

# 2009 Ageing Report

Economic and budgetary projections for the EU-27  
Member States (2008-2060) | Statistical Annex

---

EUROPEAN ECONOMY 2 | 2009  
(provisional version)

The European Economy series contains important reports and communications from the Commission to the Council and the Parliament on the economic situation and developments, such as the *Economic forecasts*, the annual *EU economy review* and the *Public finances in EMU* report.

Subscription terms are shown on the back cover and details on how to obtain the list of sales agents are shown on the inside back cover.

Unless otherwise indicated the texts are published under the responsibility of the Directorate-General for Economic and Financial Affairs of the European Commission, BU-24, B-1049 Brussels, to which enquiries other than those related to sales and subscriptions should be addressed.

#### Legal notice

**2009 Ageing Report:  
economic and budgetary projections for the EU-27  
Member States (2008-2060)**

**STATISTICAL ANNEX**

## **CONTENTS**

<b>Statistical Annex – Cross-country tables .....</b>	<b>3</b>
List of tables.....	4
Main demographic and macroeconomic assumptions.....	8
Pension expenditure projections .....	34
Health-care expenditure projections .....	51
Long-term care expenditure projections .....	55
Education expenditure projections.....	60
Unemployment benefit expenditure projections .....	69
Additional informations.....	70
<b>Statistical Annex – Country fiches .....</b>	<b>86</b>

## **Statistical Annex – Cross-country tables**

## List of tables

Table A 1 - Fertility rate (births per woman).....	8
Table A 2 – Life expectancy at birth - Males (years).....	8
Table A 3 - Life expectancy at birth - Females (years).....	9
Table A 4 - Life expectancy at 65 - Males (years).....	9
Table A 5 - Life expectancy at 65 - Females (years).....	10
Table A 6 – Net migration (thousands people) .....	10
Table A 7 – Net migration (as % of population).....	11
Table A 8 - Population (millions people) .....	11
Table A 9 – Children population (0-14) (as % of total population) .....	12
Table A 10 – Prime age population (25-54) (as % of total population) .....	12
Table A 11 – Working age population (15-64) (as % of total population).....	13
Table A 12 – Elderly population (65 and over) (as % of total population) .....	13
Table A 13 – Very elderly population (80 and over) (as % of total population).....	14
Table A 14 - Very elderly population (80 and over) (as % of elderly population).....	14
Table A 15 - Very elderly population (80 and over) (as % of working-age population).....	15
Table A 16 – Potential GDP (annual growth rate).....	15
Table A 17 - Employment (annual growth rate) .....	16
Table A 18 – Labour input – hours worked (annual growth rate) .....	16
Table A 19 – Labour productivity per hour (annual growth rate) .....	17
Table A 20 - TFP (annual growth rate).....	17
Table A 21 – Capital deepening (contribution to labour productivity growth) .....	18
Table A 22 – GDP per capita (annual growth rate) .....	18
Table A 23 – GDP per worker (annual growth rate).....	19
Table A 24 – GDP in 2007 prices (millions EUR) .....	19
Table A 25 – Working-age population (15-64) (thousands people).....	20
Table A 26 - Working-age population (15-64) (annual growth rate).....	20
Table A 27 – Labour force 15-64 (thousands people) .....	21
Table A 28 – Participation rate (15-64) (percent).....	21
Table A 29 - Participation rate (15-24) (percent).....	22
Table A 30 - Participation rate (25-54) (percent).....	22
Table A 31 - Participation rate (55-64) (percent).....	23
Table A 32 - Participation rate (15-64) - FEMALES (percent) .....	23
Table A 33 - Participation rate (15-24) - FEMALES (percent) .....	24
Table A 34 - Participation rate (25-54) - FEMALES (percent) .....	24
Table A 35 - Participation rate (55-64) - FEMALES (percent) .....	25
Table A 36 - Participation rate (15-64) - MALES (percent) .....	25
Table A 37 - Participation rate (15-24) - MALES (percent) .....	26
Table A 38 - Participation rate (25-54) - MALES (percent) .....	26
Table A 39 - Participation rate (55-64) - MALES (percent) .....	27
Table A 40 - Employment rate (15-64) (percent) .....	27
Table A 41 - Employment rate (20-64) (percent) .....	28
Table A 42 - Employment rate (15-71) (percent) .....	28
Table A 43 - Unemployment rate (15-64) (percent) .....	29
Table A 44 – Employment 15-64 (millions people) .....	29
Table A 45 – Share of young (15-24) (as % of employment aged 15-64).....	30
Table A 46 – Share of prime age (25-54) (as % of employment aged 15-64).....	30
Table A 47 – Share of older (55-64) (as % of employment aged 15-64) .....	31
Table A 48 – Share of older population (55-64) (population 55 to 64 as % of total population 15-64) .....	31
Table A 49 – Old-age dependency ratio (population 65+ as % of population 15-64) .....	32
Table A 50 – Total dependency ratio (population 15- and 64+ as % of pop. 15-64) .....	32

