

BUSINESS AND CONSUMER SURVEY RESULTS

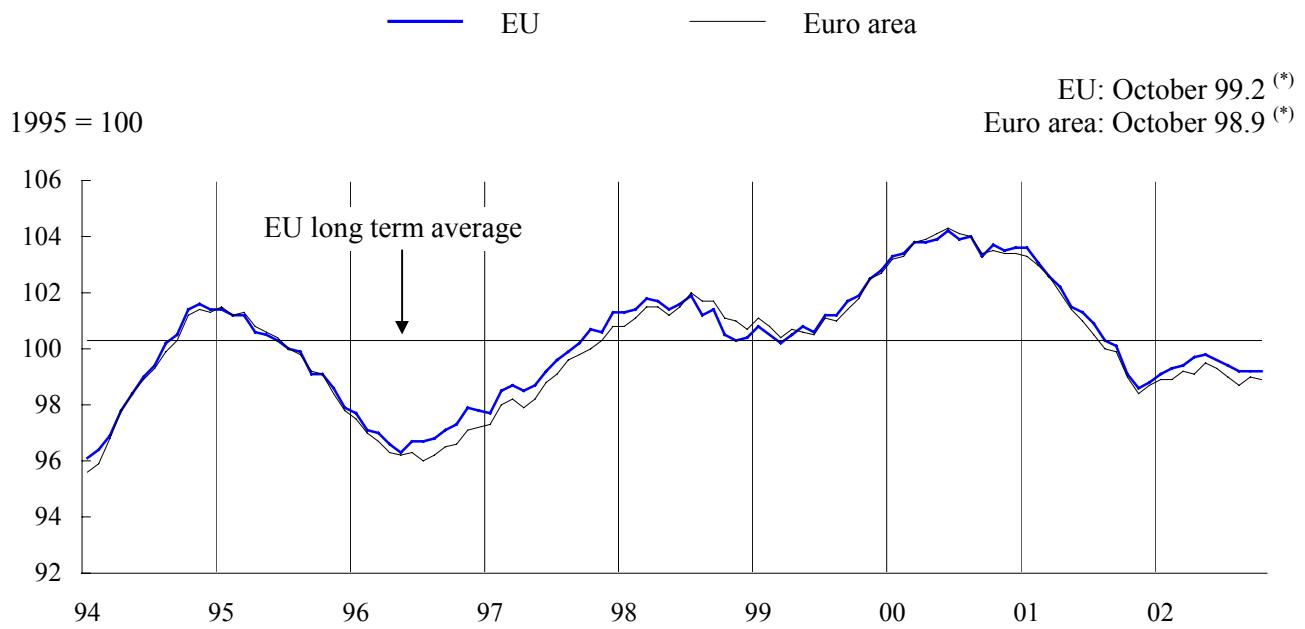

October 2002

Next publication of Business and Consumer Survey Results scheduled for 29 November 2002

http://europa.eu.int/comm/economy_finance/indicators/businessandconsumersurveys_en.htm

