

## BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

### April 2013: Economic sentiment declines markedly in both the euro area and the EU

In April the *Economic Sentiment Indicator* (ESI) decreased by 1.5 points in the euro area (to 88.6) and by 1.8 points in the EU (to 89.7).<sup>1</sup>

#### Euro area developments

In the euro area, the ESI's decline was broad-based across all business sectors, with services witnessing the sharpest drop, while consumer confidence went up. Among the five largest euro area economies, economic sentiment worsened significantly in Germany (-2.3), France (-2.0) and Italy (-1.9), while remaining broadly stable in the Netherlands (+0.2) and improving in Spain (+0.9).

The decrease in **industry confidence** (-1.5) resulted from a much more negative assessment of the current level of *overall order books* and lower *production expectations*. Managers' assessment of *stocks of finished products* remained virtually unchanged. The *past production* and, to a lesser extent, the current level of *export order books*, which are not included in the confidence indicator, were also assessed more negatively. **Services confidence** dropped abruptly by 4.1 percentage points, driven by significantly worsened assessments of the *business situation* and *demand* over the past three months. *Demand expectations* deteriorated to a lesser extent. **Consumer confidence** increased by 1.2 points, based on a marked easing of *unemployment expectations* and slightly better expectations concerning households' *future financial situation*, the *future general economic situation* and *savings over the next 12 months*. **Retail trade confidence** decreased by one point, driven by worsened *business expectations* and views on the *adequacy of current stocks*. The assessment of the *present business situation* worsened only slightly. Also **construction confidence** decreased (-1.3), based on weaker *employment expectations* and assessments of *order books*. **Financial services confidence** (not included in the ESI) improved markedly (+5.0), fuelled by considerably better assessments of the *business situation* and *demand* over the past three months. *Demand expectations* improved slightly.

**Employment plans** were revised downwards across business sectors, contrasting with the easing of consumers' unemployment expectations. **Selling price expectations** decreased in industry, retail trade and construction, and increased marginally in services.

#### EU developments

In the wider EU, the decrease of the ESI was slightly more marked (-1.8). On a sector basis the reason for this was a sharper deterioration of confidence in services (-5.4) and construction (-3.5) compared to the euro area. Regarding the largest non-euro area EU economies, economic sentiment deteriorated significantly in both the UK (-2.0) and Poland (-1.7). As in the euro area, EU financial services confidence improved strongly (+4.8).

Similar to the euro area, employment plans worsened across all business sectors and selling price expectations decreased with the exception of the service sector. Consumers' price expectations decreased significantly in both the euro area and the wider EU.

<sup>1</sup> German services and French industry survey data have been revised in April, reflecting the impact of updated weights at the branch level. This leads to slight revisions of previous data also at the EU/euro area level. While the March results remain practically unchanged, the February readings of the ESI were revised downwards. As a consequence, the decreases reported in the March press release are now altered. According to the revised data, the ESI remained flat in March in the EU and displayed a minor decrease by 0.3 points in the euro area.

