

## **II. Training Course for the Young Entrepreneurs Dealing Under the Unstable Economic Circumstances**

International Labor organization; in its report about the global employment tendencies, had mentioned and claimed its' worries about the disturbances in the financial credit markets and rising petrol prices which will affect inconveniently the following ten years. Even though that in their report, the global economic growth rate is indicated as 5.2% and with the creation of 45 million new jobs, it is observed that these following advancements actually had not relatively affected the enlargement of the employment.

While the most developed nations had been facing difficulties within this matter of employment, the report which is indicated by the "Istanbul free accountant financial counselor association" (ISMMMO), had been very worrying for the youth in Turkey as it being the youngest nation throughout the world. It is emphasized that, Turkey should create employment for 14 million people until 2010 to be able to achieve the European Union target, which has currently created only for 6 million people in 24 years by now.

After reading this depressing report, it is not possible just to read and then give it away. Shaping the future is in our hands. It is especially essential to consider the unemployment and career problems of the youth. We should target on a better future for the following ten years as the youth from all around the world. We need creative and intensive new ideas for creating new jobs, career planning, education strategies and employment policies.

As a result of the training course that we will be carried out with the collaboration of some institutions which are associating with our project, we will be able to share our knowledge and experiences on what all we can do in our own countries. People from all around Turkey will participate in this program which will last in 7 nights and 8 days which is intended to happen between the 20<sup>th</sup> till 27<sup>th</sup> of May 2009. The courses will be about; personal development, crisis management and life coaching-NLP training. Also, there will be the presentations of the individuals whom are experienced in human resources and are successful not only in Turkey but also world widely. For our project associates, there will be given a training certificate from the "Youth Pass" and "Marjinal Akademi Eğitim ve Danışmanlık Company". Their transportation expanses will be covered up to 70%, visa and food expanses will be covered up to 100 %. Please contact to the following people for the exceptional costs.

Our project will be ready for 1 February which will be the beginning of the application period. All the applications will be evaluated and the results will be informed to your side, immediately. **And the project time is between 13-19 September at Yalova. You can see the place where we will do our project from this link: <http://www.yalovatatilpark.com/>**

Our project includes the organization of a career and employment training course for the youth of all around the world whom will be facing employment problems in the following ten years. The individuals whom would be participating in this program will be informing the youth and related actors of their own nations and will be creating the strategies of the following ten years.

Our mission is to enhance the quality in the matters of entrepreneurship, job finding and business development with the help of creating an international dimension. We are aiming to increase the knowledge level by creating a competitive environment among the youth, by discussing the ways of how to shape and discover the future. Because of unemployment, we are forced to live in different cultures which we don't even know their languages, therefore as a team with all the associates of this project, all together we say that;

"We want to have job and career opportunities which will give us the chance to develop ourselves by improving our own resources, based on production, and without letting the young brains migrate." Therefore to make this happen, it is essential to be educated. We want to help and support young people who are facing with problems because of economic crisis. We don't like the idea of people doing any kind of job just because of need and being unhappy because of it. Therefore we are meeting in Turkey to be able to learn how to combat with these career and employment problems. At the end of this one week training course, when we get back to our own countries we will be able to be a part of the solution by sharing our knowledge that we gain from this program.

The institutions which would like to associate for this project;
