October 2013: Economic Sentiment improves in the euro area and the EU

In October the *Economic Sentiment Indicator* (ESI) increased by 0.9 points in the euro area (to 97.8) and by 1.1 points in the EU (to 101.8). While the upward trend observed since May has been continued, the magnitude and sectoral scope of the improvement in confidence has moderated compared to recent months.

Euro area developments

In the euro area, the ESI's increase was driven by improved confidence in industry and, to a lesser extent, among consumers. By contrast, confidence weakened in services, retail trade and construction. Economic sentiment improved in three out of the five largest euro area economies, i.e. the Netherlands (+3.3), France (+2.6) and Germany (+0.8), while it deteriorated in Spain (-2.2) and Italy (-2.0).

The marked increase in **industry confidence** (+1.8) resulted from improvements in all three components: managers' *production expectations*, their assessment of the current level of *overall order books* and, to a lesser degree, the assessment of the *stocks of finished products*. Also managers' assessments of the *past production* and the current level of *export order books*, which are not included in the confidence indicator, improved in October. **Services confidence** registered a small decrease (-0.5), resulting from worsened assessments of the *past business situation* and *demand expectations*, while the assessment of *past demand* remained virtually unchanged. **Consumer confidence** improved slightly (+0.4), continuing the upward trend since December 2012. This was mainly thanks to improving expectations about the *future general economic situation* and *savings* over the next 12 months. By contrast, consumers' *unemployment expectations* worsened somewhat and their views on the *future financial situation* of their households remained unchanged. **Retail trade confidence** decreased (-0.9) due to an important drop in managers' *business expectations*, while their views on the *volume of stocks* improved and their assessment of the *present business situation* remained virtually unchanged. Also confidence in the **construction sector** decreased (-0.8), resulting from managers' markedly worsened assessment of *order books*, which outweighed the more cautious upward revision of *employment expectations*. **Financial services confidence** (not included in the ESI) decreased by 2.7 points. While the *past demand* was assessed more positively, *demand expectations* and views on the *past business situation* deteriorated.

Employment plans were revised upwards in industry and, to a lesser extent, construction. They remained virtually unchanged in services and worsened in retail trade. **Selling price expectations** increased in industry, while remaining broadly unchanged in services and retail trade and decreasing strongly in construction.

