Note: this table summarises commitments taken by Member States participating in the Euro Plus Pact since Spring 2011.

Roadmap to stability and growth

Put forward by the Commission on 12 October 2011 to map out next steps in Europe's comprehensive response to the crisis.

Five elements	Key recent actions / initiatives					
1. Give a decisive response to the problems of Greece	 A new financing plan Extended maturities and lower interest rate Negotiations on private sector involvement 					
2. Enhance the Euro area's backstops against the crisis	EFSF leverageEarlier start of ESMIMF contributions					
3. Strengthen the banking system, namely through recapitalisation	 New solvency requirements and rules Banks "stress tests" coordinated by the EBA ECB liquidity support 					
4. Frontload stability and growth enhancing policies	 Recommendations & actions at national level Annual Growth Survey 2012 Fast-tracking at EU level of key growth items 					
5. Build a more robust and integrated economic governance	 European Semester 2012 "Six-Pack" entry into force "Two-pack" proposals to complement Treaty on stability and coordination in EMU 					

Annual Growth Survey 2012

Put forward by the Commission on 23 November 2011 to map out the EU's growth and jobs priorities in 2012 and launch a new European Semester.

Five priorities	Key areas for action					
1. Pursuing differentiated growth-friendly fiscal consolidation	 Pursue country-specific strategies to fit national fiscal and macro-financial situation Adopt right mix of expenditure and tax shifts to maximise positive impact on growth 					
2. Restoring normal lending to the economy	 Strengthen capital positions of key banks Facilitate more direct access to financing 					
3. Promoting growth and competitiveness	 Tap into existing sources: digital single market, internal market for services, trade Mobilise EU funds in support of growth Fast-track key EU initiatives (cf. AGS annex) 					
4. Tackling unemployment and the social consequences of the crisis	 Pursue reforms for a growth-rich recovery Supporting employment, notably through a Youth Opportunities Initiative Protecting the vulnerable 					
5. Modernising public administration	Improve business environmentFacilitate absorption of EU funds					

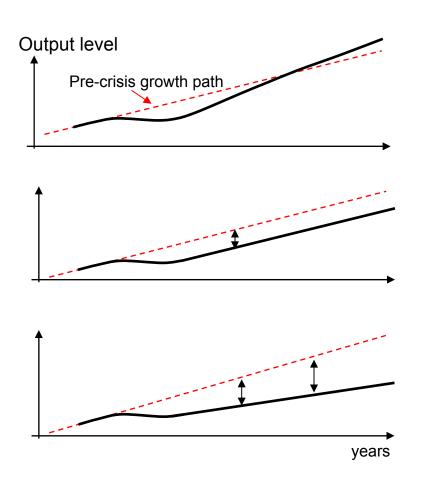

2. Growth challenges

Europe faces a choice

2010-2020: a decade of sluggish growth?

« Strong recovery » : a full return to earlier growth path and a capacity to go beyond

« Sluggish recovery » : a permanent loss in wealth and stagnation on a lower growth path

« Lost decade » : a permanent loss in wealth and an eroded potential for future growth

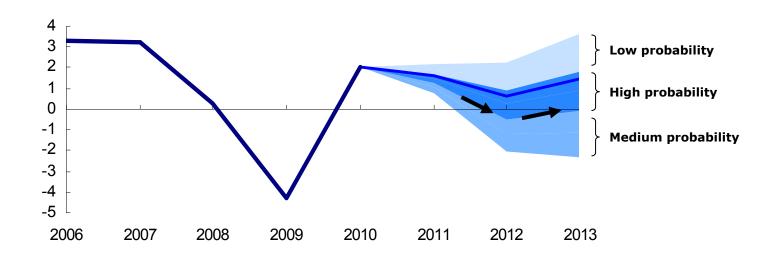

Restoring growth: a pressing priority

EU growth trends and outlook

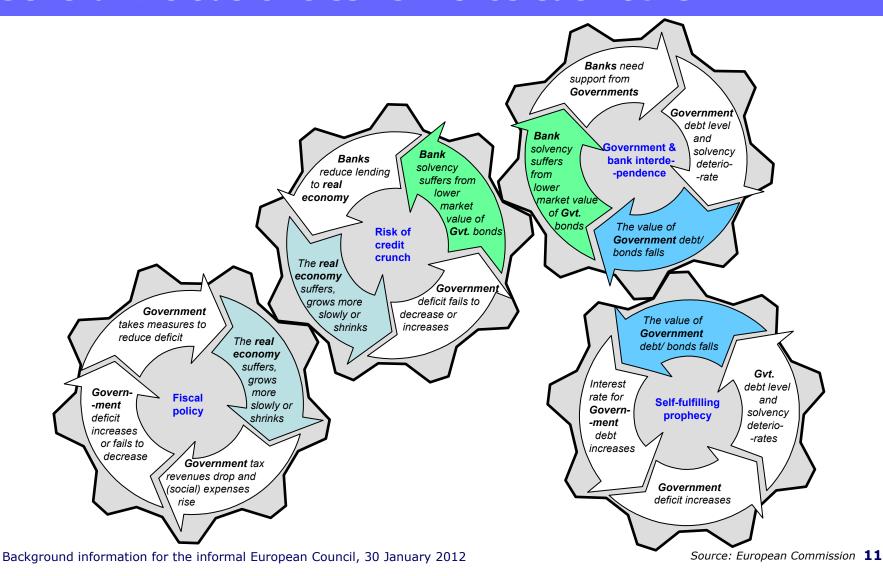

(annual GDP growth rates)

