

**Development Paper  
No. 2010/01**

**Budget Support  
and  
MDG Performance  
Annexes**

**March 2010**

"Development Papers" are informal discussion papers written by staff of the Directorate General for Development and Relations with African, Caribbean and Pacific States (DG DEV) or by experts working in association with them. The series intends to increase awareness of the EU policy thinking on development issues and to seek comments and suggestions for further analyses. Views expressed represent exclusively the positions of the authors and do not necessarily correspond to those of the European Commission.

**European Commission  
Directorate-General for Development  
and Relations with African,  
Caribbean and Pacific States**

Notes:

Region: 1 = African ACP, 2 = Caribbean and Pacific ACP; 3 = other (all non ACP member states).

[but Anguilla, Tokelau, Turks and Caicos (not formally part of the ACP group of countries) were inadvertently included as ACP countries in the "further analysis" section of this study].

Income group: 1=LIC; 2=LMIC; 3=UMIC; no number = other.

Table A2: Summary statistics - General Budget Support data

A. Correlations between GBS aid ratios

NB: this illustrates the sensitivity of the results to the precise threshold between high and low GBS countries. For example, the inferior performance of high GBS/ODA countries with respect to MDG indicator 4.1 in this ACP-LIC sample effectively disappears if the percentile boundary is set at 66.6% instead of 66.7% (which pushes Rwanda up from the low group to the high group of countries).
