

## Beate Roll Bernhard Roll GmbH Authorized Signatory & Partner

<b>Sector</b>	Heating systems, photovoltaic, solar systems
<b>Region</b>	Berlin
<b>Employees</b>	6
<b>Nomination as an Ambassador</b>	<p>Beate Roll is a member in various entrepreneurs associations, e.g. Chamber of Handcrafts Berlin, Foundation: Handwerk Stifftet Zukunft etc. Through these activities she gets to meet many women and has gained many useful tips, information and contacts from them. From her own experience she knows that the situation of women is very complex. It is much more difficult for women to start their own business. They have less capital, less leadership experience and often not enough time because they have to manage also their families or to take a break in her current job. Her personal motivation to be an ambassador is to pass on all the knowledge she has gained from others about becoming a business woman to other women in crafts. That is why she is prepared to motivate others. She would like to encourage women in crafts to take over a company or to start their own. Besides the knowledge transfer also personal conversations are very useful for motivating others.</p> <p>She married her husband 30 years ago. Her husband worked in her father-in-law's company. After many years of family life she was active in the family company of her husband quickly becoming the point of contact for customers, employees, bank, tax officers, finance office etc. She received a lot of support from other women working in crafts. She worked in her professional and personal life for acceptance and respect. This is what she hopes for women who are starting their own business and she would like to help them with this. Today she owns 50% of the company and she is rightly very proud of that.</p>
<b>About the company</b>	The company Bernhard Roll is a family business active in crafts. It started in 1970 and is now in its third generation. The company specialises in various cooling and heating systems, solar energy, photovoltaic, water supply etc. for new and also reconstructed buildings.
