Data sharing models

The workshop programme

Why are we here?

▸ To better understand what is required to create data sharing models which **add value to data**, whilst ensuring that the **value added is equitably shared**.

How do we do that?

- Exploring existing and potential data governance models:
    - To evaluate the benefits and identify the constraints for farmers of the most promising data governance models
    - To identify the enabling environment for data sharing which would create new opportunities.

- To explore the Communication on Building a European Data Economy.

DAY 1

Apply the questions and add more

Coffee & question selection

Assess most promising existing examples

Combine

Dos & don'ts

Comparing room results – building the list

DAY 2

Creating your own data sharing story

Coffee

Presenting the best elements of your story

Combine

Dos & don'ts

Actionable list of things to do (and not) to create an enabling environment

Feedback on the Communication

**Break out rooms
4 rooms – 3 groups in each (1hr)**

Use the developed questions to assess actual examples to identify elements which:
- Support effective data sharing
- Limit effective data sharing
Combine across each case study
