Webzine "Build Connect Grow" on Cross-Border Public Services

Published by Newsroom Editor on 30/05/2012

Beyond their economic impact, digital technologies also play a vital role in improving people's daily lives. They provide better access to information, enhance efficiencies and facilitate links between citizens, businesses and governments. Governments and businesses are looking for increasingly clever ways to encourage economic growth and save money for both themselves and citizens. The Large-Scale Pilots (LSPs) have been developed by the European Commission in close cooperation with EU Member States, industry, national administrations and local communities. This collaborative process ensures that all Europeans benefit from Europe's commitment to developing ICT and the Digital Single Market. The second edition of the "Build Connect Grow" webzine, looking at the accomplishments of LSPs, is now available.
