

Funding of ECI "Fair transport Europe":

ETF, the European Transport Workers' Federation, and a number of individual ETF affiliates made available 322.000€ from its budgets to assist with practical and organisational issues such as preparation of the ECI, the registration and the development of the website.

This is complemented by the time staff of ETF invests in the initiative. At the time of registration, it is estimated that starting with the preparation and counting over the whole period of the Initiative and calculating all costs this contribution could amount to two and a half full time staff. In addition an important number of citizens, trade unions, social action groups, NGOs and other organisations will promote the Initiative at national level. An estimate of the costs such volunteer actions represent is difficult to provide.
