**II.1.4) Short description of the contract or purchase(s)**

The main goal of the EU Cohesion policy 2007–2013 is to reduce social and economic disparities between the regions in the EU and to support the achievement of the Lisbon objectives for growth and jobs. Health has been included for a first time as a priority for investment by the Structural Funds (SF), European Regional Development Fund and European Social Funds, in the Cohesion policy 2007–2013. The purpose of this tender is to identify and collect information about how health considerations were taken into account in the designing and development of non-health SF investments in the period 2007–2013 and to develop tools which will enable it to support in a practical way better integration of health considerations in regional development and

subsequently, SF planning and implementation. This should include appropriate indicators for 'ex-ante' and 'ex post' evaluation of other sectors.

Such tools should be piloted across convergence, phasing-out, phasing-in and competitiveness and employment regions with a view to assessing the capacity and capability of regions to use the tool(s) and evidence in the context of integrated regional planning, SF operational programmes and related performance measurement. The aim is to support the use of the learning from the work under this tender to inform the review and development of relevant regional policies/strategies and monitor the progress of current and future SF programmes and funded projects. This programme should be structured in such a way as to ensure further dissemination of the deliverables of the tender to the target groups after the end of the tender, inter alia by the production of the related training structure and material template for future workshops, as well as an appropriate communications plan.

Additionally, the tender should also proceed to identify good practices in the way health-related and non-health related investments are linked together within the framework of a global strategy or regional master plan for ensuring growth and cohesion at the regional level.
