

## Climate change quiz

Answers 31-40:

**31) Which of the following is a key message of the EU's Take Control campaign?**

B: Even small changes in our daily behaviour can help prevent the greenhouse gas emissions that are causing climate change

[http://ec.europa.eu/environment/climat/campaign/control/takecontrol\\_en.htm](http://ec.europa.eu/environment/climat/campaign/control/takecontrol_en.htm)

**32) The EU is responsible for what percentage of global greenhouse gas emissions?**

C: 14%

[http://ec.europa.eu/environment/climat/campaign/actions/internationalaction\\_en.htm](http://ec.europa.eu/environment/climat/campaign/actions/internationalaction_en.htm)

**33) Which of the following is NOT a predicted effect of climate change?**

C: A reversal of the seasons

[http://ec.europa.eu/environment/climat/campaign/what/climatechange\\_en.htm](http://ec.europa.eu/environment/climat/campaign/what/climatechange_en.htm)

**34) Which of the following statements is NOT true?**

B: Individuals have no influence on climate change

[http://ec.europa.eu/environment/climat/campaign/what/ccqanda\\_en.htm](http://ec.europa.eu/environment/climat/campaign/what/ccqanda_en.htm)

**35) Private households are responsible for what proportion of the energy consumed in the EU?**

A: a third

[http://ec.europa.eu/environment/climat/campaign/what/ccqanda\\_en.htm](http://ec.europa.eu/environment/climat/campaign/what/ccqanda_en.htm)

**36) The global framework for governments to tackle climate change is called ...**

B: the United Nation's Framework Convention on Climate Change (UNFCCC)

[http://ec.europa.eu/environment/climat/campaign/what/fightingcc\\_en.htm](http://ec.europa.eu/environment/climat/campaign/what/fightingcc_en.htm)

**37) Renewable energy sources provide ...**

A: 6% of the EU's total energy consumption

[http://ec.europa.eu/environment/climat/campaign/control/switchoff\\_en.htm](http://ec.europa.eu/environment/climat/campaign/control/switchoff_en.htm)

**Explanation:** Renewable energy sources include wind, hydro, wood, biogas, and solar energy.

**38) What could we do with the energy saved by not boiling water we don't need?**

B: Light one-third of Europe's streets

**Fact:** On average, each European citizen boils about one litre of water every day that they don't use.

[http://ec.europa.eu/environment/climat/campaign/control/switchoff\\_en.htm](http://ec.europa.eu/environment/climat/campaign/control/switchoff_en.htm)

**39) Which household appliance, on average, emits the most CO<sub>2</sub> emissions per hour of use?**

A: an electric hot water boiler

[http://ec.europa.eu/environment/climat/campaign/pdf/table\\_appliances\\_en.pdf](http://ec.europa.eu/environment/climat/campaign/pdf/table_appliances_en.pdf)

**40) Recycling one kilogramme of paper can avoid how many grammes of CO<sub>2</sub> emissions?**

C: 900gr of CO<sub>2</sub>

**Fact:** Not dumping paper in the bin also reduces landfill methane emissions, another big source of CO<sub>2</sub> emissions.