Several vicious circles reinforce each other

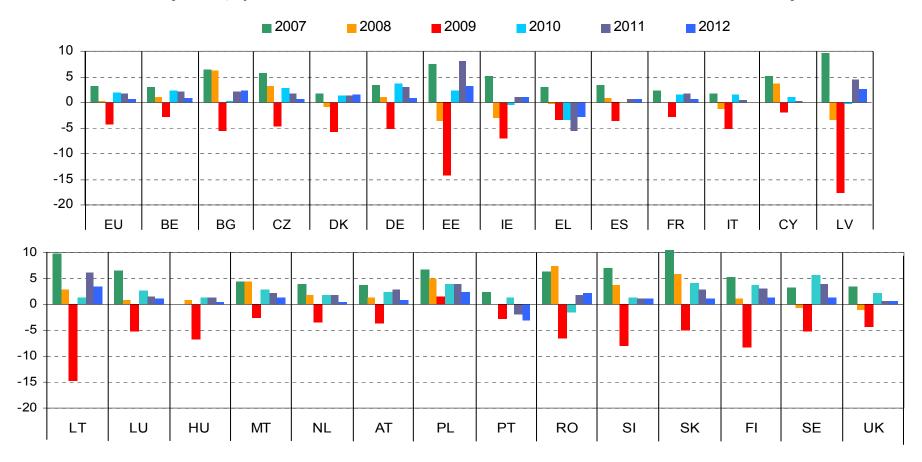

Recovery is limited for all

Annual GDP growth rates in the EU

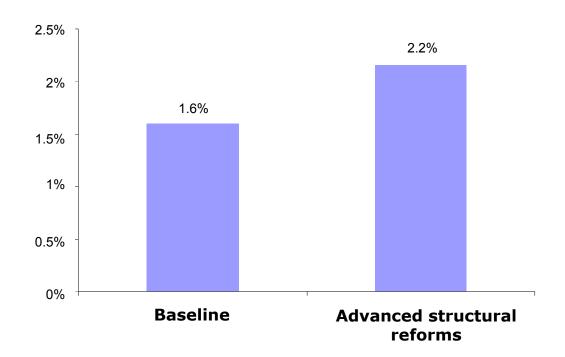

(in%, past trends and forecasts as of Autumn 2011)

What if we meet our Europe 2020 targets?

Average annual GDP growth: scenarios for 2010-2020

Reaching the Europe 2020 targets will raise growth significantly. This requires structural reforms together with fiscal consolidation efforts so as to increase growth by half a percentage point every year.

3. Employment challenges

Unemployment is high, notably among young people

Unemployment rates and numbers of unemployed, overall and among young people (under 25)

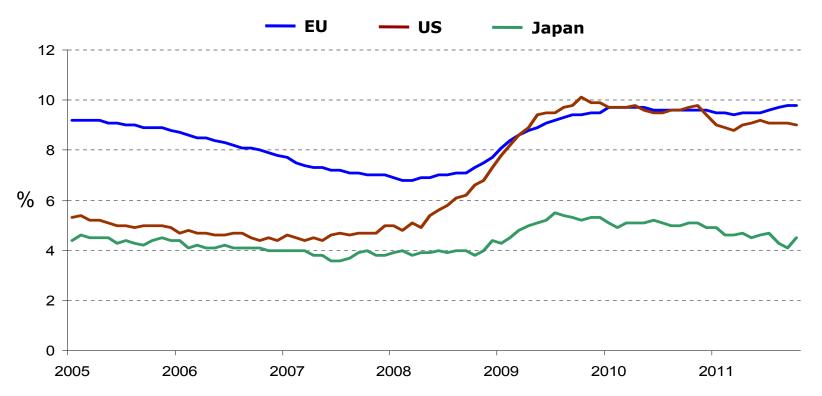

(November 2011)

	Unemployment rates in % (total population)	Number of persons unemployed (rounded)	Youth unemployment rates in %	Number of young unemployed (rounded)		Unemployment rates in % (total population)	Number of persons unemployed (rounded)	Youth unemployment rates in %	Number of young unemployed (rounded)
EU	9.8	23 674 000	22.3	5 579 000	LT	15.3	247 000	31.1	43 000
BE	7.2	351 000	21.1	84 000	LU	4.9	12 000	14.7	2 000

It is now at 10% on average

Unemployment rates in Europe and other countries

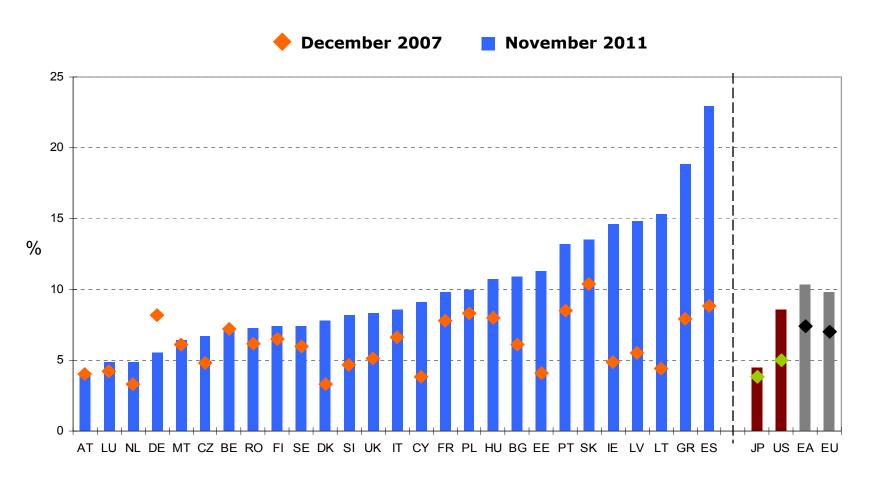

Unemployment has increased since the crisis - by more than 7 million compared to early 2008 to reach about 23.7 million today - and the progress of previous years has been lost.

The impact is far-reaching across the EU

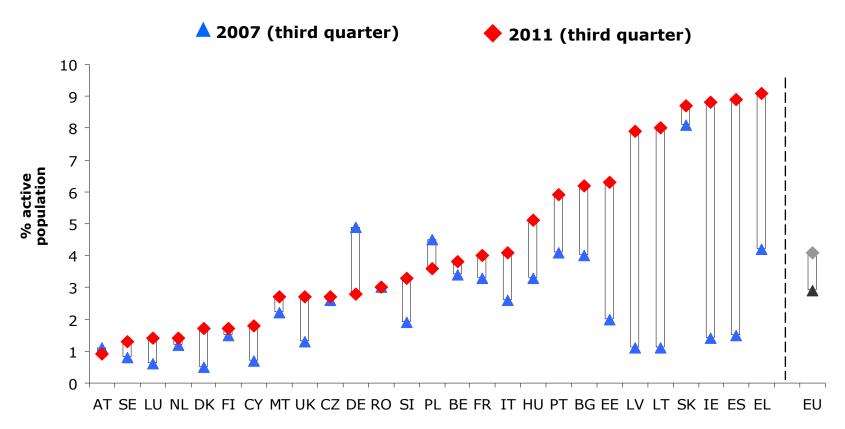

Unemployment rates in %

This is a radically new situation in most countries

Evolution of long-term unemployment rates* across the EU between 2007 and 2011

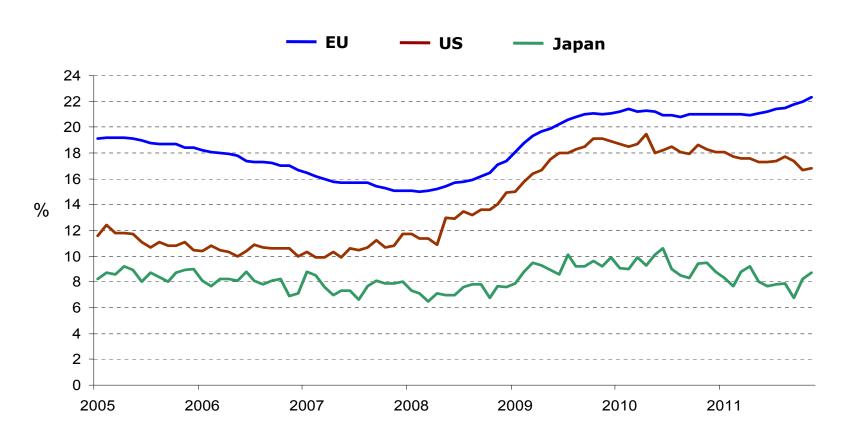

^{*} People unemployed for more than 12 months as a % of the active population

Unemployment is twice as high for young people

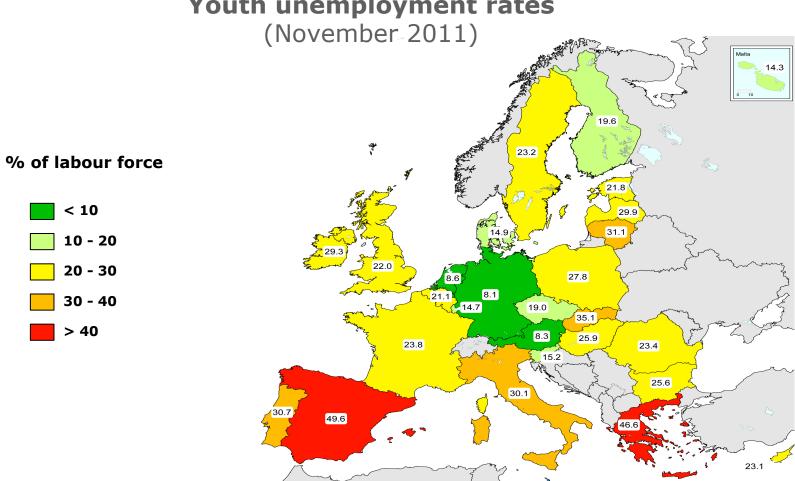

Youth unemployment rates in Europe and other countries (under 25 year-olds)

Youth unemployment is very high in some countries

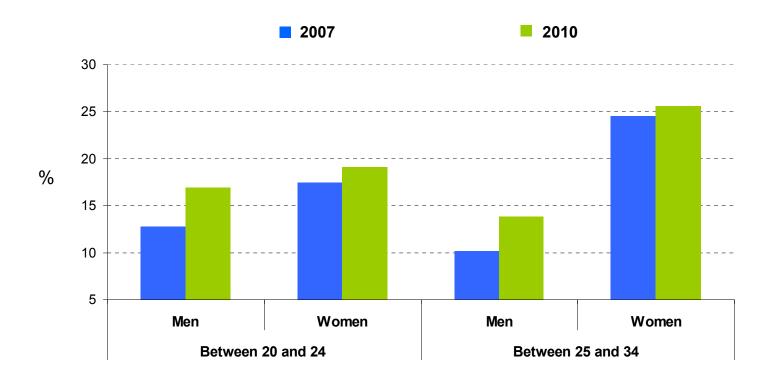

Youth unemployment rates

Risk of a lost generation?

