’ depends on the actual extent to which the action is implemented and costs related to the implementation of the action.

The final grant amount will be calculated by the Executive Agency when the payment of the balance is made in the following steps:

Step 1 The Agency evaluates the implementation of the action and the actual costs related to the implementation declared by the beneficiaries. The reimbursement rate of the grant agreement is applied to the approved eligible costs.

Step 2 Application of the double ceiling: the amount obtained following Step 1 is compared to the maximum grant amount set out in the grant agreement. The final grant amount will be limited to the lower amount.

Step 3 Application of no-profit principle. ‘Profit’ is generated when the amount obtained following Steps 1 and 2, plus the action’s total receipts, exceeds the action’s total eligible costs.

Step 4 Reduction of the grant amount due to improper implementation or breach of other obligations.

If there is a profit, it will be deducted from the amount obtained following Steps 1 and 2.

For further details, please also consult with Article 5.3 of the MGA.

5.3.2 Type of receipts

The following are considered receipts:

– Income generated by the action: if the income is generated from selling equipment or other assets purchased under the Agreement, the receipt is up to the amount declared as eligible under the Agreement;

– Financial contributions given by third parties to the beneficiary specifically to be used to cover the action's eligible costs.

Please consult Article 5.3.3 of the MGA.

5.4 Payment Scheme

Payments will be made to the Coordinator. The Coordinator must distribute the payments between the beneficiaries without unjustified delay.

The following payments will be made to the Coordinator:
- **One pre-financing payment:**

  The aim of the pre-financing is to provide the beneficiaries with a float. It remains the property of the EU until the payment of the balance.

  **Note:**
  Pre-financing payments will be only distributed by the Coordinator when at least 90% of the beneficiaries signed the accession form and only to those beneficiaries who signed the form! Please refer to Article 16.7 of the grant agreement.

- **One or more interim payments, on the basis of the request(s) for interim payment:**

  Interim payments *reimburse the actual eligible costs* incurred and declared by the beneficiaries for the implementation of the action during the corresponding reporting periods.

  The number of interim payments will be set in the grant agreement. Interim payments are subject to the approval of the periodic report with the corresponding deliverables, the completion of the Health Programme indicators questionnaire, and the declaration of actual costs incurred by the beneficiaries.

  The maximum amount of the interim payments (including the amount of pre-financing) is limited to the 90% of the maximum grant amount as set out in Article 5.1 of the grant agreement.

- **One payment of the balance, on the basis of the request for payment of the balance:**

  The payment of the balance reimburses the remaining part of the eligible costs incurred by the beneficiaries for the implementation of the action. The amount due as the balance is calculated by the Agency by deducting the total amount of pre-financing and interim payments (if any) already made, from the final grant amount.

  If the total amount of earlier payments is greater than the final grant amount, the payment of the balance takes the form of a recovery.

  If the total amount of earlier payments is lower than the final grant amount, the Agency will pay the balance.

  Payment is subject to the approval of the final report, its deliverables and the completion of the Health Programme indicators questionnaire.

**5.5 Pre-financing guarantee**

In the event that the applicant's financial viability is not satisfactory, a pre-financing guarantee for up to the same amount as the pre-financing may be requested in order to limit the financial risks linked to the pre-financing payment.

The financial guarantee, in EUR, shall be provided by an approved bank or financial institution or any other third party whose financial capacity is verified by the Agency - established in one of the Member State of the European Union. Amounts blocked in bank accounts shall not be accepted as financial guarantees.
The guarantee may be replaced by a joint and several guarantee by a third party or by a joint guarantee of the beneficiaries of an action who are parties to the same grant agreement.

The guarantee shall be released as the pre-financing is gradually cleared against interim payments or payments of balances to the beneficiary, in accordance with the conditions laid down in the grant agreement.

No financial guarantee will be requested if the EU contribution is EUR ≤ 60 000 (low value grants).
**B. SUBMISSION OF PROPOSALS**

There are several steps to follow for the submission of the JA proposal.

The first step is the nomination of Competent Authorities and/or other designated entities by participating countries.

After the nomination process, Chafea sent an invitation letter to the nominated competent authorities to the preparatory meeting planned for **15 June 2018 in Luxembourg**. The aim of this preparatory meeting is to support the nominated authorities in the preparation of a JA draft proposal. Most importantly, this is also the day when the JA Coordinator should be identified, who, in turn, will be responsible for preparing the proposal and submit it onto the Participant Portal (PP).

| The NEW deadline for submission of the proposal is **27 September 2018 at 17:00 (CET)** and must be done by the JA Coordinator via the electronic submission system of the Participant Portal. |

Information on how to submit proposals can be consulted following the [H2020 Online Manual](#).

The online submission of proposals requires a good level of preparation. Even though the online system enables you to save successive versions of your application, Chafea strongly encourages the JA Coordinator and the consortium to have fully prepared the proposal before starting the online submission process and not view it as a "do-it-as-you-go" process.

Also note that the online submission system is composed of a two-step process:

a) Registration of the applicant organisations using the Participant identification code (PIC) by REA (Research Executive Agency – REA).

b) Submission of the proposal broken down into three parts as follows:

- **Part A** is the administrative information of the applicant organisations (Coordinator and partners or co-beneficiaries) and the summarized budget of the proposal, which needs to be completed directly online. It comprises fields to be completed with information, checklists and declarations by the JA Coordinator.

Note:

In order to complete **Part A**:
- All partners (i.e. main beneficiary and co-beneficiaries but not subcontractors or collaborating stakeholders) must be registered in the [Beneficiary Register](#) and communicate the PIC to the JA Coordinator;
- In case of affiliated entities declared and accepted by Chafea, they must be registered in the [Beneficiary Register](#) and communicate their PIC to the competent authority and JA Coordinator;
- All partners (main beneficiary and co-beneficiaries) with more than 375.000€ EU contribution must perform a [financial viability self-check](#);
- The JA Coordinator must have the budget prepared per partner in the JA.

- **Part B** is the technical content of the proposal. This part must be prepared by the JA Coordinator, following the template/guide provided by Chafea and in
collaboration with the WP leaders and partners (as co-beneficiaries). Once completed it is for the JA Coordinator to upload on the PP. **Annex** is the set of necessary document to support evidence for checking the applicant organisation's compliance with the selection criteria. The annex must be uploaded into the electronic submission system.

1 **PREPARING FOR THE SUBMISSION OF YOUR APPLICATION**

There are several stages to observe for the Coordinator when preparing for the submission of the application, such as documents to consult (see below); signing up into the existing EU login or creating a new EU login for new users; and registering the organisation in the Beneficiary Register, if that had not yet been done. This includes the submission of the supporting documents for assessment of the affiliated entities or sole beneficiaries' status by the Chafea legal services, before the final submission.

1.1 **Documents to consult**

Prior to taking the decision of submitting a proposal and filling in the different application forms, please verify whether all organisations comply with the eligibility criteria.

For this, the very first step is to go through the relevant documentation in detail. In this respect, the key documents to consult are the following:

- The Third Health Programme 2014-2020,
- The Annual Work Programme 2018,
- The multi-beneficiary model grant agreement (MGA).

1.2 **Creating a user account on the Participant Portal – EU login**

Applications for JAs are only possible via the electronic submission system of the Participant Portal.
You can see in the screen shot above that the homepage refers to registered and non-registered users:

- If you do not already have a user account for the Participant Portal, you simply click on 'REGISTER' (in the upper right corner next to 'LOGIN') and register online.
- If you already have a user account for the Participant Portal, you can log in (click on 'LOGIN' in the upper right corner) and start entering the required information.

1.3 Register your organisation - Beneficiary Register

With the EU login at hand, you can proceed to the next step, which is to register your organisation; this is done through the European Commission’s Beneficiary Register:

- The European Commission has an online register of the organisations participating in various EU programmes called the Beneficiary Register. This allows consistent handling of different organisations’ official data and avoids multiple requests of the same information. However, check first on the Beneficiary Register page if your organisation is already registered.
- If you do not find your organisation there, and only in this case, you should start the registration process by clicking on 'Register your organisation'.

- To complete this registration process, you will need to provide information about your entity legal status and its finances.

- You do not need to complete the registration process in a single session. You can enter some information, save it and continue later on the My Organisations page of the "My Area" section. Incomplete draft registrations are automatically deleted after one year.

