August 2014: Economic Sentiment falls in the euro area and the EU

In August the *Economic Sentiment Indicator* (ESI) fell in the euro area (by 1.5 points to 100.6)¹ and the EU (by 1.2 points at 104.6).

Euro area developments

After a broadly flat development over the last five months, August's decrease shifted the euro area headline indicator back to its December 2013 level. Worsened sentiment resulted from deterioration in retail trade, consumer, industry, and, to a lesser extent, services confidence. Construction confidence remained broadly unchanged. Amongst the largest euro area economies, sentiment dropped significantly in Italy (-4.1), sending the ESI below its long-term average of 100, and in Germany (-1.9). Milder contractions were booked also in France (-0.6) and the Netherlands (-0.8), while sentiment remained flat in Spain.

Weakened **industry confidence** (-1.5) was caused by managers' more careful views on *expected production*, while assessments of the *current level of overall order books* and the *stocks of finished products* stayed broadly unchanged. By contrast, managers' assessments of the level of *past production* and, to a lesser extent, *export order books*, which do not enter the calculation of the confidence indicator, improved. **Services confidence** slid somewhat (-0.5) owing to downward revisions of managers' assessments of the *past business situation* and *past demand*, while their *demand expectations* remained virtually unchanged. The deterioration in **consumer confidence** (-1.6) was driven by more negative assessments of *future unemployment* and the *future general economic situation*, and, to a lesser extent, *future savings* and *households' future financial situation*. Falling **retail trade confidence** (-2.3) was the result of managers' more pessimistic views on both the *present and expected business situation* together with a worsened assessment of the adequacy of the *volume of stocks*. The broadly flat development of **construction confidence** (-0.2) reflected downward revisions of the level of *order books* partially offset by a small improvement in *employment expectations*. The slight increase (+0.4) in **financial services confidence** (not included in the ESI) was backed by more positive appraisals of the *past business situation* and *past demand*, while *demand expectations* were revised downward.

Employment plans saw an upward revision in services, while they remained broadly unchanged in industry and construction and deteriorated in the retail trade sector. **Selling price expectations** increased in services and construction, but declined in the other two surveyed business sectors (industry and retail trade). Consumers' price expectations were revised downward.

EU developments

The relatively more moderate decrease of the headline indicator in the two largest non-euro area EU economies, the UK (-1.1) and Poland (-1.0), resulted in a less severe contraction for the EU ESI (-1.2) compared to the euro area. EU construction confidence improved, while, as in the euro area, industry, retail trade, services and consumer confidence slipped. Financial services confidence booked a more robust improvement (+1.9).

Contrary to the euro area, EU-wide employment plans were revised downwards in industry but increased slightly in construction and remained flat in retail trade. EU price expectations were in line with those for the euro area apart from a broadly flat development in services.

¹ The business confidence indices for France were slightly revised compared to the July press release, causing a downward revision of a decimal point for the euro area ESI (to 102.1).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

(a) The current press release incorporates revised business confidence indexes for Croatia resulting from a backcast exercise conducted in August. Revised business confidence data for Croatia had no impact on aggregate EU figures.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu
