Your career

In 1994, I graduated in architecture from the «Ecole Spéciale d'Architecture» (ESA) in Paris. After graduation, I worked as an architect from 1994-1996 at «Cuno Brullmann Architectes» in Paris. Since 1996, I work as an independent architect in Luxembourg, where I am a member of 'Ordre des Architectes et des Ingénieurs Luxembourg'.

The participation in various national and international competitions enabled my office to plan and achieve interesting projects, constantly increasing the effectiveness, experience and joint talent of my team. That team currently comprises 14 people working on projects located both in Luxembourg and abroad.

Your motivations

Promote the position of women in the workplace, showing consistency and work-life balance between the entrepreneurial spirit and family life, unify the exchange of female heads of companies nationally and internationally, build professional relationships and, ideologically, encourage young women to embark on a career as an entrepreneur.

A renowned architect in a generally predominantly male field, she wants to promote women's perspective in the workplace, and to demonstrate the compatibility between entrepreneurship and family life, since women's autonomy is paramount for our society's wellbeing.
