

Heike Ebser
Hermann Ebser Werkzeugbau
Inh. Dipl.-Ing. (FH) H. Ebser
Company succession - owner

Sector	Metal and tool construction: Jig grinding and boring, coordinate measuring
Region	Baden-Württemberg
Employees	8
Nomination as an Ambassador	<p>Heike Ebser studied engineering and is also a toolmaker. During her studies she was one of only four women studying in this area at the university. She started working in the family business in 1999 after many years experience of working in German and international companies.</p> <p>Heike Ebser wants to encourage qualified women to step into the male-dominated environment of technical engineering as there are currently no women working in similar areas or holding professional positions. It is important to show women that men want to share their experience with women in this sector.</p>
About the company	<p>The EBSER WERKZEUGBAU company was founded almost 50 years ago and is now in its third generation. The company is a well-known service provider in the metal industry for specialised applications in high precision constructing to 0,001mm, mini-series and components.</p> <p>The Ebser company is the only company in the whole of Germany which offers complete solutions from a single source. The motto of the company is “precision & perfection”.</p>
