

Orientation debate on 18/12/2007

	Horizontal issues
1.	How many implementing measures and with what coverage?
2.	Application vs. technology approach
3.	Form of the implementing measure
4.	Voluntary indication of suitability and installation requirements
5.	Repeal of directive 2000/55/EC (existing implementing measure on fluorescent ballasts)
6.	Standards and measurement methods
7.	Standby and off-mode power limits
8.	Product information (location, content, labelling)
9.	Role of benchmarks
10.	Market surveillance
11.	Monitoring and revision of the measure
12.	Way to set exemptions
	Detailed comments
13.	I.1. Product information requirements for fluorescent lamps without integrated ballast
14.	I.2. Requirements on lamp efficacy for fluorescent lamps without integrated ballast
15.	I.3. Requirements on the lamp lumen maintenance factor for fluorescent lamps without integrated ballast
16.	I.4. Requirement on mercury in fluorescent lamps without integrated ballast
17.	I.5. Product information requirements for ballasts used with fluorescent lamps without integrated ballast
18.	I.6. Requirements on the efficiency of ballasts used with fluorescent lamps without integrated ballast
19.	I.7. Product information requirements for luminaires for fluorescent lamps without integrated ballast

20.	I.8. Requirements on the light output ratio (LOR) of luminaires for fluorescent lamps without integrated ballast
21.	I.9. Requirements on the energy performance of luminaires for fluorescent lamps without integrated ballast
22.	I.10. Requirement on waste of fluorescent lamps without integrated ballast, and luminaires and ballasts for such lamps
23.	II.1. Requirement on lamps indicated as "suitable for fixed lighting in office task areas"
24.	II.2. Requirements on ballasts indicated as "suitable for fixed lighting in office task areas"
25.	II.3. Requirements on luminaires indicated as "suitable for fixed lighting in office task areas"
