Chapter 1 - Introduction

1. Preliminary note

The objective of this report is to present the main findings of the survey for **Malta**. It details consumers' satisfaction with various aspects of each of the 8 product markets i.e. fresh fruit and vegetables, non-alcoholic beverages, meat, information and communication equipment, other household electrical equipment, entertainment and leisure goods, new motor vehicles and clothing and footwear.

For each question asked in the questionnaire, a chart presents the national results compared to EU average and for each of the product markets.

The main indicator used in the analysis (which is widely admitted amongst the research experts' community) is the percentage of satisfied and dissatisfied consumers, based on the scores given on a scale from 1 to 10. "Satisfied" are those who gave a satisfaction score of 8 to 10; "dissatisfied" are those who gave a score of 1 to 4. For the clarity of the analysis, we do not show the neutral consumers on the charts or those who could not give an answer to the question ("don't know"). This is why the figures shown in most of the charts do not add up to 100%.

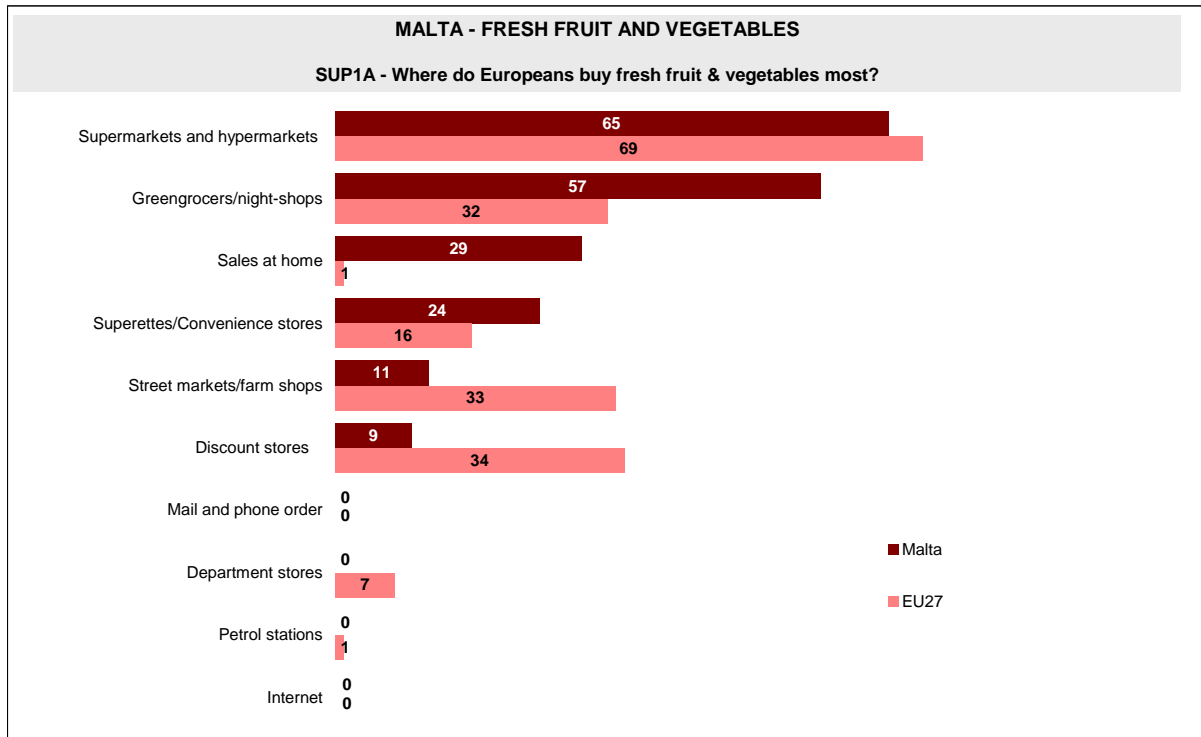

For more information, the reader will find the overall report and full results of the survey as well as a methodological note on DG SANCO web site:
