

ICT Proposers' Day Brazil-EU cooperation in ICT Research and Development

The event will run as part of the **ICT Proposers' Day, in Warsaw, Poland, on 26-27th September 2012**

Main objective and introduction

The main objective of the Networking session is to involve ICT research experts interested in **future EU-Brazil cooperation, in view of the new coordinated call** for research and development proposals in the ICT field, planned for this summer.

Areas of research concerned:

- cloud computing for science,
- sustainable technologies for smarter society,
- smart platforms for a smarter society,
- hybrid broadcast-broadband TV applications and services.

After the introduction of the call topics and of the rules for EU-Brazil cooperation under the ICT coordinated call, there will be one presentation on experience in EU-Brazil cooperation and short presentations ("Elevator Pitches") where experts and organizations will present their ideas, expressing their needs for future collaboration. They may also offer their expertise for potential future international consortium partnerships.

Finally, this event will support the networking between experts and organizations from the EU and Brazil and will stimulate the international ICT cooperation for the next coordinated call.