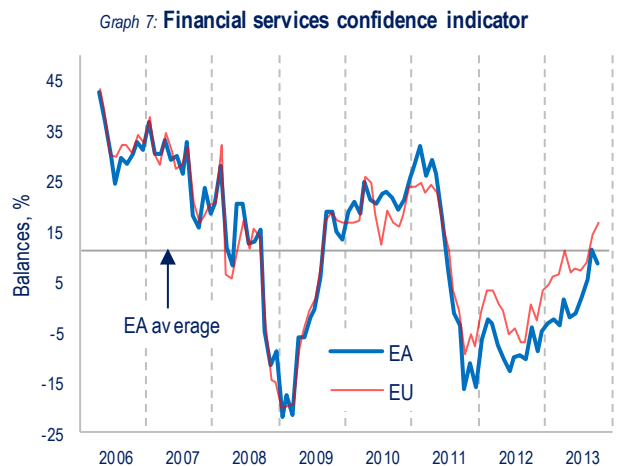

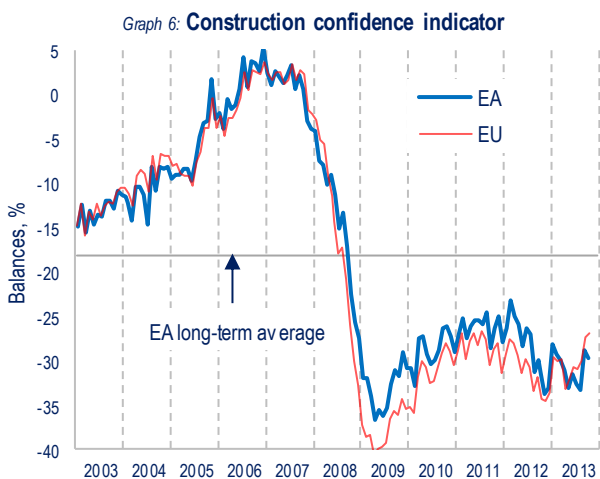

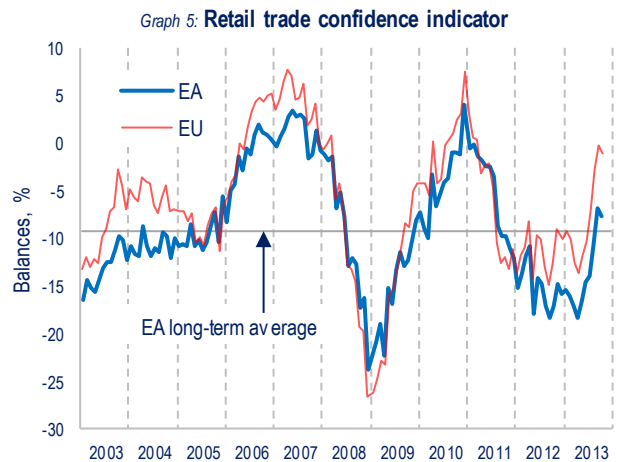

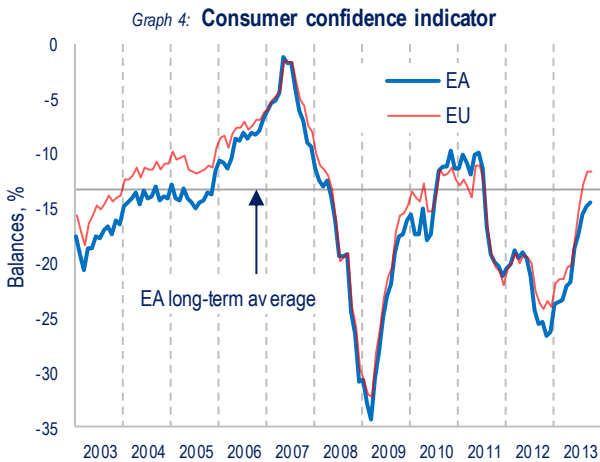

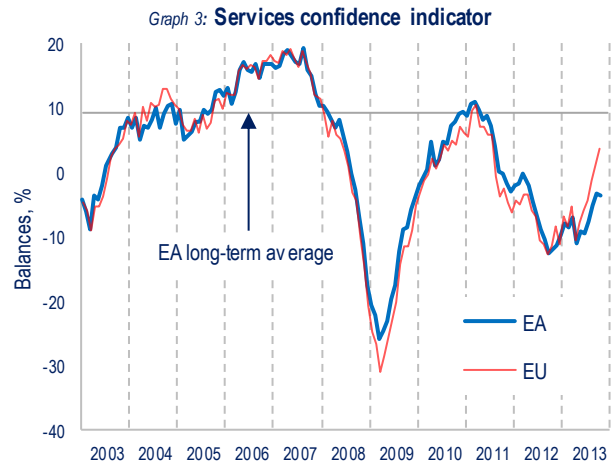

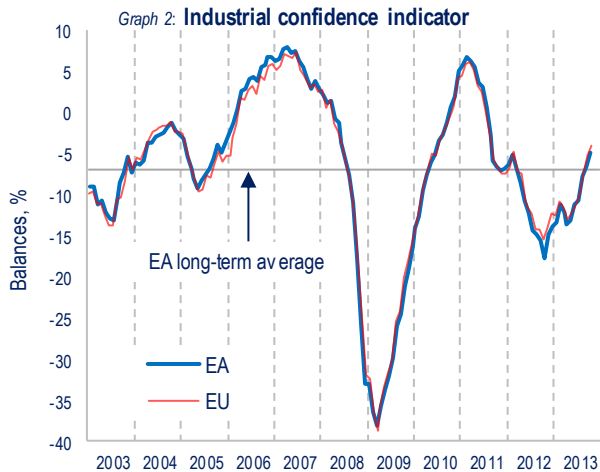

EU developments

In the wider EU, the improvement in sentiment was slightly more pronounced (+1.1). On a sector basis, confidence in industry improved as well, albeit at a lower rate. However, confidence in services improved markedly and was slightly up in construction. Confidence in the retail trade sector decreased as in the euro area, while consumer confidence remained unchanged. The main reason for the sharp plus in services was markedly improving confidence in the largest non-euro area EU economy, the UK. Contrasting with developments in the euro area, the EU financial services confidence indicator improved (+2.5).

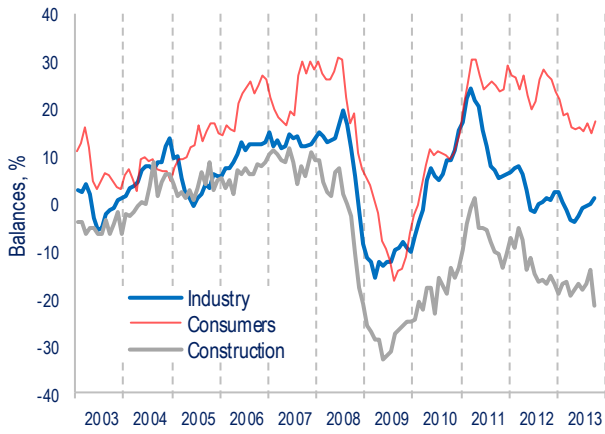

As in the euro area, employment plans in the EU were revised upwards in industry and construction, but also in services and retail trade. Selling price expectations differed only slightly in the EU, showing an increase also in services. Consumers' price expectations were revised upwards, in line with assessments in the euro area.

Quarterly survey in manufacturing (conducted in October)

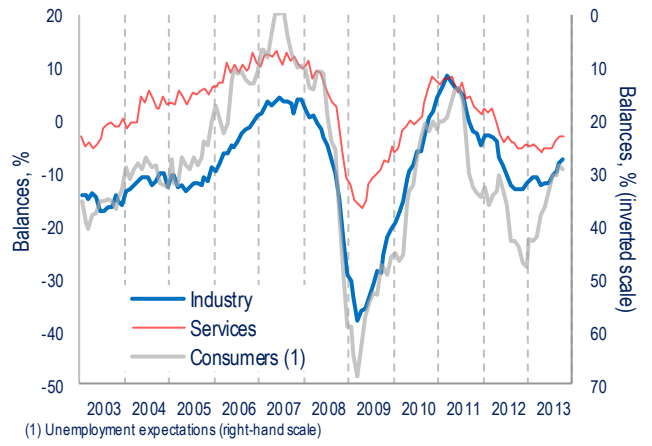

In the euro area, managers' assessment of developments in overall *new orders* improved markedly, turning positive for the first time since July 2011. Also their *export volume expectations* were revised upwards (for the fourth consecutive quarter). In line with these findings, the figures show a slight increase in the *number of months' production assured by orders on hand*. Yet, managers' appraisal of their *competitive position on foreign markets outside the EU* worsened somewhat compared with the previous survey carried out in July. The estimated rate of *capacity utilisation* increased marginally to 78.4% and the share of managers assessing their *current production capacity as 'not sufficient'* (in view of current order books and demand expectations) increased. *Developments in the wider EU* were largely in line with euro area developments.

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances. Following the last annual update in January 2013, the country weights have been updated once more in July 2013, to reflect the accession of Croatia on 1 July.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

TABLE 2a: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

Capacity utilisation in manufacturing industry (%)

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	21 November 2013
	Economic Sentiment Indicator	28 November 2013
	Business Climate Indicator for the euro area	28 November 2013
