

# EUROPEAN COMMISSION DIRECTORATE-GENERAL FOR HUMANITARIAN AID - ECHO

# Humanitarian Aid Decision 23 02 01

<u>Title:</u> Recovery support to the most vulnerable populations affected by natural disasters in Grenada

Location of operation: GRENADA

Amount of Decision: EUR 1,200,000

Decision reference number: ECHO/GRD/BUD/2005/01000

#### **Explanatory Memorandum**

#### 1 - Rationale, needs and target population.

#### 1.1. - Rationale:

Within a short time-span of just 10 months, Grenada suffered twice from hurricanes.

#### Hurricane Ivan, September 2004

On 7 September 2004, Hurricane Ivan, one of the most powerful hurricanes to affect the Caribbean region in the last 10 years, hit Grenada with rain and winds of 220 kilometers per hour. Fully exposing the vulnerability of a small island state of some 100,000 inhabitants, it left behind a vast trail of destruction in the country.

Most of Grenada's population was affected to a greater or lesser extent. Four of the country's six parishes were completely devastated whilst the other two also sustained substantial damage. 37 people lost their lives as a result of the hurricane.

Approximately 50% of the houses were damaged or destroyed, and much of the country's infrastructure such as government buildings, schools, water supply and telecommunication was seriously affected. According to government estimates, some 50% of the population were deprived of their habitation and had to stay in public shelters, with relatives or friends, or reoccupy their damaged houses.

Ivan's passage had an enormous impact on the country's economy, and it will take many years to restore it. It has been estimated that the total damage is about twice the current value of the

GDP. Of particular concern for the agricultural sector, which contributes some 10% to the country's GDP, is the destruction of nutmeg which accounted for 80% of agricultural exports. It is assessed that the nutmeg will not be productive for, at least, the next 25 years. In the short term the destruction of the harvest of subsistence farming is even more crucial for the availability of food, in particular for the most vulnerable parts of the population.

In response to Hurricane Ivan ECHO, in 2004, adopted two funding decisions of EUR 1.5 million each, with the first one contributing to emergency response and the second one focusing on recovery support in the field of agriculture and repair of family homes. A roof repair programme is still ongoing. The needs identified by this project have shown that a significant percentage of the most vulnerable population still lives either in the open or in fragile houses that are unable to withstand tropical storm force winds. The repair of family homes has been progressing very slowly because of limited implementation capacity in the country and the high volume of assistance that had to be managed.

#### Hurricane Emily, July 2005

On July 14<sup>th</sup>, i.e. some ten months after Ivan passed Grenada, Hurricane Emily hit the island from 11pm to 4am. The Northern and North Eastern parts of the country were hit hardest with the islands of Carriacou and Petit Martinique taking the greatest damage. The parishes of Saint Patrick's and Saint Andrew's were affected by very strong winds<sup>1</sup>.

Flash floods hit the Western seaside squatter communities of Marquis and Soubise, and destroyed the coastal road in Antoine bay, already battered by Hurricane Ivan.

The damage to housing varied strongly according to the area, but was most extensive in the North and East. Those family homes which either had already been weakened by Hurricane Ivan in 2004, or in many cases even been destroyed and rebuilt with limited and inappropriate resources, were particularly severely damaged.

In the parishes of Saint Patrick's, Saint Andrew's and Carriacou/Petit Martinique, the impact of the hurricane was as bad as that of category 4 Ivan, and in some cases even worse than that. Fortunately, this time many homes were prepared, which resulted in an overall smaller extent of damage sustained. Nevertheless, the damage remains substantial, and does not bode well for the future, as Hurricane Emily damages have come in addition to those caused by Ivan. Furthermore, Emily has hit very early in this year's hurricane season, leaving many difficult months ahead for those who lost their roofs.

There was one loss of life resulting from the collapse of a home but no major personal injuries. Most of the service sites remained functional or resumed services within a few days of the event.

### 1.2. - <u>Identified needs</u>:

An ECHO field monitoring mission went to Grenada from 12<sup>th</sup> to 15<sup>th</sup> of April in order to assess the humanitarian situation in the disaster affected areas by Ivan, and to advise on ECHO's further support. One of the main conclusions of ECHO's mission was the need to increase the support to ECHO partners involved in the sectors of housing rehabilitation as

<sup>&</sup>lt;sup>1</sup> Sources: French Red Cross, CDERA and IFRC reports. ECHO/GRD/BUD/2005/01000

well as disaster preparedness. These conclusions are even more relevant now, since at the time the monitoring mission visited the island Emily had not yet arrived.