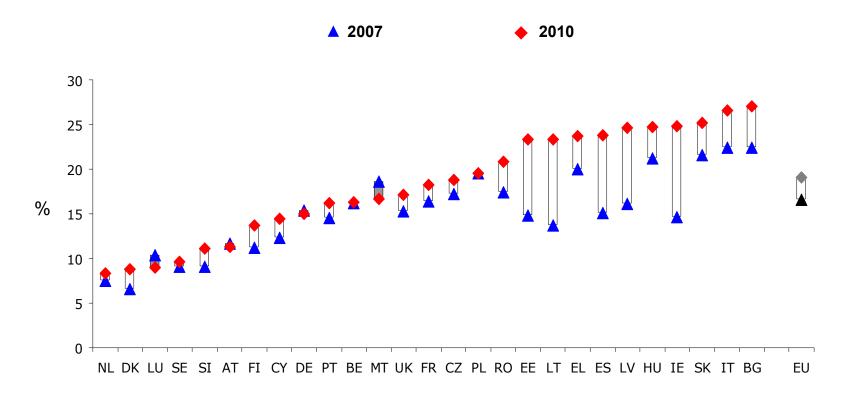

Share of young people not in employment, education or training (NEET) as a % of the age groups 20-24 and 25-34

The phenomenon is striking in several countries

Evolution in the share of young people not in employment, education or training (NEET) as a % of the age group 20-34

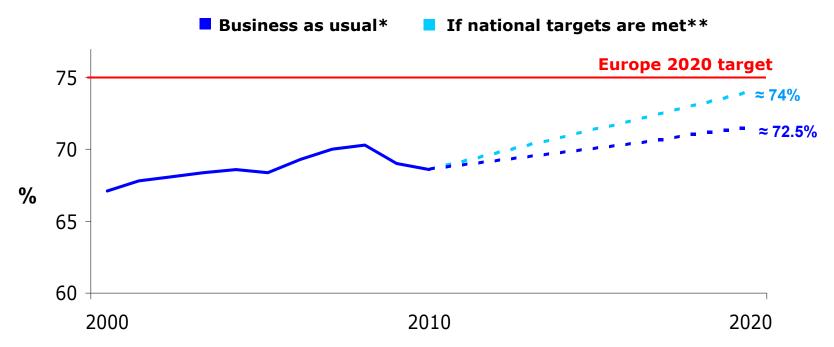

Progress in employment rates is already stalling

EU employment rate in 2000, 2010 and 2020

(share of people employed in the 20-64 age group)

With current trends, the Europe 2020 target will not be met. The demographic reduction in the working age population (- 2 million over 2010-2020) makes it statistically easier to reach the target, but will hamper our growth potential.

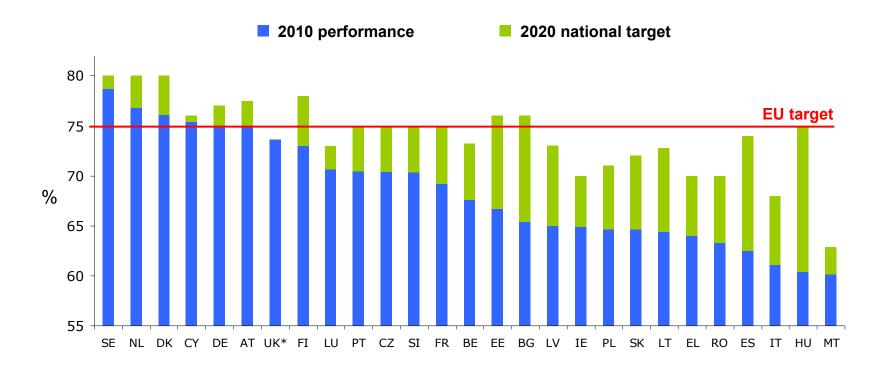

^{*} Based on an employment growth of 0.3% per year, as forecast for 2011-2013, and taking into account an annual 0.1% reduction in working age population ** No target set by the UK: the projection for the EU assumes 75% in 2020

Achieving EU targets will require significant progress

Employment rates across the EU

(share of people employed in the 20-64 age group)

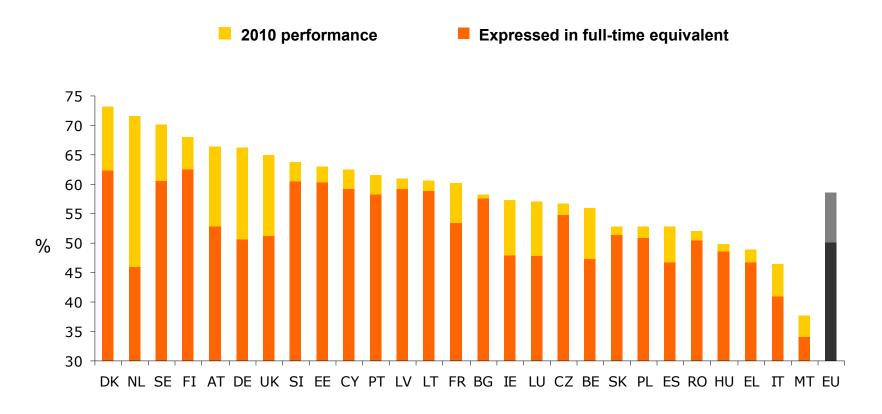

* No target set by the UK

This is notably the case for female employment...

