CORRESPONDENCE BETWEEN ABB CLASSIFICATIONS OF BUDGETS 2007 AND 2006	p. 108
---	--------

I INTRODUCTION

This overview includes all evaluations completed for the years 2002-2007, presented per ABB activity. The title of each evaluation is provided together with the ABB number and the year in which the report was published. Further details are presented in the Annual Evaluation Reviews for the corresponding years¹. Evaluation is in this context used broadly to cover both evaluations and Impact Assessments.

The purpose of this overview is multiple: provide background information for planning new evaluation, identify existing evaluation information on ABB activities, assess the extension to which Commission policies have been adequately covered by evaluation, etc.

The ABB classification is that used in the 2007 Budget². The correspondence of the changes introduced in the ABB structure of the 2007 Budget as compared to 2006 is presented in the annex. Some of the evaluations reported in the years before 2007 concerned ABB activities that do not exist as such in the 2007 EU budget. These evaluations have been reincorporated in accordance with the breakdown to ABB activities used in the 2007 EU budget.

ABB activities without budget lines (AWBL) and ABB activities relating to administrative expenditures have been included in this document only if they had been subject to evaluation activities during the years covered by this overview.

The total number of evaluations reported on in this document for the period 2002-2007 is about 995. There are 203 evaluations from 2007 concerning the 140³ ABB activities of the 2007 Budget. Of these evaluations 120 were retrospective and 83 prospective⁴. Only 19 ABB activities with budget lines were not evaluated during the period 2002 to 2007 and they may have been affected by cross-cutting evaluations.

² Official Journal of the European Union L77, Vol. 50 of 16 March 2007

³ Excluding the ABB activities relating to *administrative expenditures (01)* not evaluated in the period.

⁴ Evaluations that cover more than two activities are classified as cross-cutting evaluations. Evaluations covering two activities are assigned to both activities.
