

Comment om: Citizens Initiative

for publication - gladly with a response by you!

How to make a proper Citizens Initiative

1. If I write as **an individual** to a Commissioner or Commissioner staff and my idea seems good enough to take up, you'll presumably take it up
2. If I get **a million** signatures for the same, the same happens

conversely

if you don't like the idea, 1 billion signatures makes **no difference**

The right way:

A million (or whatever) signatures should earn the right of the proposal to be **launched to the Parliament and Council of Ministers**

just like an ordinary Commission proposal.

Of course that means that these democratically elected representatives can still modify/block it (again, as with your own proposals) - but at least it gets taken up for scrutiny.

This is just another meaningless EU propaganda job.

I certainly doubt that a proposal to abolish the Commission

- the first thing that should be done - would be taken up by your good selves 😊
