The mission of the JRC:

The mission of the Joint Research Centre is to provide customer-driven scientific and technical support for the conception, development, implementation and monitoring of European Union policies. As a service of the European Commission, the Joint Research Centre functions as a reference centre of science and technology for the Union. Close to the policy-making process, it serves the common interest of the Member States, while being independent of special interests, whether private or national.

©European Commission 30/10/2007

The JRC

The Joint Research Centre (JRC) is a Directorate General of the European Commission and has 7 scientific institutes spread over 5 sites in Belgium, Germany, Italy, The Netherlands and Spain.

The JRC acts in collaboration with its European partners as scientific and technological reference centre for the European Union in diverse areas like environment, consumer protection and nuclear energy as well as agriculture, fisheries and internal and external security. The JRC also gives support to community policies like research, education, external relations, enlargement of the EU and support for development in third countries.

VINNOVA (Swedish Governmental Agency for Innovation Systems) is a State authority that aims to promote growth and prosperity throughout Sweden. Our particular area of responsibility comprises innovations linked to research and development. Our tasks are to fund the needs-driven research required by a competitive business and industrial sector, and to strengthen the networks that are such a necessary part of this work.

European Programmes at VINNOVA is the main Swedish National Contact Point, NCP, for the European Framework Programme and is responsible for the information dissemination in Sweden. We provide information and advice to Swedish universities and colleges, large and small enterprises, government agencies, research institutes, municipalities, guest researchers and others.