Needs for immediate emergency relief generated by the passage of Ivan and Emily were rapidly covered, mainly by domestic means with some support from the International Federation of the Red Cross and Red Crescent Societies (IFRC). However, as in 2004, a substantial part of the population have lost their habitation, or risk losing it as a result of the damage inflicted by the hurricane.

The vast devastations caused by the two hurricanes, and the insufficient response to date to needs in the housing sector, have left thousands of families without adequate housing, and their actual living conditions require further support. The most vulnerable families (single head of household families, elderly people) have very limited capacity to rehabilitate their homes, even if given free building material.

Table 1: Assessment of damage to housing Hurricane Ivan – Hurricane Emily comparison<sup>2</sup>.

#### 1.1. Parish of Saint Patrick's:

	Total	House with	Houses	Houses	Completely
	number of	no damage	requiring minor	requiring	destroyed
	houses		repair	major repair	
Hurricane Ivan	100%	30%	50%	20%	0%

Hurricane <b>Emily</b>	N/A	N/A	N/A	N/A	N/A
(estimates, based on	Most of				
an initial	the 2	N/A	Approx 300	Approx. 150	Approx 30
assessment)	islands				
	assessed				

In most cases the difference in damage sustained by houses in the same neighbourhood is a reflection of construction standards. Those constructed in negligence of good practice collapsed or were severely damaged, whereas those which were up to standard escaped with limited damage.

As a result of Hurricane Emily, in the Northern part of the island, most banana trees were destroyed, as were a great number of coconut trees. In some areas in Saint Andrew's, not a single tree has been left standing, reminiscent of the areas hardest hit by Hurricane Ivan.

The health facilities damaged during Hurricane Emily were generally those that were previously affected by Hurricane Ivan in 2004. In some instances, as in the case of the Richmond Home for the Elderly, temporary repairs were nearing completion when Emily struck, and in the case of the Princess Alice Hospital, reconstruction had recently begun<sup>3</sup>.

Based on the services in place, there are clear indications that the health sector was better prepared and equipped to cope in the wake of the Hurricane Emily than was the case after Hurricane Ivan. Communication links were maintained and there was no significant loss of drugs, equipment and supplies. However, the fall-out experienced has added to the previous burden inflicted by Ivan, placing a strain on available resources and the ability of public health staff to deliver the most appropriate services as needed.

Of the total damage suffered by Grenada's economy estimated at EC\$ 300.5 million almost two thirds (EC\$ 190 million) was sustained by the housing sector, followed by the agricultural sector with EC\$ 45 million.

In addition to supporting Grenadian populations in recovering from disaster there is also a need to include elements of disaster preparedness in recovery and rehabilitation measures.

4

<sup>&</sup>lt;sup>3</sup> Source PAHO. ECHO/GRD/BUD/2005/01000

#### 1.3. - Target population and regions concerned:

It is estimated that 1,678 families are in need of urgent support. The targeted group will be the most vulnerable population. Estimations from ECHO partners are the following:

Activity	No. Families	No. Beneficiaries
House rehabilitation	228	912
House strengthening	800	3,200
Disaster Preparedness	650	2,600
DP (trained comm. members)		350
TOTAL	1,678	7,062

#### 1.4. - Risk assessment and possible constraints :

The natural hazards that render Grenada vulnerable, such as tropical storms, could impede the implementation of the programs. Continuation of ECHO support to a partner who has responded since the first days of the emergencies and who has a solid network of local counterparts and a good knowledge of the country should allow for successful implementation of the proposed actions.

## 2 - Objectives and components of the humanitarian intervention proposed: 4

#### 2.1. - Objectives :

Principal objective: Recovery support to the most vulnerable populations affected by natural disaster

#### Specific objectives:

Assist hurricane stricken populations with recovery support and disaster preparedness action

#### 2.2. - Components:

- House rehabilitation and strengthening.
- Disaster preparedness

4 Grants for the implementation of humanitarian aid within the meaning of Council Regulation (EC) No.1257/96 of 20 June 1996 concerning humanitarian aid are awarded in accordance with the Financial Regulation, in particular Art.110 thereof, and its Implementing Rules in particular Art.168 thereof (Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002, OJ L248 of 16 September 2002 and No 2342/2002 of 23 December 2002, OJ L 357 of 31 December 2002).Rate of financing: In accordance with Art.169 of the Financial Regulation, grants for the implementation of this Decision may finance 100% of the costs of an action. Humanitarian aid operations funded by the Commission are implemented by NGOs and the Red Cross organisations on the basis of Framework Partnership Agreements (FPA) (in conformity with Article 163 of the Implementing Rules of the Financial Regulation) and by United Nations agencies based on the Financial and Administrative Framework Agreement (FAFA). The standards and criteria established in Echo's standard Framework Partnership Agreement to which NGO's and International organisations have to adhere and the procedures and criteria needed to become a partner may be found at http://europa.eu.int/comm/echo/partners/index\_en.htm ECHO/GRD/BUD/2005/01000

#### 3 - Duration expected for actions in the proposed Decision:

The duration of humanitarian aid operations shall be 15 months.