Female employment rates across the EU

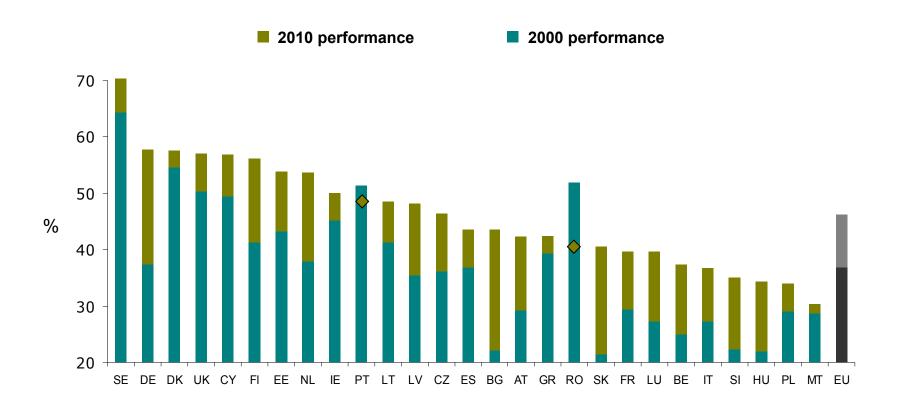

(share of women employed in the 20-64 female age group)

... and for older workers

Older workers' employment rates across the EU (share of people employed in the 55-64 age group)

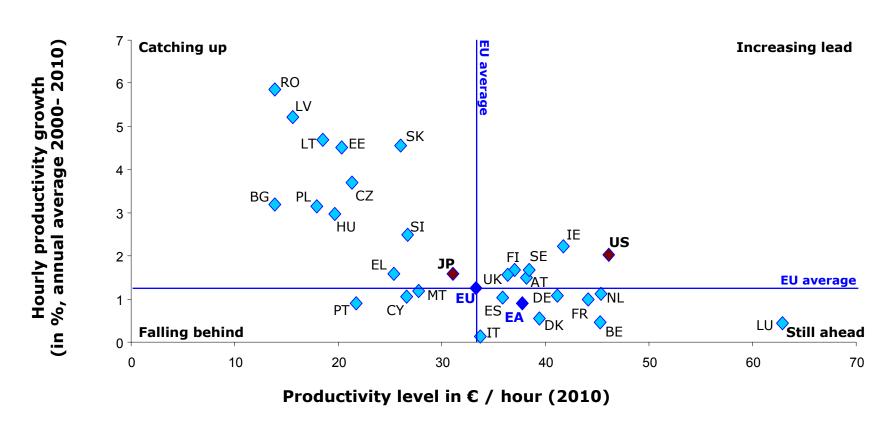

4. External and internal imbalances

Long-term performances vary across the EU

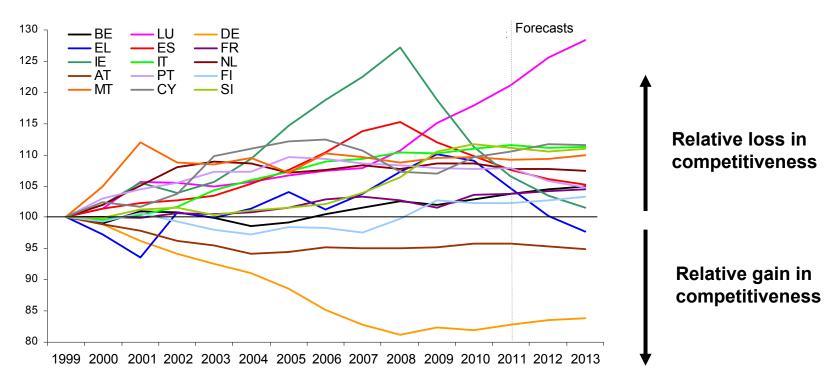

Productivity levels in 2010 and growth over 2000-2010

Cost trajectories have been very diverse

Real effective exchange rates* vis- \dot{a} -vis the Euro area average (Euro area = 100)

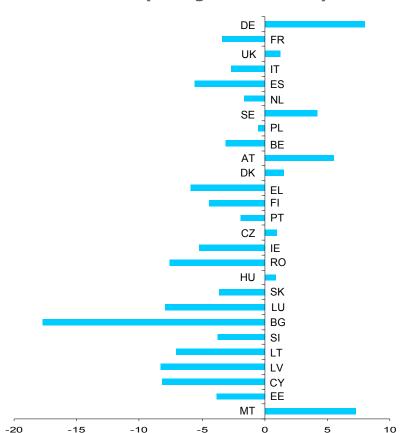

^{*} This indicator measures changes in price competitiveness relative to other countries. EE and SK missing due to high values: 145 and 183 respectively in 2011.

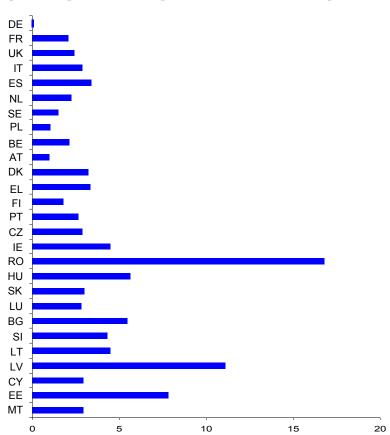

Internal imbalances increased prior to the crisis

Current account as a % of GDP (change 2000-2008)

Nominal unit labour costs (average annual growth 2000-2008)

Note: The current account is the sum of the balance of trade (exports minus imports of goods and services), net factor income (such as interest and dividends) and net transfer payments. Nominal Unit labour costs (ULC) measure the average nominal cost of labour per unit of output.

