Using scenario analysis towards a new narrative for the role of ICT for growth in Europe, SMART 2012/0070

Published by Newsroom Editor on 30/10/2012

A call for tenders will be sent to 6 candidates identified by the European Commission for a service contract of a maximum value of € 60.000 on the subject "Using scenario analysis towards a new narrative for the role of ICT for growth in Europe". The main objective of the study is to bring together existing knowledge about ICT and growth to build scenarios, assessing which environments are most conducive to growth benefits induced by ICT. These scenarios should help to illustrate and understand the various policy levers in relation to ICT and growth in Europe and be developed through the medium term towards 2025, to inform the next digital agenda programme.