Humanitarian operations funded by this decision must be implemented within this period.

Expenditure under this Decision shall be eligible from 01 October 2005.

Start Date: 01 October 2005

If the implementation of the actions envisaged in this Decision is suspended due to *force majeure* or any comparable circumstance, the period of suspension will not be taken into account for the calculation of the duration of the humanitarian aid operations.

Depending on the evolution of the situation in the field, the Commission reserves the right to terminate the agreements signed with the implementing humanitarian organisations where the suspension of activities is for a period of more than one third of the total planned duration of the action. In this respect, the procedure established in the general conditions of the specific agreement will be applied.

#### 7 - Evaluation

Under article 18 of Council Regulation (EC) No.1257/96 of 20 June 1996 concerning humanitarian aid the Commission is required to "regularly assess humanitarian aid operations financed by the Community in order to establish whether they have achieved their objectives and to produce guidelines for improving the effectiveness of subsequent operations." These evaluations are structured and organised in overarching and cross cutting issues forming part of ECHO's Annual Strategy such as child-related issues, the security of relief workers, respect for human rights, gender. Each year, an indicative Evaluation Programme is established after a consultative process. This programme is flexible and can be adapted to include evaluations not foreseen in the initial programme, in response to particular events or changing circumstances. More information can be obtained at:

http://europa.eu.int/comm/echo/evaluation/index\_en.htm.

#### 8 - Budget Impact article 23 02 01

-	CE (EUR)
Initial Available Appropriations for 2005	476.500.000
Supplementary Budgets	100.000.000
Transfers	-3.500.000
Total Available Credits	573.000.000
Total executed to date (as at 28/07/05)	461.641.370
Available remaining	111.358.630
Total amount of the Decision	1 200 000

#### **COMMISSION DECISION**

of

# on the financing of humanitarian operations from the general budget of the European Union in

**GRENADA** 

#### THE COMMISSION OF THE EUROPEAN COMMUNITIES.

Having regard to the Treaty establishing the European Community, Having regard to Council Regulation (EC) No.1257/96 of 20 June 1996 concerning humanitarian aid <sup>6</sup>, and in particular Article 14 thereof,

#### Whereas:

- (1) Within only 10 months Grenada was struck twice by hurricanes, and both caused wide-spread damage;
- (2) Whilst most of the affected population's short-term needs in terms of food, water, sanitation and non-food items have been met, there is extensive need for recovery support, in particular as regards the repair of family homes;
- (3) This recovery support should also include disaster preparedness actions so as to render populations less vulnerable to future disaster;
- (4) An assessment of the humanitarian situation leads to the conclusion that humanitarian aid operations should be financed by the Community for a period of 15 months;
- (5) It is estimated that an amount of EUR 1,200,000 from budget line 23 02 01 of the general budget of the European Union is necessary to provide humanitarian assistance to the hurricane victims in Grenada, taking into account the available budget, other donors' contributions and other factors.

#### HAS DECIDED AS FOLLOWS:

#### Article 1

- 1. In accordance with the objectives and general principles of humanitarian aid, the Commission hereby approves a total amount of EUR 1,200,000 for humanitarian aid operations to support the most vulnerable populations affected by natural disasters in Grenada by using line 23 02 01 of the 2005 general budget of the European Union.
- 2. In accordance with Article 2 (a) of Council Regulation No.1257/96, the humanitarian operations shall be implemented in the pursuance of the following specific objectives:

Assist hurricane stricken populations with recovery support and disaster preparedness action

The total amount of this decision is allocated to this objective.

#### Article 2

- 1. The duration for the implementation of this decision shall be for a maximum period of 15 months, starting on 01 October 2005.
- 2. Expenditure under this Decision shall be eligible from 01 October 2005.
- 3. If the operations envisaged in this Decision are suspended owing to *force majeure* or comparable circumstances, the period of suspension shall not be taken into account for the calculation of the duration of the implementation of this Decision.

#### Article 3

This Decision shall take effect on the date of its adoption.

Done at Brussels,

For the Commission

Member of the Commission
