

EU Manufacturing Industry: What are the Challenges and Opportunities for the Coming Years?

The aim of this paper is to provide a basis for discussion and development of the industrial policy initiatives that will be put forward as a “new industrial policy” in the context of Europe 2020 in the course of 2010. It is based on on-going analysis and monitoring by the EU Commission¹ and initial discussions with different industrial sectors through DG Enterprise and Industry’s extensive network of sectoral units. This is not an official Commission publication.

In this context, we encourage stakeholders to comment on this document with a view to putting forward an adequate response to the key issues and challenges facing industry in Europe.

Please submit your comments to the e-mail address provided below by 21 May 2010.

Alternatively, you can send your written comments the postal address of Directorate General for Enterprise and Industry
