

FLASH CONSUMER CONFIDENCE INDICATOR FOR EU AND EURO AREA

In July 2013, the DG ECFIN flash estimate¹ of the consumer confidence indicator² improved markedly in the euro area (-17.4 after -18.8 in June 2013) and, particularly, the EU* (-14.8 after -17.5 in June 2013).

source: European Commission services

¹ This month's Flash CCI for the EU aggregate is computed on the basis of consumer survey data from 28 EU and 17 euro-area countries, thus covering 100% of the total private final consumption expenditure.

² The consumer confidence indicator is built on selected questions addressed to consumers according to the Joint Harmonised EU Programme of Business and Consumer Surveys. More details on the consumer confidence indicator as well as long time series can be found via the following link: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Information

Computation of the Flash CCI

To compute the flash consumer confidence indicator for the EU and euro area, DG ECFIN uses the data available on the cut-off date. The estimation procedure combines historical data with information from those Member States for which data are available in the reference month. Experience has shown this procedure to be statistically reliable.

Further information on the computation procedure can be found in the [European Business Cycle Indicators](#) of January 2010. The European Commission publishes the Consumer Confidence Indicator every month. The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:
