

**R E S P O N S E   T O**

**Public Consultation on the preparation of a new  
Communication on Raw Materials**

**DEFINING CRITICAL RAW MATERIALS**

*1. Do you have any comments on the methodological approach, including the scope, to determine criticality at EU level? If so, please specify.*

No answer

*2. Do you see any additional raw material that should be considered as critical? If so, please explain.*

Increase the importance of transportation cost for aggregates, towards the direction of secure aggregates reserves close to the end use locations.

*3. Do you have any comments regarding the recommendations of the report? If so, please specify.*

No answer

*4. Are you aware of any initiatives in your country that aim to assess the criticality of raw materials? If so, please describe briefly.*

No.

*5. The functioning of raw materials markets has not been dealt with. Do you think that further analysis of their functioning should be carried out? What actions should be proposed to increase their transparency?*

No answer

*6. Do you think that the EU should propose a system of stockpiling for the critical raw materials? If so, please indicate whether you consider it more appropriate to do this at Community or alternatively at Member States level.*

EU should consider a system of stockpiling at Member States level. Monitoring and analysing the reserves, production, trade, consumption, recycling of the critical raw materials.

#### **TRADE**

*7. Do you think that the importance of trade is adequately reflected in the work carried out so far in the Raw Materials Initiative?*

No answer

*8. Do you have any comment regarding the main findings of DG Trade activity report? What activities should be prioritised? Are there, in your opinion, additional activities not mentioned in the report which should be pursued in this strategy?*

No answer

*9. Please identify trade distortive measures (i.e. export restrictions) concerning raw materials that in your view should be tackled.*

No answer

*10. Are you aware of any initiatives in **your country** that have one of the above goals in mind such as, for example, developing a raw materials diplomacy, or supporting companies to invest in third countries in the raw materials sector? If so, please describe briefly.*

No

#### **DEVELOPMENT**

*11. What specific actions would you consider most relevant needed in the following areas:*

- *Good governance;*
- *Infrastructure / investments;*
- *Geological knowledge / skills.*

Basic Geological Knowledge for all economical minerals must be developed by Member States to secure the reserves area from other development.

12. *Regarding transparency, what measures do you believe the EU should take to foster revenue transparency in the mining industry in raw material resource rich countries? What are your views regarding existing initiatives currently being taken in this area, namely by the Extractive Industries Transparency Initiative (EITI6)?*

No answer

13. *Concerning the recent agreement between the European Commission and the African Union Commission, in your view, what concrete objectives, targets and deliverables should be included in such a partnership?*

No answer

14. *Do you consider that wood should be addressed in the framework of development policy? If yes, please specify what are the main issues to be analysed.*

No.

15. *Are you aware of any initiatives in **your country** that contribute to promoting exploration and exploitation of mines in developing countries? Should such initiatives be better coordinated or promoted at the EU level?*

Cyprus has no initiatives that contribute to promoting exploration and exploitation of mines in developing countries

Yes, such initiatives should be better coordinated and promoted at the EU level.

#### **IMPROVEMENT OF THE REGULATORY FRAMEWORK CONDITIONS INSIDE THE EU**

16. *Do you agree that these topics correspond to the major challenges in this policy area? If not, please specify.*

Yes

17. *Do you think of any other avenues which should be followed by the Commission? If yes, please specify.*

No answer

*18. Do you agree with the recommendations made in the report on "Exchanging Best Practice on Land Use Planning, Permitting and Geological Knowledge Sharing" or do you have any specific ones to be added. Please explain.*

Yes. The best practice examples presented in the report of the working group are very useful by highlighting potential improvements Member States may wish to consider with regard to their own minerals policy and associated land use planning policy, along with necessary geological data (the knowledge base) enhancements required in order to enhance this policy area area. . More effort is, however, now needed to further address the challenges listed in this policy.

*19. Do you consider it useful to establish an EU geological service based on a network of Member State geological services?*

No answer

*20. Do you consider that EU regulatory framework conditions for wood and/or recovered paper need to be further analysed? If yes, please specify.*

No answer.

## **PROMOTING SKILLS AND RESEARCH, DEVELOPMENT AND INNOVATION**

Skills:

*21. What type of actions would you propose to provide better cooperation between companies, universities and public authorities in order to promote skills and in the extractive or other raw materials sectors? Please specify.*

The EU could provide best practices data from member states with higher experience and technology to other member states. This could be achieved by organizing workshops involving universities, public sectors and industry.

Research, Development and Innovation:

*22. Are you aware of any research, development and innovation programme(s) at national, regional or local level? Please specify.*

There is an ongoing research by University of Cyprus on the suitability of some quality tests on local aggregates.

23. *Where do you see the major gap / the urgent need for the raw materials sector related research, development and innovation at EU level? Please provide details.*

No answer

24. *What is your idea of a major research and innovation action that would have the highest positive impact on the security of raw materials supply for the EU industries? Please specify.*

The Cyprus Aggregates Association suggests research on the optimum quarry size (capacity) , licensing procedure, use of quarries waste materials.

25. *Are you aware of innovative exploration and extraction technologies, where project partners on a European level are needed to develop and implement the new technologies and which are the innovative technologies which need to be developed further? Please provide details.*

No answer

26. *Are there any other aspects related to skills, R&D and innovation for other raw materials, such as wood, that need to be further promoted? Please, specify.*

No answer

#### **RESOURCE EFFICIENCY & RECYCLING**

27. *In your view, and beyond measures already being taken (e.g. the recast of the WEEE Directive), what practical measures can be taken by the EU and by Member States to prevent the illegal shipment of obsolete end-of-life vehicles and electronic equipment?*

No answer

28. *In what ways should statistics on trade in, and recycling of, products containing secondary raw materials be improved?*

No answer

29. *Have you identified major problems with recovered paper? What are the main issues that need to be further analysed?*

**NO ANSWER.**