- Once your registration is finalised, you will receive a 9-digit Participant Identification Code (PIC number). You will need the PIC numbers of the Coordinator and all other beneficiaries (i.e. not for subcontractors, collaborating stakeholders and affiliated entities) in order to complete part A of the application.

- The person who registers the organisation, called 'self-registrant', can submit updates and corrections (with corresponding supporting documents) on the My Organisations page of the My Area section.
Please note that in case if the registered organisation receives EU funding, the 'self-registrant' will be replaced by the appointed representative LEAR (Legal Entity Appointed Representative). This person will then be the only person able to provide further updates. The LEAR should request to REA the validation of the extended mandate for the Third Health Programme.

1.4 Deadline, acknowledgement of receipt, rejection of an application and complaints

- **Submission deadline**

The proposals **must** be submitted via the Participant Portal.

The NEW deadline for submission is 27 September **2018**, 17:00 CET.

| Please use only the electronic submission system of the Participant Portal! Any proposals sent by surface mail or email to Chafea will be rejected. |

- **Acknowledgement of receipt**

Before the deadline, the applicant or the JA Coordinator may replace the proposal with a new proposal. The date and time of the submission of the application will be automatically recorded and an acknowledgement of receipt email will be sent to the applicant (the JA Coordinator) organisation.

If you (the JA Coordinator) do not receive an email with the acknowledgement of receipt, it is because the proposal has not been submitted. If you miss the deadline, your proposal will be disregarded by the system and cannot and will not be considered as submitted. After the deadline, changes or additions are no longer possible.

- **Rejection of proposals**

IMPORTANT TO NOTE: **it is extremely important that the JA Coordinator uploads the proper document (in PDF) under the corresponding heading as you may jeopardize your entire application and it will then be considered as inadmissible.**

Hence, before closing the application procedure or logging of, double-check if the content of your PDF documents matches the given headings in the online submission tool.

| It is the JA Coordinator's responsibility to upload the proper documents. |

Once the proposal is submitted, the applicant will not hear from Chafea until the proposal is evaluated, unless:

- Chafea needs to contact the applicant to clarify matters such as eligibility or to request additional information;
- More information or supporting documents are needed to establish the legal entity or to perform the financial viability check; and / or
- The applicant made a complaint.

Note: this check **is not performed by Chafea. The system may contact you about this, if needed, not Chafea.**
Languages

In principle, proposals may be submitted in any official language of the European Union. However, in order to facilitate the evaluation process, an English translation of the proposal should be provided. The English version should be at the beginning of the proposal, followed by the version prepared in the other language.

How to file a complaint

If you believe that submission failed due to a fault in the electronic submission system, you should immediately file a complaint via the Helpdesk on the Participant Portal, explaining the circumstances and attaching a copy of the proposal. The method of filing a complaint over other aspects of submission is explained in the information you receive via the electronic exchange system (see ‘My Area’ section of the Participant Portal).

Note:
Chafea does not manage the submission process via the electronic submission system of the PP. Hence, please contact the Helpdesk of the Participant Portal and not Chafea for submission related questions or consult the H2020 Online Manual.

1.5 Data protection

The reply to any call for proposals involves the recording and processing of personal data (such as name, address and CV). Such data will be processed pursuant to Regulation (EC) No 45/2001 on the protection of individuals with regard to the processing of personal data by EU institutions and bodies and on the free movement of such data. Unless indicated otherwise, the questions and any personal data requested are required to evaluate the application in accordance with the specifications of the call for proposal will be processed solely for that purpose by the Executive Agency / the Commission. Details concerning the processing of personal data are available on the privacy statement at the participants’ portal:

The Service Specific Privacy Statement on "Grant Management" explains the reasons for the collection and processing of your personal data, the way your personal data are protected and what rights you may exercise in relation to your data (the right to access, rectify, block etc.).

Applicants are invited to check this website at regular intervals so as to be duly informed on possible updates that may occur by the deadline for submission of their proposals. Personal data may be registered in the Early Detection and Exclusion System (EDES),

---

7 Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data. This Regulation is soon to be repealed and replaced by a new Regulation ((COM (2017) 8: Proposal for a Regulation of the European Parliament and of the Council on the protection of individuals with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC).

established and managed by the European Commission; the new system replaced the Early Warning System and the Central Exclusion Database as of 1 January 2016. The purpose of the EDES is the protection of the Union's financial interests against unreliable economic operators. This is ensured via the following two components:

- Early detection of risks threatening the Union Financial Interests via the inclusion of relevant markings (in case of suspicion or presumption);
- Exclusion of entities/ natural persons, imposition of financial penalties (administrative sanctions) in case of situations provided for by the law.

Situations that may give rise to an Early Detection/Exclusion are provided for in Article 108 (2) and Article 106 of the Financial Regulation respectively. An economic operator can only be subject to early detection/exclusion following his/her notification by the responsible service.

The EDES shall comply with Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data. Privacy statement for the EDES database is available under the following link: http://ec.europa.eu/budget/library/explained/management/protection/privacy_statement_eedes_en.pdf

For more information on data protection, please refer to the relevant page at Chafea website:
http://ec.europa.eu/chafea/about/data_protection.html

1.6 General guidance before drafting your proposal

The Executive Agency advises you to consider the following aspects before embarking in the drafting of a proposal:

Completeness and technical quality:

- Check that the intended proposal includes all relevant information.
- Follow closely the format of the template of Part B and ensure that all the requested information is incorporated.
- Please avoid mixing quality with quantity: good proposals are clearly drafted and are easy to understand and follow; they are precise and concise, focusing on substance, describing how the proposed action will be developed in a logic way, avoiding repetition.
- The page limit for Part B of your proposal is 100 pages for the technical part and one page per partner/beneficiary in the budget section.

Management quality:

- Clearly indicate the ability for high-quality management adapted to the scope of the intended activities of the organisation.
- Good financial management is a key component of management quality and adequacy between activities and requested budget is important.

Orientation towards results and impact:

- Good proposals clearly show the results that will be achieved, and how the participants intend to disseminate and/or foster the take-up by the EU MS of the results.
- It provides clear indication of **sustainability**.
- In addition, good proposals include a sound and credible **evaluation plan**, not only focusing on process evaluation, but looking in particular at **outcomes**.
2 APPLICATION FOR A JOINT ACTION

Please note that standard grant agreement templates of Chafea are currently under revision due to the entry into force of the new Financial Regulation and its Rules of Application in 2018. For this reason the draft grant agreements related to this call are published as an example and consequently the Agency reserves the right to introduce changes or additional details subject to the adoption of the final text of the Financial Regulation and Rules of Application. In this case the Agency will announce the changes as soon as possible and at the latest before the signature of the grant agreements.

The JA application is composed of three parts:

- **Part A**, which includes the administrative information;
- **Part B**, which is the technical content of the proposal (which then becomes Annex 1 of the MGA); and
- **Annex**, which concerns a document to be uploaded in support of compliance with the selection criteria.

2.1 JA application form: Part A – Administrative part of the applicant organisations

Part A comprises of fields of required information, checklists and declarations to be filled and must be completed within the electronic submission system on the Participant Portal.

It is structured in three sections, as follows:

- Section 1: General information
- Section 2: Administrative data of the organisation
- Section 3: Budget

<table>
<thead>
<tr>
<th>Section</th>
<th>Title</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>General Information</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Participants and Contacts</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Budget</td>
<td></td>
</tr>
</tbody>
</table>

**Section 1: General information**

In this section, you should provide the Acronym, Proposal Title, Duration (in months), Free Keywords and an Abstract (max. 2000 characters) explaining the objectives of the proposal, how these will be achieved, and their relevance to the 2018 Annual Work Programme of the Third EU Health Programme (2014-2020).
The abstract will be used as a short description of the proposal in the evaluation process and in communication with the programme management committee and other interested parties. Therefore, do not include any confidential information, use plain typed text, avoiding formulae and other special characters.

In the "Declarations" section, there are also a number of self-declarations to be made by the Coordinator by clicking the corresponding boxes. We recommend that the Coordinator checks with all the partners before clicking the boxes.

The Coordinator declares:

a) to have explicit consent of all applicants on their participation and on the content of the proposal;

b) that the information in the proposal is correct and complete;

c) that the proposal complies with ethical principles.

The next statements concern the exclusion, eligibility and selection criteria as set-out in the Work Programme.

