

# The IEE programme in the EU energy policy context

European Info Day

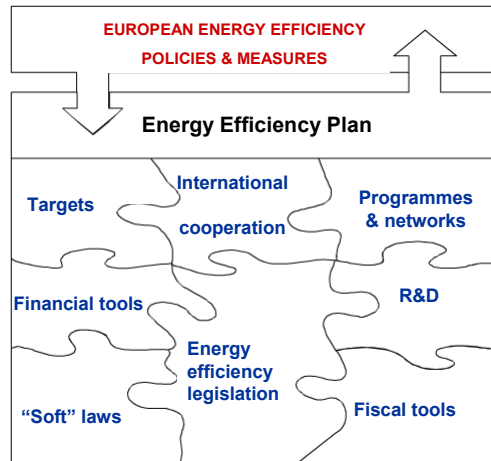

Paul Hodson  
DG Energy  
24 January 2012

Energy

A comprehensive set of European policies and measures in place to address energy efficiency in all its aspects

Energy

## Energy Roadmap 2050

*An exploration of possible futures for the EU energy system; neither a forecast nor a prescription*

### Conclusions – supported by all decarbonisation scenarios:

- Energy efficiency gains throughout system are essential
- Growing reliance on electricity
- Renewable energy
  - at least 55% of gross final energy consumption in 2050,
  - at least 60% of electricity generation
- All decarbonisation options can contribute: EE, RES, nuclear, CCS, gas

Energy

## Next Multiannual Financial Framework (MFF) 2014-2020

Dedicated to delivering Europe 2020 Strategy, including the 20-20-20 by 2020 goals

Main funding for climate and energy from mainstreaming:

- Cohesion policy
- Horizon 2020
- CAP and EAFRD

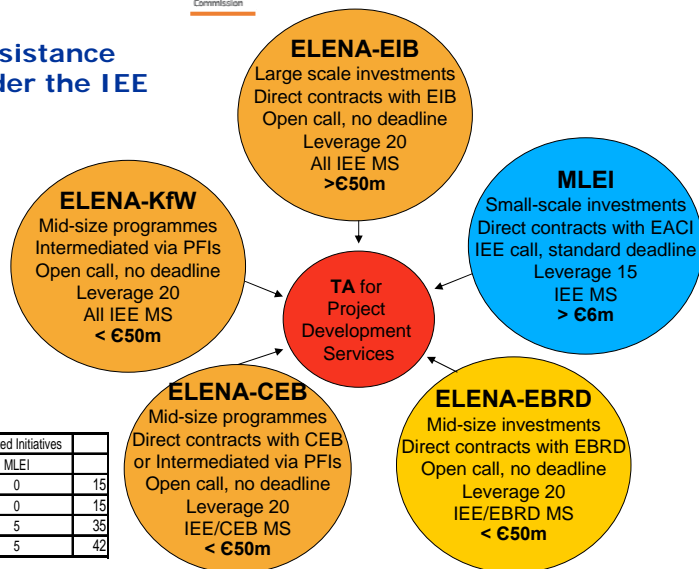

Also dedicated funding for energy and climate in:

- Connecting Europe Facility
- LIFE+

Energy

## Technical assistance facilities under the IEE
