Methodology		
Population & frame list	Population (universe)	Enumeration universe counts about 29316 enterprises > 0 employees (Total possible universe counts about 29316 enterprises > 0 employee)
	Survey sampling frame	Business Register
	Size of frame list	About 28767 enterprises > 0 employees
	Weighted frame coverage	About 90 pct.
	Characteristics	Identification, address, NACE rev. 2 classification, number of employees
	Frame list update	The frame list is updated every year
	Sectors and/or categories currently covered	Entire construction sector is covered, i.e. NACE rev. 2 section F, division 41, 42 & 43
Sampling & accuracy	Sampling method	Stratified random sampling with probability proportional to size (employees). 24 strata defined by 3 employee groups (0-9; 10-49; & 50+) and 8 groups of industries. All enterprises above 50 employees are included in initial sample.
	Sample size (number of contacts)	About 800 enterprises > 0 employees
	Weighted sample coverage	about 28 pct.
	Sampling error	- - -
	Response rate	65-85 pct. (unweighted) -depending on panel depletion between updates
	Treatment of non-response	One reminder is send
	Weighting scheme	Weighting by number of employees of individual enterprises
Data collection	Periodicity	Monthly (6 questions including 1 “quarterly” question)
	Survey method	The survey is conducted by mail/email; online response is an option
	Fieldwork period	Between 25th of previous month and 6th of present month (delayed responses are accepted until 21th of the present month)
	Remarks methodology	Quarterly question (January, April, July and October) is asked each month out of convenience
