Sata International
Spanair
TAP
Tarom
TUIfly
Virgin Atlantic

¹ The health check is a fact-finding study looking at the overall situation in the airline industry. Its findings have given rise to a political initiative of the Commission in order to improve compliance with the items on the checklist. These findings and the follow-up activities of the Commission do not constitute the allegation of an infringement. Only national enforcement authorities are in a position to formally investigate infringements.

Airlines providing commitments that issues raised by the health check have already been addressed or will be addressed shortly to ensure that all standards are fully met