The Coordinator must make the following declarations:

a) For the exclusion and eligibility criteria: each applicant is fully compliant with the exclusion and eligibility criteria set out in the Annual Work programme.

Note:
The applicant and affiliated entities will be required to sign the declaration of honour (DoH) in order to comply with the exclusion criteria. The signed DoH of the affiliated entities must be scanned and uploaded in SYGMA during the grant agreement preparation (GAP) process.

b) For the selection criteria:

- Financial capacity:
  
  o Applicants have stable and sufficient sources of funding to maintain their activity throughout the period during which the activity is being carried out and to participate in its co-financing.
  
  o Each applicant has confirmed if it is receiving funds from any other EU programme;
  
  o The Coordinator's organisation as well as each other applicant for its own organisation has performed the self-check of the financial capacity of the organisation (or are exempt as they are public bodies), as already explained above;

- Operational capacity:
  
  o the applicants have the professional resources, competences and qualifications required to complete the proposed action.
Section 2: Participants and contacts

The Coordinator will encode the PIC code of his/her organisation and of every other applicant (see section 1.3 in this Guide). Part A on administrative data will be filled in automatically after encoding the PIC code. Then, the Coordinator will be required to fill in the contact details for every participant. Hence, it is recommended to have this information at hand when completing Part A.

Section 3: Budget

The JA Coordinator must fill a budget overview table and indicate the co-funding rate for which the proposal is applying for. Please refer to the screen shot below.

The usual co-funding rate for JA under the EU Health Programme is 60% of the total eligible cost. However, this may increase to up to 80% of the total eligible cost, if the JA application is deemed to be of exceptional utility towards achieving the objectives of the Programme. To receive up to 80% of co-funding, the proposals must comply with the criteria (see also Annex of the Work Programme 2018):

- At least 30% of the budget of the proposed action is allocated to Member States whose gross national income (GNI) per inhabitant is less than 90% of the Union average. GNI table based on most recent data published by EUROSTAT is uploaded here on Chafea website (rationale: this criterion intends to promote the participation from Member States with a low GNI).
- Bodies from at least 14 participating countries participate in the action, out of which at least four are countries whose GNI per inhabitant is less than 90% of the Union average (rationale: this criterion intends to promote wide geographical coverage and the participation of Member States authorities from countries with a low GNI).

Please be aware that if your proposal does not meet the criteria for exceptional utility, the final EU contribution will only be up to 60% and applicant's additional contribution will become necessary.

Importantly, the same co-funding rate (60% or 80% in case of exceptional utility) shall be used by each participant in the proposal to calculate their requested grants.

The Coordinator must fill in the budget table as presented below.

Figure 4: The Budget Overview Table in Part A
Each row of the budget table represents the estimated expenditure and income for one applicant, including beneficiaries and linked third parties (affiliated entities).

The final row of "Total" represents the total estimated expenditure and income for the whole action.

The estimated costs of one applicant must also include the estimated costs of its linked affiliated entities.

**Note:** Please ensure that the amount of each cost category and totals in Part A is equal to the corresponding amounts given in the individual detailed budget under Part B of the application.

The maximum EU contribution in column (g) corresponds to the total eligible cost in column (e) multiplied by the reimbursement rate in column (f). The same ratio of 60% (or 80%) also applies for each beneficiary.

The requested Grant amount in column (h) can be up to maximum EU contribution (for each applicant and for the total). At the proposal stage, we recommend to have the requested grant amount (h) to be equal to the maximum EU Contribution amount (g).

**Important:**

When completing the budget table, please also bear in mind that for your budget request being valid:

- it is obligatory to input in column (h) the amounts of requested grants;
- at the proposal stage it is highly recommended that to have the amount of the requested grant equal to the amount of the maximum EU contribution you apply for.

Please make careful calculations before inserting figures into the table and check carefully before submitting the application.

The applicants must also estimate if:
- There is any income of the action foreseen (e.g. sale of an equipment used by an action, conference or training fees, etc.). Such amount should be given in column (k);
- There is any third party contribution. The sponsorship means actual money inflow to any of the applicants. The amount should be dedicated to cover the eligible cost of the action. Such amount should be given in column (l).

The sum of total receipts (column (m)) plus the requested Grant (column (h)) must not be higher than the total estimated costs (column (e)), as per the Non-profit rule.
2.2 Joint Action application form: Part B - Technical content

Part B is the technical content of the proposal (which then becomes Annex 1 of the MGA) and shall be uploaded via the electronic submission system of the Participant Portal in PDF format.

The structure of the template is as follows:

1. PROBLEM ANALYSIS INCLUDING EVIDENCE BASE

2. AIMS AND OBJECTIVES OF THE ACTION
   2.1 General objective of the action
   2.2 Specific objective(s) of the action

3. TARGET GROUPS

4. POLITICAL RELEVANCE
   4.1 Contribution to meeting the objectives and priorities defined in the Annual Work Programme
   4.2 Added value at EU level in the field of public health
   4.3 Pertinence of geographical coverage
   4.4 Consideration of the social, cultural and political context

5. METHODS AND MEANS

6. EXPECTED OUTCOMES

7. WORK PACKAGES
   7.1 Overview on work packages
   7.2 Work package description
   7.3 Timetable or Gantt Chart

8. MILESTONES AND DELIVERABLES

9. PROJECT (ACTION) MANAGEMENT STRUCTURE
   9.1 Quality of the partnership
   9.2 Capacity of the staff
   9.3 External and internal risk analysis and contingency planning
   9.4 Financial management

10. BUDGET
10.1 Content description and justification
10.2 Financial contribution given by third parties
10.3 Summary of staff effort
10.4 Detailed budget table

11. PREVIOUS AND CURRENT GRANTS RELEVANT TO THE PROGRAMME

12. CURRENT APPLICATIONS RELEVANT TO THE PROGRAMME

13. EXCEPTIONAL UTILITY

14. COLLABORATING STAKEHOLDERS

Note:
The proposal must follow the structure of the template and guide provided in this Guide for Applicants. It has been designed to ensure that the important aspects of your planned work are presented in a way that will enable the experts to make an effective assessment against the award criteria.

Page limit: as mentioned in section B.1.6 of the present guide, the proposal should be limited to 100 pages for the technical description and an additional page for each partner's (and affiliates and/or sole beneficiaries if applicable) budget table.

The minimum font size allowed is 11 points. The page size is A4, and all margins (top, bottom, left and right) should be at least 15 mm (not including footers or headers).

2.2.1 Problem analysis including evidence-base

Bearing in mind that a JA is a collaborative action between the European Commission and the EU MS and third countries participating in the Health Programme to implement an action-oriented initiative based on evidence-based policies or interventions at national, regional or European level. This initiative can be used to develop / share / adapt / test tools, methods and approaches to specific issues or activities, and engage in capacity building in key areas of mutual interest.

A JA is not meant to run any kind of research or clinical trials; and literature reviews are considered relevant only when there is a base-line needed to support the design of specific tools, like surveys or training programmes.

The JA activities are supposed to build on already existing evidence, tools, platforms based on previous project or JA outcomes and results, and so on. A JA strongly supports knowledge transfer, policy implementation at National and/or European level and on the wider EU scale, by involving all the relevant stakeholders to ensure sustainability.

In line with the current Annual Work Programme, applicants must include a problem analysis and clearly describe the factors, the impact, the effectiveness and applicability of the proposed measures and present the relevant evidence on which the action is based. It may concern the analysis of the health problem and its impact on quality of life and on society (incidence, prevalence, distribution in the population, evolution over time,
seriousness…), the analysis of the factors underlying the problem (factors regarding human biology, quality of health care, lifestyle, physical and social environment, risk factors, protective factors), the effectiveness of the proposed measures, or the applicability in the proposed context. This context analysis should also look at elements in the environment which may facilitate or hinder the action implementation process.

2.2.2 Aims and objectives of the action

General objective(s) of the action

Applicants must define a general objective. This is a general indication of the action's contribution to society in terms of its longer-term benefits (e.g., contribute to the reduction of cancer mortality; reduce social inequality in population's health). The general objective has to correlate with the different specific objectives.