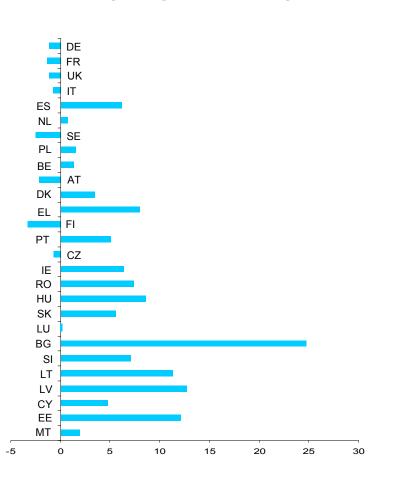

Growth in nominal ULCs shows the pace of growth of nominal wages relative to productivity.

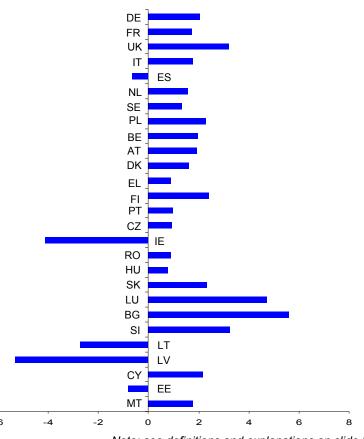

Corrections are taking place in recent years

Current account as a % of GDP (change 2008-2011)

Nominal unit labour costs (average annual growth 2008-2011)

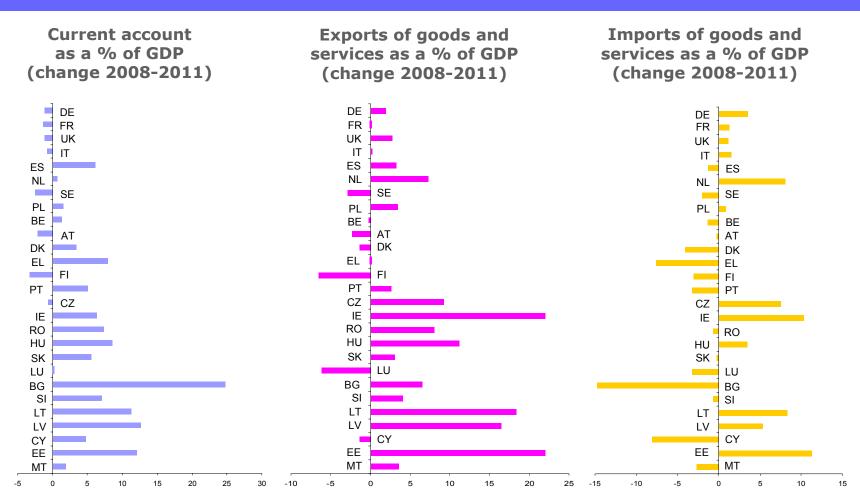

Note: see definitions and explanations on slide 30

Low demand/imports for most, rising exports for some

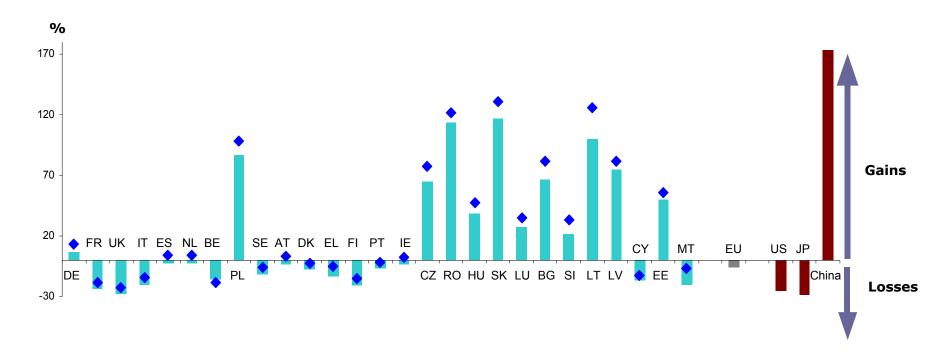

Note: see definitions and explanations on slide 30

Competitiveness is key to EU's global position

Export performance 2000-2010

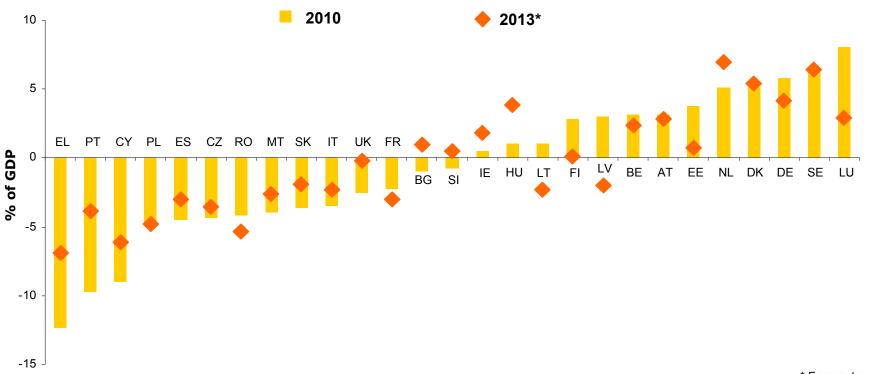

- Changes in the share of the world export market (in %, 2000-2010)
- Changes in the share of the total exports of EU countries (in %, 2000-2010)

