Methodology

Population & frame list	Population (universe)	Covering all size classes the population is about 54 100 enterprises
	Survey sampling frame	Statistics Sweden's Business Database
	Size of frame list	3667 enterprises
	Weighted frame coverage	
	Characteristics	Civic registration number, name, address, NACE code, number of employees, legal form, institutional sector, ownership control
	Frame list update	Every year
	Sectors and/or categories currently covered	Total Industry
Sampling & accuracy	Sampling method	Random sampling, with Neyman allocation by kind of activity and size of enterprise; A total survey of enterprises with at least 200 employees; a sample of enterprises with 20-199 employees; enterprises with 10-19 employees estimated based on a model.
	Sample size (number of contacts)	1929 enterprises
	Weighted sample coverage	61% measured by number of employees
	Sampling error	Sampling error 1.3% of total investment
	Response rate	81 % measured by number of enterprises
	Treatment of non-response	In companies with less than 500 employees mean value for the industrial branch and stratum are used. In companies with more than 500 employees imputations are used, when needed.
	Weighting scheme	Data are weighted based on sampling probability of the enterprise. The non-respondents in the specific strata also affect the weight.
Data collection	Periodicity	Twice a year, April and October/November
	Survey method	Postal survey, with an offer to report via Internet
	Fieldwork period	April/May and October/November
	Remarks methodology
