Question

We are planning to submit a tender with subcontractors. Having read through the tender specifications, it is clear that subcontractors need to provide the following:

- all information for completing section 1.3 of the Letter of Submission of Tender
- documents required under 'economic and financial capacity' and 'technical capacity'

Is the above the only administrative information/documentation that subcontractors need to provide?

Answer

The following documents/information should be provided in case of sub-contracting:

- the information in relation to the selection criteria under point 13.4 of the Invitation to Tender (economic and financial capacity + technical capacity)
- the identity of all subcontractors should be provided under section 1.3 in the Letter of Submission to Tender (Annex III).

Furthermore, the methodology proposed in your offer must indicate clearly which parts of the work will be sub-contracted.
