ICT in Leadership in Enabling and Industrial Technologies (LEIT) Work Programme

Published by Newsroom Editor on 10/12/2013

Key Enabling Technologies (KETs), ICT and Space are areas of key industrial competences determining Europe's global competitiveness.

The first ICT-Leadership in Enabling and Industrial Technologies (LEIT) Work Programme under H2020 combines a strong support to industrial roadmaps with new mechanisms to encourage disruptive innovation.

Venue:

Speaker:

The ICT part of the work programme provides a balanced response to the main challenges faced by Europe in the field, with a focus on the first 2 years on the following areas:

1. A new generation of components and systems
2. Advanced Computing
3. Future Internet
4. Content technologies and information management
5. Robotics
6. Micro- and nano-electronic technologies, Photonics

In addition, the Work Programme features several cross-cutting topics addressing cyber-security, Internet of Things and research on a Human-centric Digital Age. All activities are complemented with support to innovation and take-up, international cooperation and a dedicated action for SMEs to propose bottom-up innovative ideas, using the SME instrument.