### Quarterly survey in manufacturing (conducted in April)

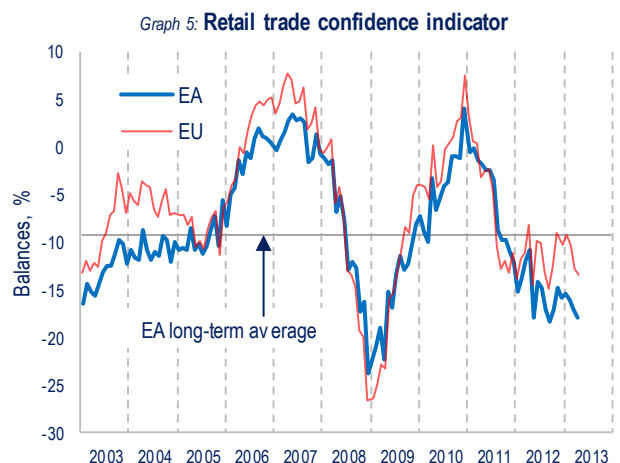

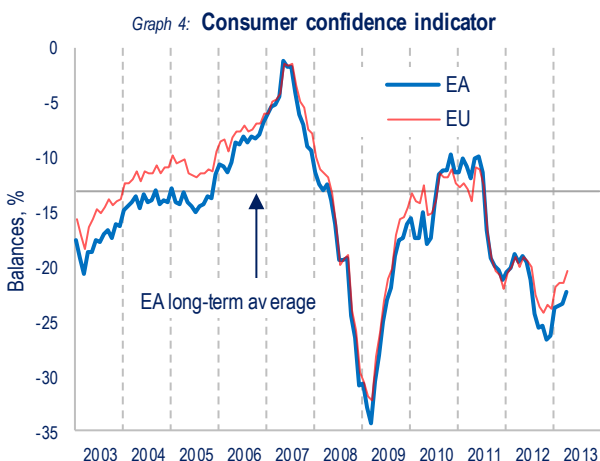

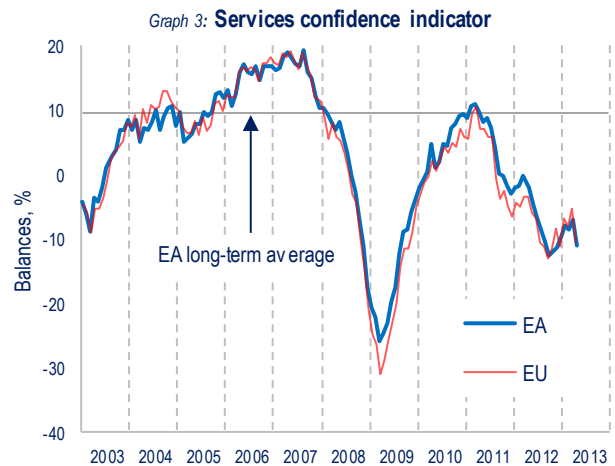

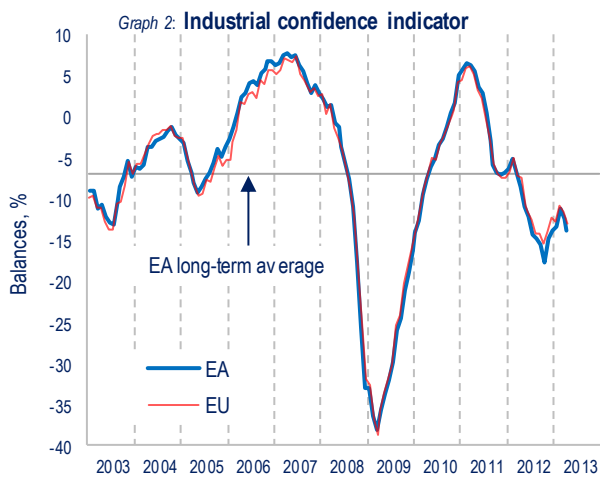

In the euro area, managers reported no changes in the *number of months of production assured by orders on hand* compared with the previous survey carried out in January. However, managers' assessment of developments in overall *new orders* worsened again after last quarter's improvement and their appraisal of their *competitive position on foreign markets outside the EU* deteriorated mildly. At the same time, *export volume expectations* went up for the second consecutive quarter. The balance of managers reporting more than sufficient, rather than insufficient, *production capacity* increased. However, the estimated rate of *capacity utilisation* remained unchanged at 77.5%.

*Developments in the wider EU* were largely in line with euro area developments. Contrary to the euro area, managers' assessment of their *competitive position on foreign markets outside the EU* improved mildly. The *capacity utilisation* fell slightly, to 77.6%.

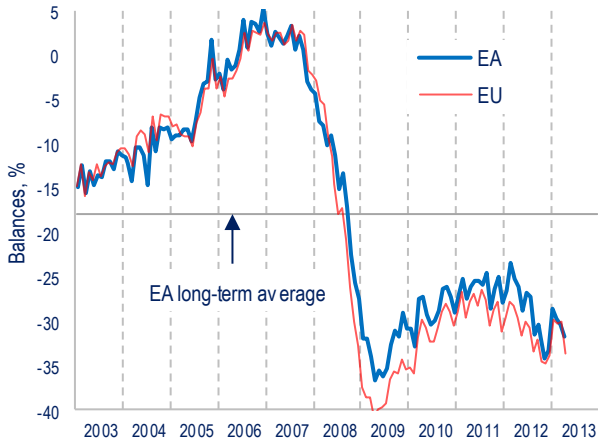

### Industrial investment survey (conducted in March/April)

According to the bi-annual investment survey carried out in March/April this year, real investment in the manufacturing industry is expected to increase by 1% in the euro area in 2013. In the previous survey conducted in October/November of last year managers expected a decrease by 1%. As for 2012, managers now estimate a growth of 2%, compared to a decline by 2% estimated in October/November.

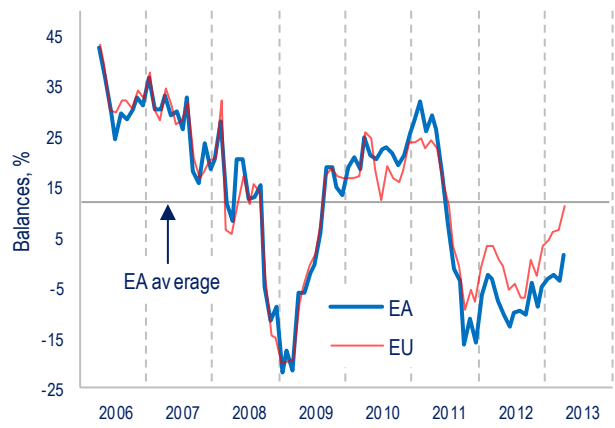

*In the wider EU*, real investment growth in manufacturing is expected to speed up to 3% in 2013, while the October/November survey pointed to flat investment. Regarding 2012, the current estimation points to a 4% increase compared to 1% as estimated in October/November.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

TABLE 2a: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

## Capacity utilisation in manufacturing industry (%)

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

## Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

**Mail:** European Commission  
DG ECFIN / Unit A4  
200, Rue de La Loi  
B-1049 Brussels
