

Title of the project

FASTQUAD - Facilitating students mobility's service including quality insurance dimension

Duration: 3 years

Project description:

Student's exchanges between universities involve in the Bologna process are not so important that as it could be possible. This is true in European Union and more between European Union and Russia. Two major problems explain this situation: students to move have a lot of practical problems; the recognition of the periods of studies are not simple. Making easier the students motilities need to organize a special service for solving the practical impediment and developing process of evaluation and quality assurance to guarantee the level of acquired competences would make easier the recognition. Possible ways of solving these problems can be establishment of special student exchange service and development of guidance for exchange coordinators. Also it's important to develop methodology of evaluation and quality assurance to guarantee the level of acquired competences..

The project specific objectives have been defined as the following:

1. Organizing seminars workshops and experts visit to analyse how the mobility facilitating services work when they exist and how to set up this services. The aim is to specify conditions of creation such a service and to develop of guidance for exchange.
2. Developing methodology of evaluation and quality assurance to guarantee the level of acquired competences.