Current account imbalances remain wide

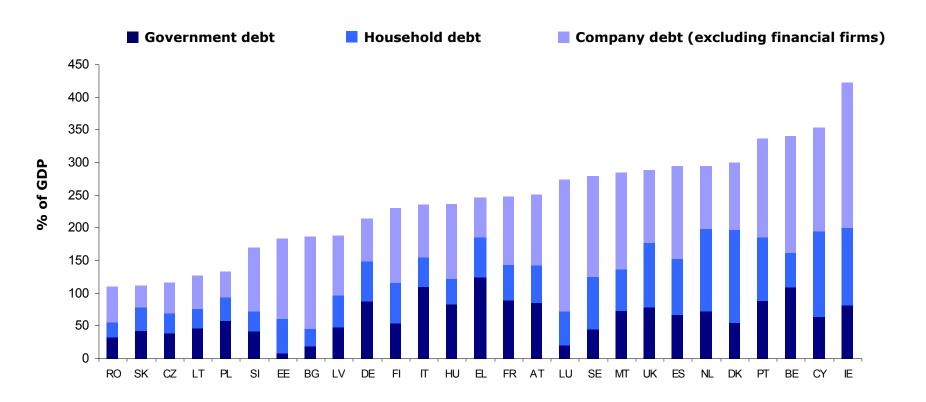

Current account balance as a % of GDP

Rooms for manoeuvre are constrained

Stock of debts in the economy* (in % of GDP, 2010)

^{*} These amounts do not take account of the value of assets and capacity to pay back of the various actors

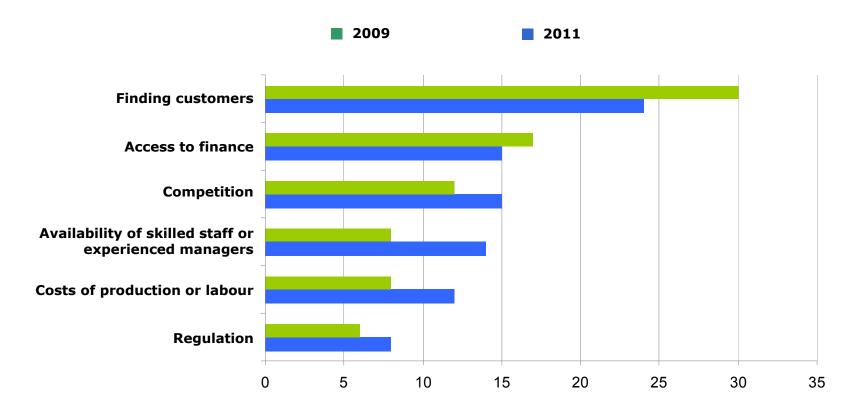

5. Business environment

Entrepreneurs face many challenges today

What is the most pressing problem your firm is facing?

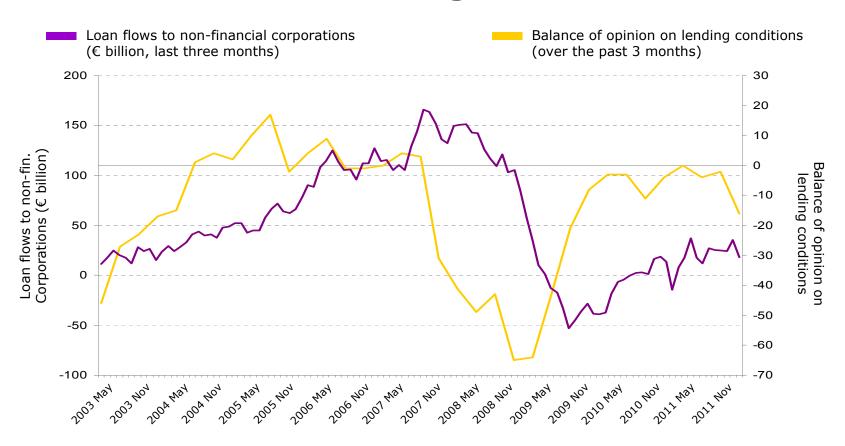

(all SMEs in the EU, %, survey from December 2011)

Financial conditions are tight

Loan flows to non-financial firms and bank lending conditions

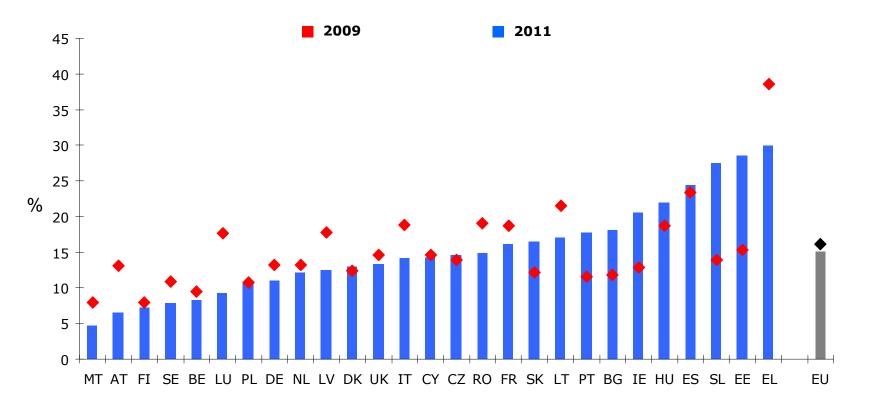

Access by firms to finance is an issue in many countries

Share of companies considering that the most pressing problem is access to finance

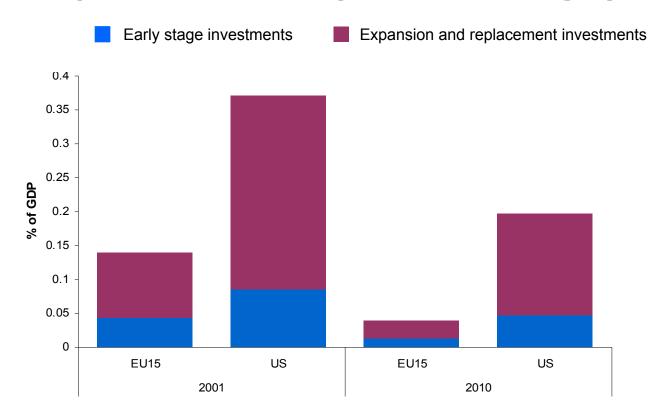

(all SMEs in the EU, %, survey from December 2011)

