Subject: EU 2020 Strategy

European Commission
Secretariat General
Unit D1

Riga Municipal Agency „Riga Energy Agency” (REA) together with the Advisory Board of Energy Supply Experts of Riga City comprised of 16 leading scientists and experienced Latvian experts in the field of energy and housing has evaluated the “EU 2020 strategy” presented by President of the Commission Mr Barroso.

REA and the Advisory Board strongly support the initiative and endorse its adoption by the Heads of State and government.

REA and the Advisory Board of Energy Supply Experts of Riga City propose to amend the EU 2020 strategy with the following fording adopted at the January 8, 2010 (minutes available in Latvian at the http://www.rea.riga.lv/LV/konsultativa_padome.html).

Proposal suggests stressing creation of new industries and facilitating their distribution across European Union, encouraging this process by instruments to be provided by European Commission, in order to reach harmonised development leading to sustainability and development in all Member States including stimulating growth in economically most vulnerable countries.

Sincerely yours,

Dr.sc.ing. Maija Rubina