Table A 51 – Total economic dependency ratio (total population-employment as % of employed 15-64).....	33
Table A 52 – Economic old-age dependency ratio (15-64) (inactive population 65+ as % of employed 15-64) .....	33
Table A 53 – Social security pensions, gross (as % of GDP) .....	34
Table A 54 – Old-age and early pensions, gross (as % of GDP) .....	34
Table A 55 – Earnings-related pensions, gross (as % of GDP) .....	35
Table A 56 – Other pensions (disability, survivors), gross (as % of GDP) .....	35
Table A 57 – Occupational pensions, gross (as % of GDP) .....	36
Table A 58 – Private mandatory pensions, gross (as % of GDP) .....	36
Table A 59 – Social security pensions, net (as % of GDP) .....	37
Table A 60 – Social security pensions, contributions (as % of GDP) .....	37
Table A 61 – Social security pensions, assets (as % of GDP) .....	38
Table A 62 – Social security pensions, net/social security pensions, gross (percent) .....	38
Table A 63 – Pensioners (social security) (thousands people) .....	39
Table A 64 – Pensioners aged 65+ (thousands people) .....	39
Table A 65 – Share of pensioners below age 65 as % of all pensioners (percent) .....	40
Table A 66 – Avg gross pension, (social security in 2007 prices) (thousands EUR) .....	40
Table A 67 – Benefit ratio (Social security pensions) (percent) .....	41
Table A 68 – Gross replacement rate at retirement (social security pensions) (percent) .....	41
Table A 69 – Contributors (social security pensions, in 1000 persons) (thousands people) .....	42
Table A 70 – Support ratio (contributors/100 pensioners, social security pensions) (percent) .....	42
Table A 71 – Social security pensions, gross (as % of GDP) – Higher life expectancy scenario .....	43
Table A 72 – Old-age and early pensions, gross (as % of GDP) – Higher life expectancy scenario .....	43
Table A 73 - Social security pensions, gross (as % of GDP) – Higher labour productivity scenario .....	44
Table A 74 - Old-age and early pensions, gross (as % of GDP) – Higher labour productivity scenario .....	44
Table A 75 - Social security pensions, gross (as % of GDP) – Zero migration scenario .....	45
Table A 76 - Old-age and early pensions, gross (as % of GDP) – Zero migration scenario .....	45
Table A 77 - Social security pensions, gross (as % of GDP) – Higher employment rate (+1p.p.) scenario .....	46
Table A 78 - Old-age and early pensions, gross (as % of GDP) – Higher employment rate (+1p.p.) scenario .....	46
Table A 79 - Social security pensions, gross (as % of GDP) – Higher older workers employment rate (+5p.p.) scenario .....	47
Table A 80 - Old-age and early pensions, gross (as % of GDP) – Higher older workers employment rate (+5p.p.) scenario .....	47
Table A 81 – Social security pensions, gross as % of GDP (percentage points change from 2007) - Baseline .....	48
Table A 82 – Social security pensions, gross as % of GDP (p.p. ch from 2007 due to Dependency ratio) - Baseline .....	48
Table A 83 - Social security pensions, gross as % of GDP (p.p. ch from 2007 due to Coverage ratio) - Baseline .....	49
Table A 84 - Social security pensions, gross as % of GDP (p.p. ch from 2007 due to Employment effect) - Baseline .....	49
Table A 85 - Social security pensions, gross as % of GDP (p.p. ch from 2007 due to Benefit ratio) - Baseline .....	50
Table A 86 - Social security pensions, gross as % of GDP (p.p. ch from 2007 due to Interaction effect) - Baseline .....	50
Table A 87 – Health care spending – AWG reference scenario (as % of GDP) .....	51
Table A 88 - Health care spending – Pure ageing scenario (as % of GDP) .....	51
Table A 89 - Health care spending – Labour intensity scenario (as % of GDP) .....	52
Table A 90 - Health care spending – Constant health scenario (as % of GDP) .....	52
Table A 91 - Health care spending – Fast cost growth scenario (as % of GDP) .....	53
Table A 92 - Health care spending – Cost convergence scenario (as % of GDP) .....	53
Table A 93 - Health care spending – Death-related cost scenario (as % of GDP) .....	54
Table A 94 - Health care spending – Income elasticity scenario (as % of GDP) .....	54
Table A 95 – Long-term care spending – AWG reference scenario (as % of GDP) .....	55
Table A 96 - Long-term care spending – Pure demographic scenario (as % of GDP) .....	55