Specific objective(s) of the action

Applicants must include specific objectives. These are concrete statements describing what the action is trying to achieve in order to reach its general objective. They should be matched to the problem determinants identified in the problem analysis, and should be written in a way that they can be evaluated at the end of the action. Hence, formulate them "SMART": Specific, Measurable, Acceptable for the target group, Realistic, and Time-bound (containing an indication of the time within which it must be reached). Objectives can be hierarchically and temporally structured, so that the achievement of some objectives is a precondition for another.

For each specific objective, please formulate pertinent indicators – process, output and outcome/impact. Indicators are variables measuring the performance of an action and the level to which the set objectives are reached. This is why the indicators should be directly linked to the specific objectives. For each specific objective, at least one indicator should be formulated. If possible, the indicators should also specify target values. The indicators must be adequate for the action and, like the objectives, formulated "SMART".

<table>
<thead>
<tr>

<td>(repeat line as needed)</td>
<td></td>
</tr>
<tr>
<td>Outcome/Impact Indicator(s)</td>
<td>Target</td>
</tr>
<tr>
<td>(repeat line as needed)</td>
<td></td>
</tr>
</tbody>
</table>

2.2.3 Target groups

Applicants must specify the target group(s) in the proposal. These are persons or entities that will be positively affected by the action.
A proper target group specification provides a clear definition including information about the demographic characteristics, the needs and social norms with regard to the health problem(s) of interest, the size (i.e., the numbers that will be reached by the action), and the method to reach these people. For certain types of interventions it is also useful to segment the target group into subgroups based on relevant characteristics and adapt the communication strategy to reach them.

2.2.4 Policy Relevance

The understanding of the policy relevance of action co-funded under the Third Health Programme is highly important. As well the expected contribution to other EU policies in the specific field the JA should be highlighted; and these need to be referred to in the proposal. For the JA 2018, the EC policy expectations have been described in the annex 1. Hence, please describe it in detail in your proposal, guided by the four points below.

**Contribution to meeting the objectives and priorities defined in the Annual Work Programme**

- Applicants must address the topic to which their proposal corresponds and explain how the proposal addresses the specific challenge and scope of it.

- The applicants must describe the way the action brings EU added value to the existing public health knowledge allowing the practical use of that knowledge on the field. It is also expected to contribute and add value to EU policies formulated or in the process of being so.

- The action must be innovative and also sufficiently compatible with existing actions (ensure complementarity by referring to previous actions of the Health Programme or related programmes). In this context, participation in EU networks and Expert committees and other coordination initiatives, like the coordination meetings between different actions co-funded under the EU Health Programmes, is important.

**Added value at EU level in the field of public health**

- Applicants must describe how the action has EU added value. EU added value can be achieved in different areas and in different ways, as depicted in the table below but not limited to this list.

<table>
<thead>
<tr>
<th>Areas – where to achieve EU added value</th>
<th>Ways - how to achieve EU-added value</th>

</tr>
</tbody>
</table>

- Applicants should demonstrate in the proposal that the expected impact of coordinating the work at European level is greater than the sum of the impacts of national activities.
Moreover, the proposal should include planning for reproducing and transferring the actions, so to cover the whole concerned population in the future.

- As the Third Health Programme is not expected to fund recurrent actions, the proposal should also address its sustainability and participating countries take-up at their long term policies.

Pertinence of geographical coverage

The geographical coverage rests on the Member States decision during the preparation phase of the JA.

Consideration of the social, cultural and political context

Applicants must explain how the action relates to the situation of the countries or specific areas involved, and ensure the compatibility of envisaged actions with the culture and views of the target groups.

The action should demonstrate its compatibility with the culture, knowledge, views, customs and roles of the target group, and with the local policy context in which it will be implemented. This compatibility should take account of the information deriving from the context analysis identifying the trends, opportunities and threats in the broader social and policy context which must be clearly illustrated.

Also, applicants must discuss ethical aspects, confidentiality and protection of personal data, if the proposal includes studies involving human beings.

2.2.5 Methods and means

Applicants must describe the methods and means that will be used to implement the action. These should be explicitly linked to the objectives, in the sense that for each specific objective at least one intervention method is specified.

The methods and means should be described using scientific methods. The methods and means should describe how the specific objectives will be reached, what are the essential tasks to be carried out, e.g., study protocol, survey methods, panel of experts, training development, etc.

2.2.6 Expected outcomes

The application must include a description of the anticipated outcomes and outputs (deliverables). The main necessary deliverables can be extracted from the Annual Work Programme description.

Action outcomes are the changes that are expected to occur as a result of the action when the objectives are reached. They can be distinguished from a specific type of output, the deliverables are presented below in 2.2.8.
2.2.7 Work packages

Overview on work packages

Applicants must organize their action in work packages (WP). A WP is a major subdivision of the proposed action and contains a set of coherent tasks grouped together in order to facilitate the JA management.

Applicants must include a WP overview table as well as one detailed table per WP (work package description).

There are two types of WPs: horizontal and core.

The mandatory horizontal WPs are: Management (WP1), Dissemination (WP2) and Evaluation (WP3), Integration and sustainability (WP4), and they are linked to deliverables.

Each core WP is linked with one or several specific objectives of the action and produces one or several deliverables.

Give full details! Base your account on the logical structure of the action and the stages in which it is to be carried out. Include details of the resources, person/days and financial means, to be allocated to each WP. The number of core WPs should be proportionate to the scale and complexity of the action. You should give details on the tasks in each WP to justify the proposed resources to be allocated and also quantified information so that progress can be monitored.

The WP overview must be presented in a table format, following the template below.

Work packages description

For the four mandatory WPs, the following content must be covered:

WP 1 – Management of the action

This WP should be led by an organisation with relevant knowledge and experience in coordination and management (project and financial management).

The JA Coordinator must have demonstrated experiences in coordination and management (project and financial management) in an inter-cultural environment, in-depth knowledge of policy development on the EU level, be a good communicator and have the capacity to motivate and lead the JA consortium from the point of view of management and also demonstrate scientific leadership across the consortium and on the EU level.

Applicants must clearly describe the actions undertaken to manage the action and to make sure that it is implemented as planned.

Action management requires the systematic monitoring of the activities to check whether they are implemented according to the plan, whether results and deliverables are attained at the milestones, if there are obstacles or difficulties which may prevent the action from delivering, and to assure the overall quality of the JA implementation.
Many of these tasks are typically performed by the action manager with input from other participants (e.g., via a management and/or steering committee).

Also describe how information will be exchanged among participants, how potential conflicts between participants will be coped with and the planned meetings among the participants (note: the kick-off meeting should be held in Luxemburg) etc.

**WP 2 – Dissemination**

This WP should be led by an organisation with relevant knowledge and experience in knowledge brokering.

Dissemination refers to the process of making the results and deliverables of the action available to the stakeholders and a wider audience.

Applicants must describe all actions planned to ensure that the results and deliverables will be made available to the stakeholders and can be used by them. Hence, a stakeholder analysis could be performed before developing the dissemination strategy. Applicants must describe the dissemination strategy in terms of planning, target groups, adequacy of channels used, and visibility of European Union co-funding.

Although an action is by definition limited in time, the purpose is to make the results and outcomes sustainable. The dissemination strategy should pay attention to the transfer of knowledge and to the processes needed for embedding and future take-up. The sustainability of the dissemination actions must also be properly addressed.

A dissemination plan should be elaborated, explaining how the action plans to share outcomes with stakeholders, including public authorities. A dissemination plan should be included, which illustrates the following:
- what will be disseminated (key message),
- to whom (audience),
- why (purpose),
- how (method), and
- when (timing).

It is highly recommended for this WP to also describe how it will build on synergies with relevant key stakeholders (internally and externally) and link with EU or national initiatives, such as the Health Policy platform (HPP), to ensure sustainability of the dissemination tools.

| If this WP is not properly described, the beneficiaries will be facing a potential rejection of the entire proposal. |

**WP 3 – Evaluation**

Applicants must evaluate the impact of the action activities. This includes all actions undertaken to verify if the action is being implemented as planned and reaches the objectives. Applicants should develop an evaluation strategy that includes a clear description of the methods for the evaluation, SMART indicators and measures of verification. This must define indicators per specific objectives and explain how they will be achieved and measured.
The contribution to the Third Health Programme objectives and indicators, other EU and national policies and International policy commitments should be assessed.

