ICT 2013 is an opportunity for students and young researchers to learn about ICT research opportunities and meet with researchers, entrepreneurs, strategy and policy makers.

Students and young researchers will have different roles at ICT2013:

- [Student ambassadors](#) [1] will report about ICT2013 online. They will meet high-level policy makers, Digital champions, Young advisors, top researchers, and successful entrepreneurs.
- A dedicated students' corner will have speakers for young audience, and host conversation meetings between conference delegates and the young participants, as well as three days of [ICT project demonstrations and presentations](#) [2] by and for young students and innovators. Each day will feature a different group of projects
 - Wednesday will feature project winners from Campus Party Europe and Young Rewired State as well as several FP7 projects of interest to students and educators.
 - Thursday is dedicated to finalists from the [Student ICT research project competition](#) [3] who have been invited to Vilnius to present their work with the best projects being judged and awarded prizes by a jury.
 - Friday will showcase local Lithuanian student ICT projects.
- In the context of ICT2013, [StartUp Lithuania](#) [4] will be organising a [hackathon](#) [5] on challenges relating to Horizon2020. Participating students and young innovators will work in the students' area and be in contact with other teams working simultaneously in other cities in Europe.
- The [Lithuanian presidency](#) [6] has organised tours of local students to come and experience the ICT2013 event. They, with the help of [Global Shapers Community](#) [7], and [Grand Coalition for Digital Jobs](#) [8] have also arranged for visits to local schools to encourage ICT skills and careers, and will kindly host a welcome event for the Student Ambassadors and ICT research project competition finalists before the conference starts.

And if you cannot attend the event in person, follow us on [Facebook](#) [9] and on Twitter [@ICT2013eu](#) [10]!
