## STANDARD EUROBAROMETER 55.2

### TECHNICAL SPECIFICATIONS

Between May 10 and June 15 2001, the European Opinion Research Group, a consortium of Market and Public Opinion Research agencies, made out of INRA (EUROPE) and GfK Worldwide, carried out wave 55.2 of the standard Eurobarometer, on request of the EUROPEAN COMMISSION, Directorate-General Press and Communication, Opinion Polls.

The Standard EUROBAROMETER 55.2 covers the population of the respective nationalities of the European Union Member States, aged 15 years and over, resident in each of the Member States. The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EU country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT NUTS 2 (or equivalent) and according to the distribution of the resident population of the respective EU-nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every N<sup>th</sup> address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language.

	TOTAL NUMBER OF INTERVIEWS	16029		

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from Eurostat population data or from national statistics. For all EU member-countries a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. As such in all countries, minimum gender, age, region NUTS 2 were introduced in the iteration procedure. For international weighting (i.e. EU averages), INRA (EUROPE) applies the official population figures as provided by EUROSTAT in the Regional Statistics Yearbook (data for 1997). The total population figures for input in this post-weighting procedure are listed above.

The results of the Eurobarometer studies are reported in the form of tables, datafiles and analyses. Per question a table of results is given with the full question text in English, French and German. The results are expressed as a percentage of the total. The results of the Eurobarometer surveys are analysed and made available through the Directorate-General Press and Communication, Opinion Polls of the European Commission, rue de la Loi 200, B-1049 Brussels. The results are published on the internet server of the European Commission: <http://europa.eu.int/comm/dg10/epo>. All Eurobarometer datafiles are stored at the Zentral Archiv (Universität Köln, Bachemer Strasse, 40, D-50869 Köln-Lindenthal), available through the CESSDA Database <http://www.nsd.uib.no/cessda/europe.html>. They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

Observed percentages	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Confidence limits	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.1%

Q.51. - This logo means that prices are displayed in euro as well as in (NATIONAL CURRENCY). This logo also means that the shopkeeper applies the official conversion rate and uses the rounding rules. Would you have more confidence or less confidence in that shopkeeper or would it make no difference?  
 Q.51. - Ce logo signifie que les prix y sont affichés à la fois en euros et en (MONNAIE NATIONALE). Il signifie aussi que le commerçant applique le taux de conversion officiel et utilise les règles d'arrondi. Cela vous donne-t-il plus confiance, moins confiance en ce commerçant ou cela ne change-t-il rien ?

Q.51. - This logo means that prices are displayed in euro as well as in (NATIONAL CURRENCY). This logo also means that the shopkeeper applies the official conversion rate and uses the rounding rules. Would you have more confidence or less confidence in that shopkeeper or would it make no difference?  
 Q.51. - Ce logo signifie que les prix y sont affichés à la fois en euros et en (MONNAIE NATIONALE). Il signifie aussi que le commerçant applique le taux de conversion officiel et utilise les règles d'arrondi. Cela vous donne-t-il plus confiance, moins confiance en ce commerçant ou cela ne change-t-il rien ?