Applicants must explain the action's own internal evaluation, i.e. a systematic appraisal of the quality of the action (e.g., whether the action outcomes are useful and meet the user needs), and its effects (e.g., whether the action achieved its objectives and had an impact on the target group). The evaluation methodology should be adequate (formulation of specific evaluation questions and for each evaluation question, methods to collect data), inferred from an evaluation plan, specifying purpose, questions, study design, method, measurement instruments, and the task, responsibilities and timing of the evaluation. External evaluation can be opted for.

This WP should be led by an organisation with relevant knowledge and experience in public health programmes evaluation at international level.

**If this WP is not properly described, the beneficiaries will be facing a potential rejection of the entire proposal.**

**WP 4 – Integration in National Policies and Sustainability**

In this WP, the JA should set up a plan that demonstrates/describes the potential of their results/deliverables for integration in policies (at national, regional or local levels), support national plans development, and aim to ensure the sustainability of the JA activities at national or on the local or regional level.

This could be achieved through the development of pilot actions, for example, to illustrate potential implications and how to support the implementation of a policy recommendation or the adoption of an identified best practice at an adequate level in different EU MS (on the local or regional level).

The proposal should be accompanied by a sustainability plan (a projection in the future following reasonable probabilities) describing which elements/deliverables/results will be further developed, consolidated or run and by which entity/organisation this will/should be done.

It is important that the proposal demonstrates how policies build on the outcomes and results of action and provides an analysis of potential take-up of best practice(s), evidence-based policy recommendation(s) or national plan(s) or the like.

This WP should be led by an organisation with relevant knowledge and experience in policy development at national and European level, and should be accompanied by a monitoring and evaluation plan measuring follow-up (uptake, implementation) at national/regional/local levels.

**If this WP is not properly described, the beneficiaries will be facing a potential rejection of the entire proposal.**

***
After the mandatory WPs, the applicant should add as many WPs as needed to carry out the JA specific objectives. A suggested number of additional WPs is a maximum of 10 WPs. Please do not split the tasks in too many tasks. Each WP must be led by one of the applicants, allowing the sharing of tasks and resources within partnership. Please assign the WP to the partners according to their knowledge and skills.

For each WP, please create a table as the model below and fill it in.

### Figure 5: Sample table of a WP

<table>
<thead>
<tr>
<th>Work package number</th>
<th>Work package title</th>
<th>Starting month</th>
<th>Ending month</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>

</tbody>
</table>

<table>
<thead>
<tr>
<th>Objectives</th>
<th>Description of work</th>
<th>where appropriate, broken down into tasks, specifying the role of the WP leader and those of others</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Deliverables linked to this work package</th>
<th>brief description, month of delivery, reference to the list of deliverables</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Milestones to be reached by this WP</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
</tbody>
</table>

### Timetable or Gantt Chart

A timetable must be included. It must comprise the work packages, milestones and delivery month of deliverables, including the name/acronym of the responsible participant. Applicants can choose to use a graphical form, such as a Gantt chart. In addition, you can also opt for a graphical presentation of the components showing how they inter-relate (Pert chart or similar). The time to reach objectives of the action and thus the activities comprised in each of the WP must be realistic, taking into account the available resources (person/days) and capacities.

#### 2.2.8 Milestones and deliverables

### Milestones

Milestones mean control points in the action that help to monitor progress. Milestones may correspond to the completion of a key deliverable (see below), allowing the next phase of the work to begin. They may also be needed at intermediary points so that, if problems have arisen, corrective measures can be taken.

---

9 This type of chart is named after its developer Henry Gantt. It is a specific type of bar chart used to illustrate a project schedule. Such a chart includes start and end dates and indicates milestones (e.g. meetings) and deliverables.
A milestone may be a critical decision point in the action where, for example, the consortium must decide which of several technologies to adopt for further development.

**Deliverables**

Applicants must specify the deliverables of the action. A deliverable is a physical output related to a specific objective of the action, e.g., a report, publication, newsletter, tool, software, handbook, training guide, website, or conference. In your proposal, please create a table, guided by the model below, to list all the deliverables.

<table>
<thead>
<tr>
<th>1.</th>
<th>The running number of the deliverable.</th>
</tr>
</thead>
</table>

**Note:** Chafea will make a payment to the beneficiaries at the end of the reporting period, mostly at half-way through the action. The first interim payment must be based on deliverables which will have been produced in the first half of the action (besides the interim report). Thus, it is important that some deliverables are available at the point of the payment (usually month 18 for a 36 months long action). Chafea cannot make an interim payment without receiving deliverables at that point in time (e.g., drafts of reports to be finalized at the end of the action).

Note that there are several mandatory deliverables. These are already included in the table below. Please copy them into your proposal.

The table should have the following columns:

1. The running number of the deliverable.

2. Name of the deliverable, e.g., training manual for health care workers, report on literature review, final conference, etc.
3. Number of the work package which will produce this deliverable
4. Acronym of the partner that is responsible for / leading the production of this deliverable
5. Short description of the content of the deliverable
6. Dissemination level: indicate if this deliverables is public (PU) or its distribution is limited to the partnership and the Executive Agency, i.e. confidential (CO, see also conditions in the MGA, Articles 21 and 22). Note that the main deliverables produced by the JA must be publicly available.
7. The deadline of the deliverable (the month when the deliverable will be ready and submitted to Chafea using the H2020 continuous reporting tool). Deliverables that have similar nature, such as interim and final report, can be indicated as one deliverable, e.g., one line covering the interim report in M18 and the final report in M36 (together they make one deliverable type). The deliverable composition should be described on the content specification column.
Figure 6: An example of a table with the list of deliverables

<table>
<thead>
<tr>
<th>Deliverable Number</th>
<th>Deliverable Name</th>
<th>Work package number</th>
<th>Leading participant acronym</th>
<th>Content specification</th>
<th>Dissemination level</th>
<th>Delivery month</th>
</tr>
</thead>
<tbody>
<tr>
<td>MD.1</td>
<td>Leaflet</td>
<td>2</td>
<td></td>
<td>A leaflet to promote the action must be produced at the beginning</td>
<td>P</td>
<td>M3</td>
</tr>
<tr>
<td>MD.2</td>
<td>Layman version of the final report</td>
<td>2</td>
<td></td>
<td>This is a short (e.g., 10 pages) version of the final report, written for the interested public as a target group.</td>
<td>P</td>
<td>End of action</td>
</tr>
<tr>
<td>MD.X</td>
<td>3rd HP indicators questionnaire</td>
<td>3</td>
<td></td>
<td>This is the questionnaire to assess how the Joint Action contribute to the 3rd HP objectives. It is linked with the reporting: interim and final</td>
<td>C</td>
<td>M18/M36</td>
</tr>
<tr>
<td>MD.3</td>
<td>Web-site</td>
<td>2</td>
<td></td>
<td>Each action must have a dedicated web-site / web-pages. This can have a public part and another one accessible only to the participants.</td>
<td>P (and C)</td>
<td>M3</td>
</tr>
<tr>
<td>MD.4</td>
<td>Report on the Integration in</td>
<td>36</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Please add lines to the table as needed. While there is no limitation to the number of deliverables, it is strongly suggested to keep the number reasonable.

For example:

- draft version are not different deliverables from the final product, but please indicate under the content specification the month when the draft will be ready (e.g., M16) and when the final report will be ready (e.g., M24);
- translations into other languages are also not different deliverables from the original version; in case of translation this should be mentioned on the content description or on the specific tasks description.
- 6 newsletters are produced throughout the action, they should be listed a one deliverable and not as 6 individual ones (even if in different languages). Indicate the different months when the newsletters would be produced under the content specification (e.g., M6, M12, M18, M24, M30, M36);
- Steering group or other meeting minutes are to be considered milestones, and added as annexes of the interim (M18) and final reports (M36)

With respect to conferences, you may wish to group all deliverables around the conference as one, i.e. the conference itself and any output it may produce (report, declaration, recommendations, manifesto, etc.). Again, specify the month when each part could be ready e.g. conference in M20, conference report published in M26.

Mandatory deliverables:
MD = "mandatory deliverable"

Please note that at the time of reporting, whether interim or final reporting the H2020 reporting tool system will automatically "open" and provide a template for the technical report and cost declaration for the reporting period. Thus there is no need to include additional deliverables such as Interim report(s) or Final report.

Two other deliverables linked to horizontal WP are mandatory:

- The dissemination strategy and
- The evaluation strategy.

Both these documents need also to be reflected in the interim and final reports.

