

BUSINESS AND CONSUMER SURVEY RESULTS

November 2010

Important notice: since May 2010 business surveys data are classified in accordance with an updated version of the Nomenclature of Economic Activities (NACE rev. 2) causing a potential break in series at this date

Upcoming releases of Business and Consumer Survey results – Flash CCI: 20 December 2011, ESI: 6 January 2011

ec.europa.eu/economy_finance/bcs

Economic Sentiment is gaining further momentum

In November, the *Economic Sentiment Indicator* (ESI) improved further in both the EU and the euro area. The indicator increased strongly, climbing by 1.3 points to 105.2 in the EU and by 1.5 points to 105.3 in the euro area. These results were boosted by strong positive readings in Germany.

A majority of Member States reported either improvement or stabilisation in sentiment. Among the seven largest Member States, *Germany* registered the most significant increase (+2.8), followed by *Italy* (+1.4). Improvement was less pronounced in the *UK* (+0.5) and in the *Netherlands* (+0.4), while sentiment remained broadly stable in *Spain*, *Poland* and *France*. In *Germany*, *France*, the *UK* and the *Netherlands* the ESI is above its long-term average.

Sentiment in *services*, which increased markedly by 2.1 in the euro area and by 3.0 in the EU, was the main contributor to the overall improvement. Most respondents in this sector reported brighter assessments of *demand* and *business situation over the past three months*. Confidence in *industry* improved by 0.9 points in the euro area and by 0.7 points in the EU, mainly driven by buoyant German industry. Gains in industrial confidence in the euro area reflected improvements in *order books* and *production expectations*. *Export orders books* have also become more upbeat, in both the EU and the euro area.

As indicated in the flash estimate released on 22 November, confidence among *consumers* gained momentum in the euro area (+1.5), while it increased only marginally in the EU (+0.5). Increased optimism about the *general economic situation* and a significant easing of *unemployment fears* in Germany contributed to the overall improvement. Sentiment in the *retail* sector decreased by 0.7 point in the EU and remained broadly unchanged in the euro area (-0.4). After improvements in September and October, sentiment in *construction* set back in both regions (-0.9 the EU and -1.0 in the euro area), mainly owing to sizeable negative readings in Spain.

Confidence in *financial services* –not included in the ESI– rebounded after two consecutive drops in both the EU and the euro area (+2.6 and +1.9 points respectively).

According to the six-monthly *industrial investment survey*, which was carried out in October and November of 2010, managers expect to increase their investment volumes by 4% in the EU and by 2% in the euro area in 2011 as compared to investment in 2010.

(#) Following the change to NACE2 data classification in May 2010, caution should be exercised for comparisons with earlier data.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(c) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

TABLE 2b: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

Capacity utilisation in manufacturing industry (%)

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) Balances are the weighted averages of the percentages of answers describing each factor as 'very stimulating' (coefficient 1), 'stimulating' (0.5), 'limiting' (-0.5) and 'very limiting' (-1). The answers which do not mention any of these descriptions are not taken into account in calculating these percentages.

(b) The main technical factors are technological developments, the availability of labour and its attitude towards new technologies, and the technical conditions set by the public authorities before they grant the investment permit.

(#) Following the change to NACE2 data classification in May 2010, caution should be exercised for comparisons with earlier data.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(b) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

(#) Following the change to NACE2 data classification in May 2010, caution should be exercised for comparisons with earlier data.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(c) The survey for the Netherlands is temporarily discontinued.

(d) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

(#) Following the change to NACE2 data classification in May 2010, caution should be exercised for comparisons with earlier data.

(a) The indicator is the arithmetic average of the balances (%) for the questions on order-books and employment expectations.

(b) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.
