

Title of the project

TEA TEAM: Training educational advisers to enhance academic mobility

Duration: 14 months

Project description

The project aims at capacity building through Educational Advising Centres with the ultimate goal of enhancing academic mobility from Belarus, Moldova, Ukraine, Albania, Bosnia, Croatia, Macedonia, and Kosovo. Quality training will be provided to advisers on European HE area in order to further enable the students and scholars to make informed choices when making decisions on study or research abroad.

Europe is an attractive destination due to proximity to the target region. Although country missions exist, a one-stop information clearinghouse on European higher education is not available in the countries mentioned. The project will create this missing resource by transferring knowledge from key European international educators to the staff of a network of Educational Advising Centres. The project will reach its ultimate target group- students and academia - through the multiplier effect of creating a pool of 30 trained advisers in 19 locations over 8 countries. Knowledge will be transferred, the profile of European higher education raised, as well as lateral links forged via four training seminars to be held in Chisinau, Kiev, Zagreb and Joensuu. The funding will cover training seminars, however the impact will go beyond the seminars thanks to the existing Educational Advising Centres' network