Table A 97 - Long-term care spending – GDP per capita scenario (as % of GDP).....	56
Table A 98 - Long-term care spending – Constant disability scenario (as % of GDP) .....	56
Table A 99 - Long-term care spending – GDP per worker fast growth scenario (as % of GDP) .....	57
Table A 100 - Long-term care spending – Shift 1% dependents from informal to home care scenario (as % of GDP) .....	57
Table A 101 - Long-term care spending - Shift 1% dependents from informal to instit. care scenario (as % of GDP) .....	58
Table A 102 - Long-term care spending - Shift 1% dependents from informal to home/instit. care scenario (as % of GDP).....	58
Table A 103 – Number of dependents people – AWG reference scenario (thousands people) .....	59
Table A 104 – Number of dependents people receiving formal care – AWG reference scenario (thousands people) .....	59
Table A 105 - Number of dependents people receiving informal or no care – AWG reference scenario (thousands people).....	60
Table A 106 – Education spending - Total (as % of GDP) .....	60
Table A 107 - Education spending - Primary (as % of GDP) .....	61
Table A 108 - Education spending – Low secondary (as % of GDP) .....	61
Table A 109 - Education spending – Upper secondary (as % of GDP).....	62
Table A 110 - Education spending – Tertiary education (as % of GDP) .....	62
Table A 111 – Number of students – Total (thousands people).....	63
Table A 112 - Number of students – Primary (thousands people) .....	63
Table A 113 - Number of students – Low secondary (thousands people).....	64
Table A 114 - Number of students – Upper secondary (thousands people) .....	64
Table A 115 - Number of students – Tertiary education (thousands people) .....	65
Table A 116 – Number of teachers - Total (thousands people).....	65
Table A 117 - Number of teachers - Primary (thousands people) .....	66
Table A 118 - Number of teachers – Low secondary (thousands people).....	66
Table A 119 - Number of teachers – Upper secondary (thousands people) .....	67
Table A 120 - Number of teachers – Tertiary education (thousands people) .....	67
Table A 121 – Education spending – High compens. per teacher scenario (diff Baseline) (as % of GDP) .....	68
Table A 122 - High ratio teachers/students scenario (diff Baseline) (as % of GDP).....	68
Table A 123 – Higher attainment rates in tertiary education scenario (45% by 2020) (diff Baseline) (as % of GDP) .....	69
Table A 124 – Unemployment benefit spending (as % of GDP) .....	69
Table A 125 – Estimated impact of pension reform on participation rates (2020, 2060) in percentage points (comparison of projections with and without incorporating recent pension reforms) .....	70
Table A 126 –Projected changes in participation rates by age-groups, 2007-2060 .....	71
Table A 127 – Labour supply projections, 2007-2060 (age group : 15 to 64).....	73
Table A 128 – Contribution to the overall change in participation rates, 2007-2060 (changes in %) .....	74
Table A 129 – Contribution to the overall change in labour force, 2007-2060 (changes in %) .....	75
Table A 130 – Employment rate projections 2007-2060 (15-64).....	76
Table A 131 – Employment projections 2007-2060 (15-64) .....	76
Table A 132 – Employment rate projections by age and sex, 2007-2060 .....	77
Table A 133 – Decomposition of GDP growth, 2007-2060.....	79
Table A 134 – The cost of ageing overview – Baseline scenario (as % of GDP) .....	80
Table A 135 - The cost of ageing overview – High life expectancy (1 year) scenario – Difference with Baseline (as % of GDP) .....	81
Table A 136 - The cost of ageing overview – Zero migration scenario – Difference with Baseline (as % of GDP) .....	82
Table A 137 - The cost of ageing overview – Higher employment rate (+1p.p.) scenario – Difference with Baseline (as % of GDP).....	83
Table A 138 - The cost of ageing overview – Higher employment rate (+5p.p.) for older workers scenario – Difference with Baseline (as % of GDP).....	84

Table A 139 - The cost of ageing overview – Higher labour productivity (+0.25p.p.) scenario – Difference with Baseline (as % of GDP).....	85
---	----

## Main demographic and macroeconomic assumptions

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: := data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

Source : Commission Services (DG ECFIN), Eurostat (EUROPOP2008), EPC (AWG).

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: := data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: := data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

Source : Commission Services (DG ECFIN), Eurostat (EUROPOP2008), EPC (AWG).

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

Source : Commission Services (DG ECFIN), Eurostat (EUROPOP2008), EPC (AWG).

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

Source : Commission Services (DG ECFIN), Eurostat (EUROPOP2008), EPC (AWG).

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64

NB: : = data not provided

### LEGENDA:

\* The potential GDP and its components is used to estimate the rate of potential output growth, net of normal cyclical variations

(1) Share of older population = Population aged 55 to 64 as % of population aged 15-64

(2) Old-age dependency ratio = Population aged 65 and over as a percentage of the population aged 15-64

(3) Total dependency ratio = Population under 15 and over 64 as a percentage of the population aged 15-64

(4) Total economic dependency ratio = Total population less employed as % of employed population 15-64

(5) Economic old-age dependency ratio (15-64) = Inactive population aged 65+ as % of employed population 15-64