EMBARGO 12h00 CET

GRAPH 1: **Economic sentiment indicator (s.a.)**

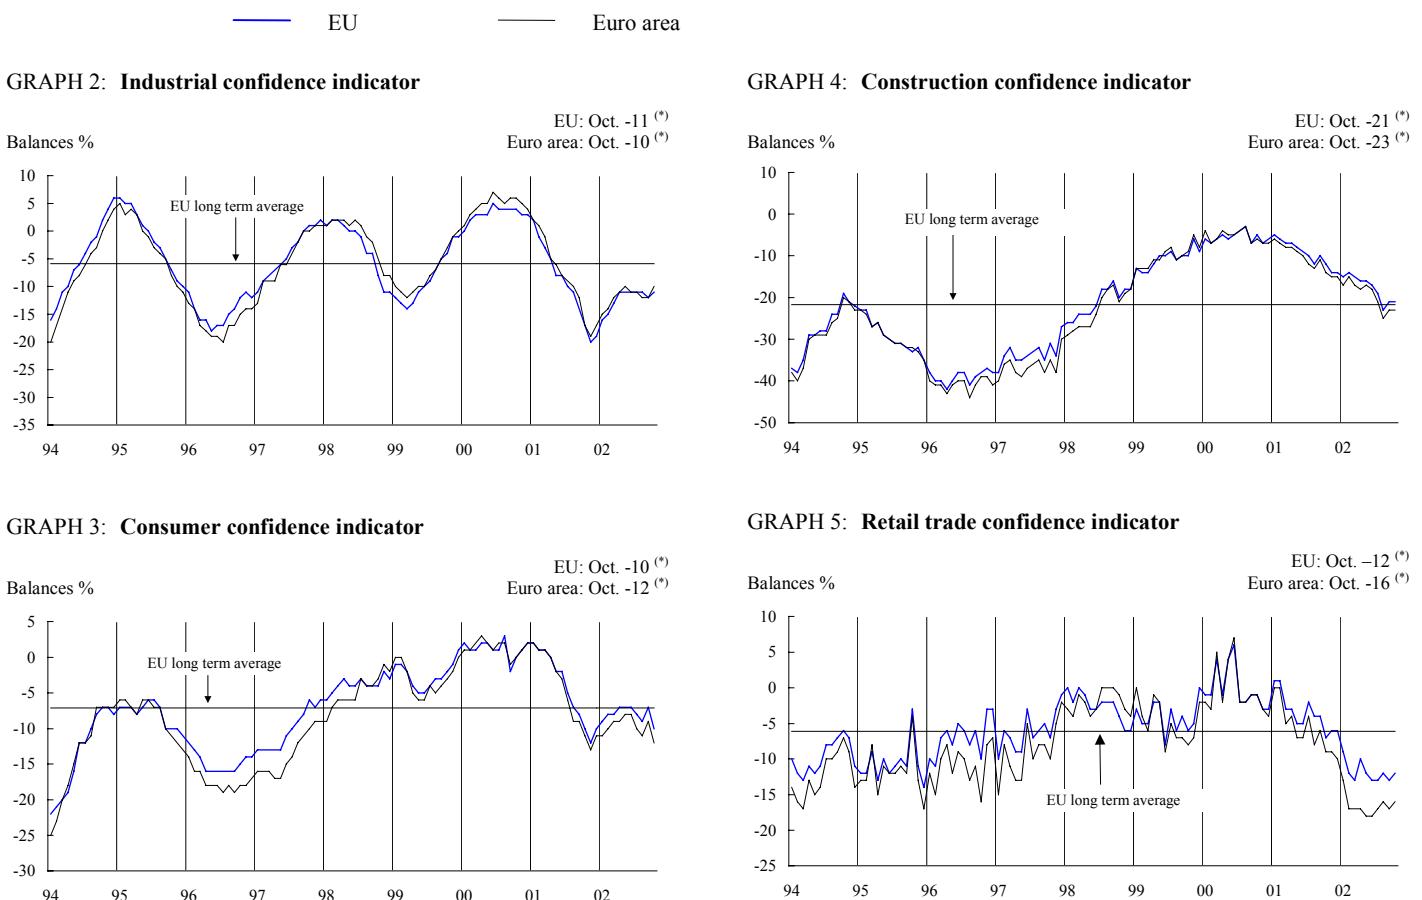

(*) Provisional data

Economic sentiment remained unchanged in the EU

The **economic sentiment indicator** remained unchanged in the EU in October 2002 reaching a value of 99.2. In the euro area, the indicator decreased marginally by 0.1 percentage points, from 99.0 in September to 98.9 in October. The economic sentiment indicator rose in *Denmark* (0.5 percentage points), *Ireland*, *Austria* and *United Kingdom* (0.4 percentage points), and *Greece* (0.3 percentage points), while it remained unchanged in *Spain* and *France*. The indicator decreased in the *Netherlands* (0.7), *Portugal* (0.5), *Italy*, *Sweden* (0.3) and *Belgium* (0.2), and to a lesser extent in *Germany* and *Finland* (0.1).

GRAPHS 2-5: Economic sentiment indicator components (s.a.)

(*) Provisional data

These developments concealed marked differences in the components. While the *consumer* confidence indicator recorded a significant fall by 3 percentage points, the *industrial* and *retail trade* confidence indicators increased slightly in both the EU and euro area. The *construction* confidence indicator remained unchanged.

The ***industrial confidence indicator*** increased in both the EU and the euro area by 1 and 2 percentage points, respectively. Industrialists' confidence increased in *Austria* (6 points), *France* (4 points), *Luxembourg* (3 points), *Denmark*, *Germany*, *Greece* and the *UK* (2 points) while it decreased in *Finland* and *Sweden* (5 points), *Ireland* (3 points), *Belgium* and the *Netherlands* (2 points), and, to a much lesser extent, in *Portugal* and *Italy* (1 point). In *Spain*, industrial confidence remained stable.

Behind the increase of industrial confidence is an increase in *production expectations* and *order books* and a fall in *stocks of finished products*. Part of the increase in *order books* is attributable to the positive evolution of the external sector (*export order books*).

Production expectations increased in the EU and the euro area by 2 and 1 points, respectively. Positive developments in *France* and *Austria* (7 points), the *United Kingdom* (6 points), *Germany*, and *Denmark* (3 points) are behind the improvement in both aggregates.

Order books were highly variable across Member States. While in most countries the improvement of the balances was reasonable (from 2 to 3 percentage points), in *Denmark* and *Austria* *order books* increased significantly (6 and 8 points respectively). However, industrialists' confidence in *Italy* and *Finland* deteriorated noticeably. *Stocks of finished products* decreased moderately in *Spain*, *France* and the *UK* and to a larger extent in *Greece*, *Italy* and *Luxembourg* but went up significantly in *Sweden*. While opinions about *production trends observed in recent months* pointed to a deterioration in many Member States, they improved considerably in *Ireland*, *Belgium*, *Denmark*, *Austria* and the *Netherlands*. *Employment expectations* developed unevenly across Member States. *Selling price expectations* increased in both the EU and the euro area.

