Methodology

Population & frame list	Population (universe)	12300 enterprises after cut-off (> 10 employees). 61000 enterprises before cut-off
	Survey sampling frame	Establishment Related employment Statistics (ERE)
	Size of frame list	10400 enterprises >10 employees
	Weighted frame coverage	About 72 pct.
	Characteristics	Identification, address, NACE code, number of employees
	Frame list update	The frame list is updated every year
	Sectors and/or categories currently covered	Most NACE rev.2 divisions of Services sections H - S are covered: 49-53; 55-56; 58; 61-65; 68-74; 77-79, 81-82; 90-95. Some Services divisions are omitted from the survey sample for methodological and discretion reasons since they only include few companies with 10 or more employees, which is the cut-off point: 59, 60, 66, 75, 80 & 96. For same reasons, the four divisions from 90 to 93 are aggregated into one sample group "Arts, sports and recreation activities (90-93)"
Sampling & accuracy	Sampling method	Stratified random sampling. 84 strata are defined by 28 NACE2 classes and 3 employee groups (10-19; 20-49; 50+) All enterprises above 50 employees are included in initial sample.
	Sample size (number of contacts)	2950 enterprises > 10 employees
	Weighted sample coverage	About 66 pct.
	Sampling error	- - -
	Response rate	74 - 86 pct. (unweighted) - depending on panel depletion between updates
	Treatment of non-response	One reminder is send. Non-responses are omitted from the calculations
	Weighting scheme	Weighting by number of employees of individual enterprises
Data collection	Periodicity	Monthly
	Survey method	The survey is conducted by mail; online response is an option
	Fieldwork period	Between 25th of previous month and 5th of present month. (delayed responses are accepted until 21th of the present month)
	Remarks methodology	- - -