Venture capital is in short supply in Europe

Venture capital investments by investment stage (% GDP)

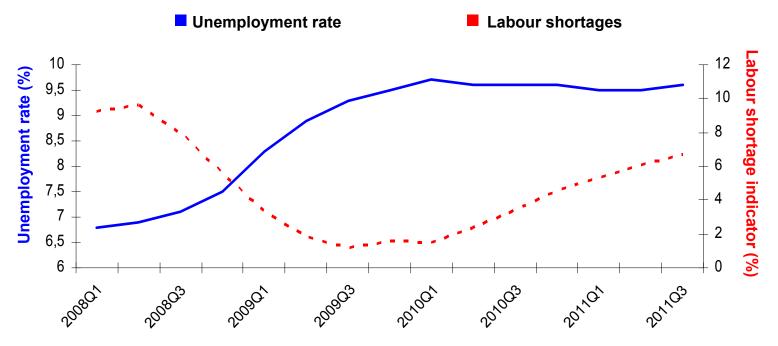

EU firms have traditionally much less access to venture capital than their US counterparts. The crisis has further limited access.

Labour mismatches may hinder recovery

Evolution of unemployment rate and labour shortages in the EU

(labour shortage = % of manufacturing firms indicating labour as a factor limiting the production)

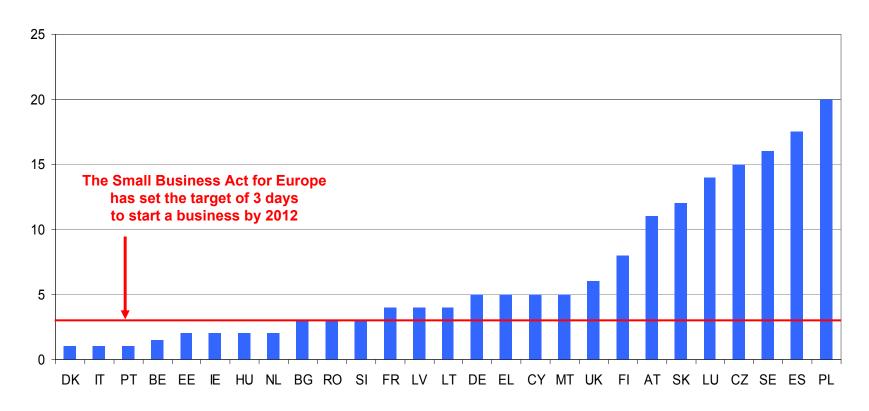

While unemployment was reaching very high levels, unfilled vacancies also started to increase as of end 2009. This points to labour market mismatches, such as limited mobility or inadequate skills, across EU sectors and regions.

Reducing red tape (1)

Time to start a business (calendar days)

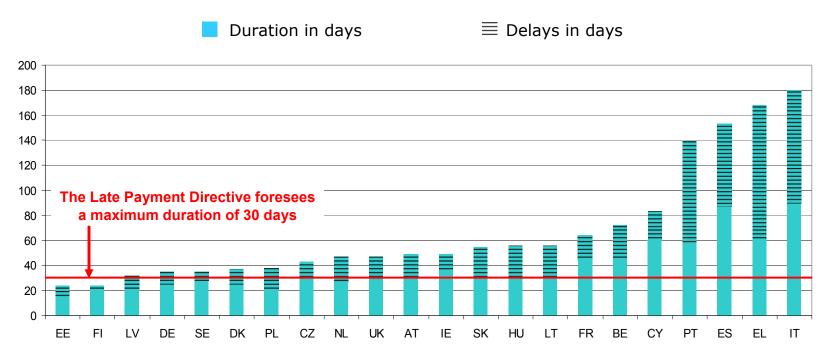

It currently takes 6.5 days to start a business in Europe, at a cost of € 400. The agreed EU target is 3 days by 2012, for less than € 100.

Reducing red tape (2)

Average payment duration of bills by public administrations to business, including delays, in number of days in 2011

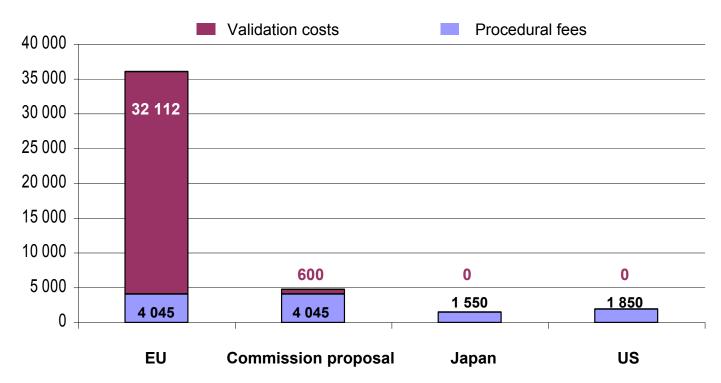

Late payments, including delays, are a major obstacle for firms to manage cash flows. Payments take several months in some countries, and large differences exist across the EU. The Late Payments Directive will help to tackle this problem.

EU patenting costs could drop drastically

Cost of patenting in Europe compared to elsewhere in the world (in €)

Today, the average EU costs of patenting is approximately € 35 000. Such costs could be reduced by 80% if the proposed "unitary patent" system is adopted.