The **consumer confidence indicator** decreased in both the EU and the euro area by 3 percentage points. Consumer confidence decreased in *Germany* (6 points), *Portugal*, *Sweden* (5 points), *Italy* and *Finland* (3 points), and to a much lesser extent in *Spain*, *France*, *Ireland*, *Austria* and the *UK* (1 point). It remained unchanged in *Greece* and the *Netherlands*. The indicator slightly increased in *Belgium* (1 point) and more significantly in *Denmark* (3 points).

The expected developments of the *general economic situation* and consumers' expectations regarding their *financial situation* and *savings over the next 12 months* deteriorated. Moreover, expectations about *unemployment over next 12 months* increased in both the EU and the euro area.

The most notable changes in consumers' expectations for the *general economic situation* between September and October concerned *Germany*, *Portugal* and *Sweden*, where a substantial deterioration occurred, and the *Netherlands*, where expectations improved clearly.

Consumers' expectations on their *financial situation over the next 12 months* worsened in a majority of Member States. They improved in *Greece* and remained stable in *Belgium*, *Spain*, *France* and *Austria*.

Developments in *unemployment expectations* were uneven across Member States. While a small decline occurred in *Denmark*, and to a lesser extent in *Belgium*, *Ireland* and *Austria*, *unemployment expectations* increased in *Germany*, *Italy*, *Portugal*, *Finland* and *Sweden*.

Most European consumers expect an increase of inflation pressures. Balances for *price trends over the next 12 months* rose in the EU and in the euro area by 2 and 1 percentage points respectively. This is largely explained by developments in *Germany*, *Italy* and the *UK*.

The **construction confidence indicator** remained stable in both the EU and the euro area. However, cross-country differentials are large. While the indicator decreased in *Germany*, *France*, *Italy*, *Luxembourg*, *Portugal* and *Sweden*, it improved in *Belgium*, *Denmark*, *Ireland*, *Austria*, *Finland* and the *UK*. In the euro area, such developments in the construction sector are attributable to the small rises observed in *employment expectations*, which were compensated by a slight decrease in *order books*; in the EU these two components remained

more stable. The assessment of the *current activity trend compared with preceding months* changed in a negative direction. A majority of the managers in the sector do not expect an increase of inflationary tensions in the future.

The **retail trade confidence indicator** increased by 1 percentage point in both the EU and the euro area. The positive perception of the *present economic situation* is behind the improvement of retailers' confidence. Such positive developments of the *present business situation* in the retail sector are more pronounced in *Denmark*, *Germany*, *Greece*, *Finland* and the *UK*. The *expected economic situation* worsened in *Greece*, *France* and *Portugal* while it improved in *Italy* and the *UK*. *Employment expectations and intentions of placing orders* decreased in both the EU and the euro area.

The **services confidence indicator** decreased in both the EU and the euro area by 5 and 4 percentage points respectively. This negative evolution of confidence among the managers in the services sector is mainly due to the worsening of the *assessment of the business climate* and the *evolution of demand in recent months*. However, the percentage of managers having a positive assessment of the *expected evolution of demand* increased in most countries. By contrast, the assessment of both *recent* and *expected evolution of employment* showed a negative development in both the EU and the euro area.

The *industrial* confidence indicator for the **accession countries** as a whole remained unchanged. Confidence indicators increased for *consumption* and *construction*, while confidence decreased slightly for the *retail sector*. The confidence indicator in the *industrial sector* decreased in *Bulgaria*, *Estonia* and *Poland*. It improved in the rest of the accession countries, especially in the *Czech Republic* and in *Lithuania*. *Consumer confidence* improved substantially in *Bulgaria* and *Cyprus*, and slightly in *Latvia*, while it remained unchanged or decreased in the rest of the accession countries. The *construction confidence indicator* increased in *Bulgaria*, *Hungary*, *Latvia*, *Lithuania*, *Romania* and *Slovenia*, while it decreased significantly in *Cyprus* and *Estonia*. Finally, the *retail trade confidence indicator* decreased in *Bulgaria*, *Czech Republic*, *Estonia*, *Latvia*, *Lithuania* and *Poland*.

* In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

The economic sentiment indicator (1995 = 100) is composed of the industrial confidence indicator (40%), the consumer confidence indicator (20%), the construction confidence indicator (20%), and the retail trade confidence indicator (20%). All confidence indicators are balances.

Source: unless stated otherwise: European Commission business and consumer surveys.

TABLE 2a:	Monthly survey of manufacturing industry — Monthly questions and the composite industrial confidence indicator ^(a)																				
	Balances: i.e.differences between the percentages of respondents giving positive and negative replies (s.a.)

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as minimum, lowest figure is considered as maximum.

(a) Data collected in January, April, July and October each year.

(b) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(c) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) The sum of the replies for each Member State are weighted in the Community total with the value of consumers' expenditure.

(b) The indicator is the arithmetic average of the balances (%) of four questions: the financial situation of households, the general economic situation, unemployment expectations (with inverted sign) and savings, all over the next 12 months.

(c) This question was modified in the Danish consumer survey in January 2002, in order to bring it into line with the EU harmonised programme. The series prior to and after January 2002 cannot therefore be compared.

(n) Not seasonally adjusted.