2.2.9 Action management structure

Applicants must describe the organisational structure and the decision-making and explain why these are appropriate to the complexity and scale of the action. It is important that a JA structure supports the implementation of its actions and has good managerial leadership as well as scientific leadership so as to properly orchestrate all the partners, the stakeholders, members of the governing board and advisory board (if introduced) and so on.

Consider an appropriate governance structure possibly to include a management or steering committee, (scientific and policy) advisory board, etc.

Appropriate mechanisms for monitoring and supervision should be properly planned.

Also, as the management of an action implies the coordination of several participants located in different countries, it is thus important to have a good internal communication strategy and plan. This should include details how information will be communicated between the action participants, how decisions will be taken, by whom, and what the procedure will be in case of conflict.

Quality of the partnership

Applicants must describe the consortium. The partnership definition is under the responsibility of the Member States during the preparation phase.

Capacity of the staff

Applicants must clearly but concisely describe the competence of staff related to the scientific, technical and managerial implementation of the action.

- Coordinator institution, description of competence, experience, leadership and authority in the action area
Demonstrate the capacity of the Coordinator to realise the work in relation to the action. The leadership and authority refers both to the organisational and personal aspects of leadership.

As mentioned above, the JA Coordinator must have demonstrated experience in management (project and financial management) in an inter-cultural environment, in-depth knowledge of policy development on the EU level, be a good communicator and have the capacity to motivate and lead the JA consortium from the point of view of management and also demonstrate scientific leadership across the consortium and on the EU level.

On the organisational level, there should be a clear division of responsibilities and tasks between the action manager and other decision makers. On the personal level, the action manager must have the necessary skills, expertise and authority to lead a team and to achieve the action objectives. He or she should also be capable of using the resources in a flexible way.

- **Key staff of the Coordinator – description of competence (leadership and authority) and experience in the action area.**

Present the profile of the key staff members (recommendation: a half page for all staff together) illustrating their (academic) qualifications, professional experience, competence, expertise, leadership quality and authority required by the action tasks.

**Note:**
Applicants are requested to include staff profiles into the proposals and not summary CVs. A staff profile is a generic description of the minimum (academic) training and professional experience needed in order to perform specific tasks to implement the JA. For example, an epidemiologist with a university degree in medicine and at least 5 years of professional experience in infectious disease epidemiology or a JA manager with a relevant university degree and at least 3 years of experience in managing JAs at EU level, having also a high command of English.

- **Participants’ institutions, description of competence, experience, leadership and authority in the action area**

Demonstrate the capacity of the participants to realise the work in relation to the specific objectives.

- **Key staff of the participants – description of competence (leadership and authority) and experience in the action area**

Present profiles (please see above, do not add CVs, specify names, etc.) of the key staff members (recommendation: a half page for all staff together), illustrating their (academic) qualifications, professional experience competence and expertise required by the action tasks.

**External and internal risk analysis and contingency planning**

Even in the best-planned actions there are uncertainties, and unexpected events can occur. Therefore applicants must provide a risk analysis at the start of the action. This
will help to predict the risks that could prevent the action from delivering on time or even failing.

A risk is an uncertainty of outcome of an action or event. A risk analysis addresses the questions what could possibly go wrong, what is the likelihood of it happening, how it may affect the JA, and what can be done about it. The risk analysis should identify internal risks, like a low performance of one of the participants, a withdrawal of one of the participants, and external ones, e.g., target group is harder to reach then foreseen, response rate to a survey is lower than expected, translation of documents is delayed due to sickness of translator, collaboration with external stakeholders is not as smooth as anticipated.

Please provide the risk analysis in form of a table, using the template below.

- Identified risk: describe any critical risks, relating to action implementation, which might hamper the achievement of the action's objectives;
- Likelihood: include the probability or likelihood (high, medium and low) of the risks identified;
- Impact: rate the impact (high, medium and low) and what would be affected;
- Contingency planning: detail all risk mitigation measures.

**Figure 7: Template table for risk analysis**

<table>
<thead>
<tr>
<th>Identified Risk</th>
<th>Likelihood</th>
<th>Impact</th>
<th>Contingency planning</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Financial management**

Applicants must describe the financial management of the action. They must be able to build and monitor the action budget. The important amount of money involved and its distribution among participants, in function of the work achieved, demands a strong financial management capacity. This capacity has to be demonstrated with all relevant elements such as the competency of financial officers, tools used to monitor the action, including reporting (e.g. collection of financial documents from the participants), procedures (e.g., preparation of financial reports, distribution of co-funding) and quality controls.

**2.2.10 Budget**

As mentioned previously, the Budget Overview Table will be included in the Administrative Form (Part A) of the application.

In this part of the application you must provide a description of the way the budget was built in support of the implementation of the action – in short, its relevance with the activities planned during the year and the rationale for doing so.

It is highly recommended that the Coordinator work closely together and with the consortium members in the preparation phase. When the action intends to request a higher EC funding, it has to demonstrate to have a high EU added value and to comply with the exceptional utility criteria, during the planning of the budget, as at least 30 % of the budget of the proposed action must be allocated to Member States whose GNI per inhabitant is less than 90 % of the EU average.
The Budget of the Technical Proposal has three parts:

1. **Content description and justification**

   This is a free space for the applicants to explain how the budget is built.

2. **Table of "Summary of staff effort"**

   This table summarises the personnel need of the action, estimated as person month at applicant level with an allocation to each work package the applicant participates in. Please make sure that all personnel of the affiliated entities are also included.

   Each row of the table represents one applicant of the consortium.

   The amount of "Total person month per applicant” must be equal to the sum of total person month given in the table of "Detailed budget" for the applicant and its affiliated entities.

   **Figure 8: Summary of Staff Effort**

<table>
<thead>
<tr>
<th>WP n</th>
<th>WP n+1</th>
<th>WP n+2</th>
<th>Total Person/ Months per Applicant</th>
</tr>
</thead>
<tbody>
<tr>

<td>Total Costs (€)</td>
</tr>
<tr>
<td>(Max. 7% on A, B and C)</td>
<td></td>
</tr>
<tr>
<td>Total estimated eligible costs</td>
<td></td>
</tr>
</tbody>
</table>

**Note:**
The detailed budget per applicant must be consistent with the Budget Overview Table of the Administrative Form (Part A) of the application. The online submission system does not provide a reconciliation function among the different budget tables of the application form. It is the JA Coordinator's responsibility to ensure consistency of the information provided throughout the application.

The table has 4 parts representing the 4 cost categories (A for Direct personnel costs, B for Subcontracting costs, C for Other direct costs and D for Indirect costs).

If the applicant plans to work with its linked affiliated entities, their costs must be presented in separate tables (one table per one affiliated entity + one table for the applicant).

**Note:**
There is one single cell provided per cost category. It makes the budget table simple and easy to handle, but it is also easy to over- or underestimate these figures. Even though you may do budget transfers at a later stage it is crucial that the overall resource need of the action is a fair estimate as the maximum amount of the EU Contribution is linked to this initial budget estimate.

It is, therefore, strongly recommended that you have your own templates / spreadsheets developed which supports you considering all important factors of a cost category.

**A. Direct personnel costs:**

Applicants may consider the following costs as eligible under direct personnel costs:

- personnel working for the applicant under an *employment contract* (or equivalent appointing act) and *assigned to the action*;

- *natural persons* working under a *direct contract with the beneficiary other than an employment contract*, if:
  - the person works under the beneficiary’s instructions and, unless otherwise agreed with the beneficiary, on the beneficiary’s premises;
  - the result of the work carried out belongs to the beneficiary, and
the costs are not significantly different from those for personnel performing similar tasks under an employment contract with the beneficiary.

- **personnel seconded by a third party** if costs are incurred with the beneficiary.

**Elements of personnel costs:**

- Salary;
- Social security contributions, taxes;
- Other costs included in the remuneration, if arise from national law or employment contract.

Please make sure that:

- you consult with Article 6.2. "A. Direct personnel cost" of the grant agreement;
- you include a separate template for each of your linked affiliated entity:
- cost of an action Coordinator / action manager and financial officer are included for the Coordinator;
- cost of a Coordinator / action manager is included if you are leading a workpackage;
- you consider all the expertise (=function) that you will contribute to the action.
- you try to consider the level of seniority of a function;
- you consult with human resources department / accounting department of your organisation to support you with salaries, taxes, etc.;
- the information is consistent with the table "Summary of staff efforts" and the Budget Overview Table of the Administrative Form of the application.

