August 2013: Economic Sentiment rises further in both the euro area and the EU

In August the *Economic Sentiment Indicator* (ESI) increased sharply by 2.7 points in the euro area (to 95.2) and 3.1 points in the EU (to 98.1). The indicator rose for the fourth successive month in both regions, marking a two-year high in the EU.

Euro area developments

In the euro area, the strong increase resulted from pronounced improvements in confidence among consumers and managers in industry, services and retail trade. Only in the construction sector confidence weakened. Economic sentiment improved in fourteen euro area countries and in all of its five largest economies, i.e. the Netherlands (+5.2), Germany (+3.3), Italy (+2.0), France (+1.6) and Spain (+0.8).

Industry confidence increased significantly (+2.7) fuelled by managers' much more positive assessment of the current level of *overall order books* and *production expectations*. Their assessment of the *stocks of finished products* improved too. Also companies' assessments of *past production* and the *current level of export order books*, which are not included in the confidence indicator, were much more favourable. **Services confidence** saw a significant increase as well (+2.5), resulting from a sharp rise in managers' assessment of the *past business situation* and important improvements concerning *past demand* and *demand expectations*. **Consumer confidence** continued its upward trend that started in December 2012. Its marked improvement (+1.8) was mainly thanks to more optimistic views on the *future general economic situation*. Consumers' opinions on the *future financial situation* of their households and on their *savings over the next 12 months* also brightened, while their *unemployment expectations* remained unchanged. Also **retail trade confidence** increased substantially (+3.3). Managers were particularly more confident about the *future business situation*. Also their assessments of the *present business situation* and their *volume of stocks* improved markedly. By contrast, the **construction** sector registered a decrease in confidence (-0.9), resulting from managers' worsened assessment of both *order books* and *employment expectations*. **Financial services confidence** (not included in the ESI) increased sharply by 3.5 points, driven by a striking increase in managers' *demand expectations*. While managers' assessment of *past demand* improved slightly, their views on the *past business situation* deteriorated somewhat.

Employment plans were revised upwards in industry, services and retail trade, while decreasing in construction. **Selling price expectations** remained broadly stable in industry, services and retail trade while increasing in construction. Consumers' price expectations for the next 12 months increased as well.

EU developments

In the wider EU, the improvement in sentiment was even slightly more pronounced than in the euro area (+3.1). On a sector basis, the increases in services, retail trade and consumer confidence were stronger than in the euro area and, in contrast to the euro area, construction confidence improved. On a country basis, the main reason for the sharper increase was markedly improving confidence in the largest non-euro area EU economy, the UK (+4.3). The EU financial services confidence indicator improved at a lower pace than in the euro area (+1.6).

Employment plans in the EU were broadly in line with the euro area, except for construction where plans were revised upwards in line with the other sectors. While broadly stable in industry and retail trade as in the euro area, selling price expectations increased in the services sector.

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances. Following the last annual update in January 2013, the country weights have been updated once more in July 2013, to reflect the accession of Croatia on 1 July.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu
