Date:

From 19/07/2011 to 19/09/2011

Venue:

Speaker:

What are the benefits of Open Data?

Accessing, analysing, reusing, combining, and processing governmental data produces important benefits that can be grouped around two dimensions:

- **Transparency:** Open data is perceived as a powerful instrument to increase transparency in public administration, improving visibility on previously not accessible information, informing citizens and business on policies, public spending and outcomes.
- **New services and economic growth:** data combined in innovative and not initially foreseen ways enables new added-value services, boosting job creation, and resulting in substantial improvements in public service provision while contributing to economic growth.