In the cell "**justification**" you should focus on functions and expertise your organisation will contribute.

**B. Subcontracting costs:**

Please make sure that:

- you consult with Article 6.2. "B. Subcontracting cost" and Article 13 "Implementation of action tasks by subcontractors" of the MGA;
- taxes, duties and other charges are included in the estimate;
- you include the estimated cost + potential travel and subsistence costs of the subcontractor;
- a separate row added for each activity to be performed by a subcontractor;
- the activity being subcontracted is also described in the Technical Proposal of Part B;
- you consult with your procurement / sourcing department regarding rules you need to comply with
- you include a separate template for each of your linked affiliated entity;
- the information is consistent with the Budget Overview Table of the Administrative Form of the application.

In the cell "**justification**" you should explain why the activity would be performed by a subcontractor and how the cost is estimated.

**C. Other direct costs:**

This budget category has three subcategories: C1 Travel; C2 Equipment and C3 Other goods and services.
Please make sure that:
- you consult with Article 6.2. "C. Other direct cost" and Article 10 "Rules for purchasing goods, works or services" of the MGA;
- the sum of C1 + C2 + C3 is consistent with the Budget Overview Table of the Administrative Form of the application.

C1 Travel and related subsistence allowance

Please pay attention that:

• travel and subsistence costs for ALL potential participants whose costs you plan to reimburse (e.g. personnel, collaborating stakeholders, advisors, special speakers, trainers, volunteers, invited experts, conference participants, etc.) are included;
• ALL the events / meetings you plan to participate in (e.g., JA meetings, steering committees, advisory boards, dissemination events, conferences, trainings, workshops, study visits, information sessions, coordination visits to other beneficiaries, etc.) are included;
• both travel AND subsistence cost for each participant are estimated;
• you consult with your accounting and / or human resources department regarding your organisation's rules on travel and subsistence.

In the cell "justification" you should explain the type of events you plan to participate in / plan to organise.

C2 Equipment

Costs related to equipment may take the following forms:

− The depreciation costs of equipment, infrastructure or other assets (new or second-hand) as recorded in the beneficiary’s accounts are eligible and written off in accordance with international accounting standards and the beneficiary’s usual accounting practices;
− The costs of renting or leasing equipment, infrastructure or other assets (including related duties, taxes and charges such as non-deductible value added tax (VAT) paid by the beneficiary) are also eligible, if they do not exceed the depreciation costs of similar equipment, infrastructure or assets and do not include any financing fees.

Please pay attention that:

• you include only the depreciation cost of an equipment within the duration of the action;
• you include leasing fee (without financing costs) and costs of renting an equipment;
• you consider that the equipment in question is shared or not with another JA and you calculate only with your share;
• you consult with your accounting department on the depreciation rules and calculation method;
• general office equipment and software are part of Indirect costs.

In the cell "justification" you should explain the type of equipment you plan to use for the implementation of the action.
**C3 Costs of other goods and services**

Please pay attention that:

- you include all those activities for the implementation of the action which would not be performed by personnel or subcontractor.
  - Examples:
    - conference and meeting costs (room rental, catering, meeting materials);
    - laboratory materials and tools;
    - costs of certificates on financial statements;
    - postage, delivery of documents, samples, etc.;
    - costs of dissemination;
    - translation / printing of periodic reports, etc.
- you consult with your accounting / procurement / sourcing department;
- you include taxes, duties and other charges related to the goods and services to be bought.

In the cell "justification" you should explain the type of other services you plan to use for the implementation of the action.

**D. Indirect costs:**

This budget category is a flat rate of 7% above the total direct cost (A+B+C).

Please note that operating grants received by beneficiaries have to be considered and indirect costs will be proportionally decreased for those years when beneficiary receives operating grant (non-cumulative principle).

Operating grants awarded after the signature of the grant for an action will be considered at the time of interim or final payment.

2.2.11 Previous and current grants relevant to the programme

The proposal should contain a list of previous and current grants relevant to the Third EU Health Programme (limited to the last 3 years) received by all the applicant organizations, if any.

2.2.12 Current applications relevant to the programme

The proposal should contain a list of the current applications relevant to the Third EU Health Programme the applicants are involved in, if any.

2.2.13 Exceptional Utility

The Budget Overview Table in Part A, indicates if the proposal requests a higher co-funding percentage than 60%. Please confirm in this section that the proposal complies with the 2 criteria (see: Section 3: Budget).
2.2.14 Collaborating stakeholders

As stated in Annex I of the **Annual Workplan 2018** (Criteria for financial contributions to actions co-financed with Member State authorities under the third Programme for the Union's action in the field of health (2014-2020), Article 7(2)(a) and Article 8(1) of the Programme Regulation) the competent authorities shall also identify and select the civil society organisations active at EU level that can make the most valuable contribution to the joint action. These organisations may be invited to join the action as collaborating stakeholders and/or to participate in advisory structures.

Collaborating stakeholders and/or experts are organisations or individual persons, which:
- may significantly increase the technical and scientific content of the JA, as well as its relevance for different users in the Union;
- have no contractual relationship with the Executive Agency;
- do not receive any EU funding from this particular grant.

It is highly advisable but not mandatory to list an initial list of collaborating stakeholders or experts that could contribute to the JA in a table format (as suggested below).

![Figure 10: Sample table of collaborating stakeholders](image)

<table>

</tr>
</tbody>
</table>

After finalizing the action proposal, according to the above guidelines and based on the template provided, please upload it into the electronic submission system of the PP as "Part B".

![Figure 11: Screen shot of page where to up-load Part B and annex](image)
Note:
You can replace this action proposal which you already uploaded as often as you wish before the deadline. Please be sure that the final version is uploaded at the time of the deadline. It is the JA Coordinator's responsibility to do so!

Suggestion:
Draft your action proposal in good time before the deadline and share it with colleagues and future beneficiaries. Ask them to assess your draft and based on the feedback provided, you can improve your draft.
C. EVALUATION

All proposals received by Chafea via the Participant Portal, go through a multi-level process of evaluation with regards to several categories of criteria: the eligibility, exclusion, selection and award criteria. The evaluation procedure of a JA proposal on the basis of the award criteria has to be seen as a **quality assurance** process, since there is no competition. Indeed, it is a direct grant procedure subject to a negotiation process. The results of the external evaluation will be used during the negotiation phase to improve the quality of the proposal if and when needed.

The evaluation of proposals is carried out in the **strictest confidence**.

1 EVALUATION PROCESS OVERVIEW AND OUTCOMES

All criteria and the mandatory supporting documents are summarized below. Please read these criteria carefully. JA applications failing to meet any of these criteria will be excluded at the given stage of the evaluation chain. This may mean that they are not submitted to the evaluation of the award criteria.

1.1 Eligibility criteria

According to Article 190(1)(d) of the Rules of Application of the Financial Regulation grants may be awarded without a call for proposals to bodies identified by a basic act, within the meaning of Article 54 of the Financial Regulation, as beneficiaries of a grant; or to bodies designated by the Member States, under their responsibility, where those Member States are identified by a basic act as beneficiaries of a grant.

According to Article 7(2)(a) of the Health Programme Regulation, grants may be awarded to fund actions having a clear Union added value co-financed by the competent authorities that are responsible for health in the Member States or in the non-EU countries participating in the Programme pursuant to Article 6, or by public sector bodies and non-governmental bodies, as referred to in Article 8(1), acting individually or as a network, mandated by those competent authorities.

According to Article 8(1) of the Health Programme Regulation, the grants for actions referred to under Article 7(2)(a) may be awarded to legally established organisations, public authorities, public sector bodies, in particular research and health institutions, universities and higher education establishments.

‘Competent authority’ means the central authority of a Member State responsible for health or for a specific (public) health topic or any other authority to which that competence has been conferred. Where appropriate, the corresponding authority of a non-EU country may be included. A competent authority may also be a regional authority, depending on the governance structure of the Member State/non-EU country in question.

The competent authorities may implement activities in cooperation with other entities. The competent ministry/government organisation must submit an official notification, duly signed by an authorised representative, which confirms that the participating entity is a competent authority and that the participating entity is the eligible body to participate on behalf of the respective Member State/region and under its responsibility in the relevant action.

The competent authorities must also identify and select the civil society organisations active at EU level that can make the most valuable contribution to the action. These organisations
will be invited to join the action as collaborating partners and/or participate in advisory structures.

### 1.2 Exclusion criteria

The situations of exclusion are listed in the following articles of the Financial Regulation: Article 105a, paragraphs 1 to 4, 6 and 7, except point (b) of the first subparagraph and the second subparagraph of that paragraph, paragraphs 8, 9, 11 and 13 to 17 of Article 106 and Article 108 shall apply to grant applicants and beneficiaries. Article 107 shall apply to applicants. Applicants shall declare whether they are in one of the situations referred to in Article 106(1) or Article 107 and, where applicable, whether they have taken remedial measures as referred to in point (a) of Article 106(7).

Reasons to exclude applicants from the participation include, but are not limited to: being bankrupt, have been convicted of an offence concerning their professional conduct, have been guilty of grave professional misconduct, are not in compliance with their obligations relating to the payment of social security contributions or the payment of taxes, etc.

### 1.3 Selection criteria: operational and financial capacity

The selection criteria assess the financial and operational capacity of the applicants.

**Financial viability**

Applicants must have stable and sufficient sources of funding to maintain their activity throughout the period during which the activity is being carried out and to participate in its co-financing.

The financial viability will be assessed for all applicants, except:

a) the EU-contribution for the Coordinator / other beneficiary is \( \leq \) EUR 60 000:

b) the beneficiary is a public body.

This assessment will be performed based on the documents the applicants provided when registering in the Beneficiary Registry. You may be contacted if more information is needed in order to complete this assessment.

All applicants must certify their financial viability when applying. For this the self-assessment must be carried out (see section B.2.1).

**Operational capacity**

Applicants must have the professional resources, competencies and qualifications necessary to complete the proposed action.

The applicants' operational capacity has to be certified by the Coordinator by ticking the relevant box in Part A of the online application. To prove the operational capacity, pertinent information has to be provided in the proposal (part B, section 2.2.9), as
described above. The operational capacity will be judged based on the self-declaration and this information.

1.4 Award criteria

Only JA proposals which have satisfied the eligibility, exclusion and selection criteria will be evaluated by external experts on the basis of the award criteria. It has to be noted that no marks are allocated to the different criteria since it is a quality assurance procedure.

Criterion 1: Contribution to public health in Europe (10 points, threshold 7 points)

Sub-criteria

Quality of the contribution of the Joint Action’s to public health in Europe:

- EU added value \(^{(10)}\) will be achieved in one or more of the following areas: impact on target groups, long-term effect and potential multiplier effect, such as replicable, transferable and sustainable activities, contribution to complementarity, synergy and compatibility with relevant EU and EU MS policies and programmes that have been clearly presented.

Consideration of social, cultural and political context:

- The proposal relates well to the situation of the countries or specific areas involved, and ensures the compatibility of envisaged actions with the culture and views of the target groups.
- The proposal contributes complements and supports MS policies, addressing the demographic challenges, promoting social inclusion of vulnerable groups, promotes gender balance, etc.
- Ethical aspects, confidentiality and protection of personal data are respected for the performance of studies involving human beings.

Criterion 2. Technical quality (10 points, threshold 6 points)

Sub-criteria

Quality of the evidence base:

- A relevant problem analysis using scientific evidence is included. It clearly describes the health determinants, factors, impact, effectiveness and applicability of the proposed measures.

Quality of the content:

- Aims and SMART objectives, ensuring a clear public health orientation focus on the implementation of effective measures are clearly stated.

\(^{(10)}\) EU added value can be achieved in different ways: by implementing EU legislation, economies of scale, promotion of best practice, benchmarking for decision making, reducing cross border health threats, strengthening free movement of persons or strengthening networking activities.
The methodology on how to carry out the planned activities to achieve the objectives, is well described and adequate.

The transferability and sustainability of these activities, the target groups, deliverables, milestones, main outputs as well as anticipated effects and outcomes are well described and pertinent.

Quality of the deliverables: the deliverables are well defined and quantifiable. The deliverables correspond to the objectives and are prepared using a defined amount of time and financial and human resources.

Innovative nature, technical complementarity and avoidance of duplication of other existing actions at EU level:

- The progress the JA intends to make within a given field in relation to the state of the art is identified.
- There will be neither inappropriate duplication nor overlap, whether partial or total, between JA and activities already carried out at EU and international level. Applicants demonstrate how the proposal complements EU initiatives and/or EU MS policies and builds on the outcomes and results of actions of the Health Programme.

Quality and relevance of the actions with regard to promoting the dialogue with NGOs in the field:

- The quality and relevance of the JA contribution to promote the dialogue, interoperability and intersectorial collaboration with other relevant EU and international actors and networks, including NGOS in the field, with the aim to create synergies, avoid duplication and increase economy of scales.

Quality of the evaluation strategy:

- The methods proposed are adequate, this should include using a logic framework method, with "SMART" indicators (process, output and outcomes/impact) chosen per specific objective, including target values. Specific indicators regarding dissemination and JA management are included.
- An external and independent evaluation of the JA outcomes is an advantage.

Quality of the dissemination strategy and plan:

- A stakeholder's analysis (including representatives from the Ministries of Health and Public Health institutes) is provided.
- It is well described what will be disseminated to whom, when and why.
- The methodology clearly illustrates the adequacy of the different tools and channels of dissemination to ensure sustainability of the JA results and the reaching of the target group/stakeholders.
- A dissemination plan is provided which includes adequate timing and milestones for the dissemination activities.
- A dissemination report is foreseen that will clearly show the results (with qualitative and quantitative indicators).
- The visibility of EU co-financing is ensured.

Criterion 3. Management quality (10 points, threshold 6 points)

Sub-criteria

The following sub-criteria are taken into account in the assessment:
Quality of the planning and appropriate task distribution to implement the JA:
- The activities to be undertaken are clearly described;
- The JA timetable and milestones are logic and harmonized with the objectives;
- The nature and distribution of tasks among the partnership is congruent with the relevant expertise and is balanced;
- A risk analysis and remediation plan is provided and both are adequate;
- The planning is visualized through a GANTT chart;
- The governance structure proposed is adequate e.g. following the model suggested in the JA brochure 2008-2013 prepared by Chafea (figure 15).

Relevance of the organisational capacity, including financial management:
- The management structure and competences of staff are clearly described;
- An internal communication strategy in terms of managing the JA consortium, including collaborating partners, decision-making, and monitoring and supervision is set-up and adequate;
- The financial processes (e.g. validation of payments, collection of financial documents etc.) and responsibilities, technical and financial reporting procedures and quality controls are well described and adequate

Quality of the partnership:
The quality of partnership will be defined by the Member States and participating countries during the preparation of the JA.

The following sub-criteria are taken into account in the assessment:
- Quality of the planning and appropriate task distribution to implement the Joint Action;
- Relevance of the organisational capacity, including financial management;
- Quality of the partnership

Criterion 4. Overall and detailed budget (10 points, threshold 6 points)

Sub-criteria
- Relevance of the budget in relation to the activities;
- Consistency of the estimated cost per applicant and the corresponding activities,
- Realistic estimation of person days per deliverable and per work package,
- The budget allocated for evaluation and dissemination is reasonable.

In other words, the budget is relevant, appropriate, balanced and consistent in itself, between partners and in relation to the activities and work-packages defined in the JA proposal. The budget is distributed between partners reflecting the task distribution / role of each partner in the consortium and action. And importantly, an adequate proportion of the budget is allocated to ensure the dissemination and evaluation of the action.

1.5 Additional information
Similarly to the proposals for projects, each JA (draft) proposal will be evaluated by independent external evaluators. The JA Coordinator will be invited by Chafea to meet the evaluators, policy officer from DG SANTE, Chafea project and finance officers and
discuss how the proposal may be improved. The estimated timeframe for this is end of October 2018. After this, the Coordinator, in collaboration with the partners of the consortium, should revise and finalise the JA proposal on the basis of the comments received.

Once this process is successfully finalised, Chafea will take the award decision and prepare the grant agreement. Please note that also the proposal finalisation (which will become the technical annex to the grant agreement) and grant preparation will be done in the electronic submission system via the Participant Portal. There will be no paper version of the grant and the annexes. Likewise, the continuous reporting and submission of deliverables will be done in the online system.
